### OUTLOOK IMPROVING

The prospect for Prince Rupert is improving. The possibility of a good salmon fishing season with fair prices to the rishermen is one of the most cheering features of the outlook.

The halibut situation is still uncertain but at least some of the boats have been getting enough for their catches to enable them to pay wages.

The Big Bay lumber mill is operating and the mine at Surf Point is producing. Anyox is continuing to produce copper when most people thought they would take advantage of the strike situation to close down and protect themselves during the period of low prices. Premier is still WALES WON operating steadily and paying dividends to the owners.

The outlook is that an arrangement will be made with the United States for an interchange of commodities that will much benefit this district.

British conditions have improved and U.S. seems to be on the road to betterment under a wise and progressive president. If world conditions become better Northern B. C. conditions will improve. But improvement will be gradual. Once the present political uncertainty is ended there should be a decided improvement.

### INTERDEPENDENCE

It is only of late years being realized how interdependent people are on each other. That is why a world state seems land, being held to a scoreless tie by to be the goal to be reached in the matter of organization and administration. If one country is in distress it reacts upon all others to a greater or lesser degree.

Communities are much the same. The ideal community ternational rugby, thus winning they did work, went through for a would be one in which all residents would be well educated, morally impeccable and prosperous and in it there would be no want or suffering or disease or sickness. Hospitals and churches would not be necessary. Beauty would prevail in the gardens, the streets, the homes and the people. There can be no real enjoyment as long as there is suffering, depravity, greed and ugliness.
