Crisis Precipitated by Germany's Action

Chancellor Adolf Hitler and President Paul von Hindenburg hold the eyes of the world at the moment, because of Germany's starlling withdrawal from the League of Nations and the disarmament conference because the world refuses to grant equality to the Reich. At the same time President Hindenburg decreed the dissolution of the dormant Reichstag and proclaimed for November 12 a general parliamentary election to test the nation's opinion of the double withdrawal. The statesmen of the world are looking on the situation seriously. They see the situation resulting from Germany's acts as precipitating the gravest crisis the world has faced since 1914. The world, and Europe particularly, expects the greatest arms race that the world has ever experienced.

Perry Will Win in Prince George And Manson in Omineca Declares An Independent Investigator

VANDERHOOF, Oct. 23:-The two constituencies of Omineca and Fort George will undoubtedly elect Liberal candidates at the election next week. A. M. Manson willwin in Omineca with Sam Cocker and the C. C. F. youth, A. E. Windle, probably splitting the remaining vote.

In Prince George the people are strong for Harry Perry the poll with the independent, Dr. Alward, coming second on the list.

An independent investigator has and this is the result of his analysis of the situation.

WORK ON HIGHWAY

Some of the men who until recently have been drawing relief pay at Prince Rupert are being sent to a military camp in Southern British Columbia. There they will be the steamer Prince John was re- bad beating, taking every stanza fed and clothed and given twenty cents a day for them- ported stormbound at Jedway with selves.

For two years no work has been done on the highway east of here yet the men have been idle.

T. D. Pattullo, when he was in Prince Rupert, promised All central interior points repor- could have his battered eyes to see that work on the highway was continued and the ted by Government Telegraphs | patched up. It would have been a men paid wages for their work. That is what they want, have cloudy skies with north wind technical knockout in the United That is what Prince Rupert wants. To insure that this policy is carried out, the safe thing to do is to support British Columbia's next premier.

TELLS VICTORIA ABOUT RUPERT

In an address in the Royal Victoria Theatre at the capital last week from which thousands were turned away because the large building was too small to accommodate them, T. D. Pattullo told the people of that city of the inequalities in Prince Rupert under which the fishermen suffered. He told how they fished side by side with American fishermen and then had to sell their product for less because of the tariff against them in the United States. He promised that if returned with a sufficient support in the legislature it would be his business to make representations with a view to rectifying these inequalities.

T. D. Pattullo as premier of the province will have more influence than he ever had in the past and if he can secure relief for the fishermen in this respect it will mean more to Prince Rupert than anything done by any member in the past. No other candidate would be able to rectify the wind, 15. situation because no other candidate would be in a sufficiently prominent position to have any influence at Ot-

tawa or Washington or elsewhere.

DELEGATE

Dr. Neil Carter to Succeed D. B. Finn At Fisheries Experimental Station

Dr. Neil Carter, chemist at the Departure Bay Biological Station near Nanaimo, Vancouver Island, will arrive in Prince Rupert early in Republic, invited him to send a re-November to succeed D. B. Finn as presentative here "to explore with director of the Prince Rupert Fisheries Experimental Station. Mr. Finn is leaving Prince Rupert in December for England to take up three months' special work at Cambridge University after which he will become director of the Halifax station of the Biological Board of

The transfer of Mr. Finn as well as the appointment of Dr. Carter as his successor are subject to ratification at a meeting of the executive of the Biologicial Board of November 4

Positively PRETTY Now

A "blood test" was the means of this pale, run-down, underweight girl finding new strength, vigor and beauty. She was one of several below-par patients who recently went to a reputable physician in search of a treatment that would build up their impoverished blood streams.

The physician's test showed that this particular young woman's blood was deficient in naemoglobin and red corpuscles This meant that there was not sufficient vitalizing oxygen being carried through her blood stream to build up body cells and clear the system of poisons. As a result she felt tired out, run-down, and

Knowing the value and safety globin, the physician instructed the patient to take this remedy

for another blood test. She did so—and the physician now practically normal and her blood count actually above normal. Her weight was up and her color improved. As the doctor expressed it: "Her face had rounded In other cases blood tests have

out and she was positively pretty.' proved the efficiency of Dr. Wiliams' Pink Pills in building up haemoglobin and thereby restorg pep, vigor and strength to adults, young girls and weak hildren. Take no chances try this "blood-tested" preparation. At drug stores-50 cents a pac-

Ernest Vancouver and waypoints. in the south, was a passenger on board the Princess Norah on Sa-Georgeson, did not reach port until 7 o'clock Saturday morning Isaac Matthews, well known At- turday returning north.

A Brief Synopsis of Liberal Policy

EREWITH is a brief synopsis of policy as laid down by the Liberal Party of British Columbia, in convention held in October, 1932.

Many matters of interest, not specifically set out, will require consideration. The principles enunciated are indicative of the Liberal viewpoint, and are broad enough to meet every question within provincial jurisdiction.

The Liberal Party exists as an official organization for the purpose of formulating and furthering measures that will make for the wellbeing of each individual member of society, and the welfare of society as a whole.

Innumerable questions, both of public and personal character, can be properly treated only through the agency of government.

Government is not an ordinary business, but carries responsibility to meet every problem arising from our complex social and economic conditions, in order that not merely a few, but all of our people may live in reasonable comfort.

The Liberal Party pledges immediate action under the best available advice and closest study.

T. D. PATTULLO.

August, 1933.

1.—Profitable and permanent Employment is the most important question facing our people. There should be co-operation between the national, provincial and municipal authorities and the Canadian banking system to establish the necessary credit to carry out a broad programme of constructive and useful wage-distributing public enterprise, and to further the health, education and well-being of all our people.

An Economic Council should be established, the membership of which shall consist of representatives of the various avenues of endeavour, such as health, education, agriculture, labour and the industries. This council will be appointed by the government on recommendation of the interests involved, and will act in an advisory capacity to the government.

Amongst other things the council will study industrial and social effort in the province and suggest means to correlate these efforts. It will familiarize itself with intra, inter-provincial and foreign trade, and will co-operate with the other provinces and the Dominion. It will also study such questions as production and consumption, and the marketing of our products, the number of hours of work per day and days of work per week, the standard of wages and commodity prices. These questions are of national as well as provincial concern, and British Columbia can take the lead in urging co-operation with the

other provinces and the Dominion as a whole. National Unemployment Insurance should be established upon a contributory basis.

2.—Our Financial position must be reviewed. Current expenditure must be kept within current revenue. While maintaining the credit of the province, effort must be made to reduce capital charges. We cannot continue to pay exorbitant rates of interest for money.

3.—The Taxation Structure must be revised with a view to reduction wherever possible, including exemption in the lower scale of wages and salaries. THE STATE OF THE PARTY OF THE P

SELECTION OF THE SELECT

4.—The health of each of us is important to the whole community, and a measure of State Health Insurance should be made effective, not only to preserve health, but to reduce costs both to the average citizen and to industry.

5.-A general and effective review must be made of the Educational problem, rejecting any proposed organization that involves a caste system. We must facilitate the intellectual growth of each individual member of society in order to equip him for his daily tasks, and for the enjoyment of such cultural pursuits as may be in keeping with our social customs.

Triangular disagreements between the school boards, municipal councils and the department of education must be adjusted, and our whole system placed upon a sound financial basis.

6.—The financial position of our Municipalities is of increasing concern. An equitable adjustment must be made as between the province and the municipalities, and the municipalities placed in a sound financial position.

7.-An effort should be made to settle our Agricultural Lands in order that more of our citizens may be self-supporting. Agriculture as a whole must be put upon a sound and profitable basis, and made capable of sustaining and directing itself, in line with all other national, basic industries.

8 .- Continuous effort should be put forth to assist industry in Marketing its products, in timber, agriculture, fishing, mining and, in fact, every operation where it appears that useful service can be rendered.

9.—Our highways must be kept in good condition, both for the benefit of settlers and the tourist traffic, and expanded as circumstances warrant. In this connection a Highway Board should be established to make for continuity of policy and to inspire confidence in impartial treatment. 10.-A Public Utilities Commission should be

established. 11 .- A National Central Bank should be estab-

12 .- Social Services, such as Mothers' Pensions, Old Age Pensions, etc., must be maintained. Abuses of administration should not be allowed. and injustice through mere technicalities should not be permitted.

13.—The Peace River must be given access to the Coast.

14.- In order that the utmost Freedom of Action by Members of the Legislature may be assured in respect of questions before the House, it is Liberal policy that a government shall be considered to be defeated only upon a straight want-of-confidence motion.

15.—The Dominion Government will be asked to place the Province of British Columbia upon a basis of equality with the other provinces, and to this end request will be made for a Royal Commission to ascertain the extent to which the Province of British Columbia has not been given Equality of Treatment with the Other Provinces of the Dominion.

16 .- There shall be a permanent Voters' List to

ensure that all eligible voters are enrolled. 17.—The Leader of the Liberal Party is given a free mandate to choose for his associates in government, men of character, ability and standing, having regard solely to the public interest.
