

Pulp and Paper Manufacturing Seen as Prince Rupert's Hope In Timbering; Fishermen Lauded

With billions of feet of suitable timber in the immediate vicinity, a transcontinental railway ready to haul the product to the markets of the continent and an unsurpassed port for the handling of waterborne shipments to all parts Gen of the world, Prince Rupert enjoys an enviable position for the establishment of a pulp and paper industry, M. P. Mc- a Caffery declared in speaking before

luncheon yesterday on the subject. of "The Lumber Business." While

EREWITH is a brief synopsis of policy as laid down by the Liberal Party of British Columbia, in convention held in October, 1932.

Many matters of interest, not specifically set out, will require consideration. The principles enunciated are indicative of the Liberal viewpoint, and are broad enough to meet every question within provincial jurisdiction.

The Liberal Party exists as an official organization for the purpose of formulating and furthering measures that will make for the wellbeing of each individual member of society, and the welfare of society as a whole.

Innumerable questions, both of public and personal character, can be properly treated only through the agency of government.

Government is not an ordinary business, but carries responsibility to meet every problem arising from our complex social and economic conditions, in order that not merely a few, but all of our people may live in reasonable comfort. The Liberal Party pledges immediate action

under the best available advice and closest study.

an owned where an end of the second spectrum of the second s

August, 1933.

T. D. PATTULLO.

1.-Profitable and permanent Employment is the most important question facing our people. There should be co-operation between the national, provincial and municipal authorities and the Canadian banking system to establish the necessary credit to carry out a broad programme of constructive and useful wage-distributing public enterprise, and to further the health, education and well-being of all our people.

An Economic Council should be established, the membership of which shall consist of representatives of the various avenues of endeavour, such as health, education, agriculture, labour and the industries. This council will be appointed by the government on recommendation of the interests involved, and will act in an advisory capacity to the government. Amongst other things the council will study industrial and social effort in the province and suggest means to correlate these efforts. It will familiarize itself with intra, inter-provincial and foreign trade, and will co-operate with the other provinces and the Dominion. It will also study such questions as production and consumption, and the marketing of our products, the number of hours of work per day and days of work per week, the standard of wages and commodity prices. These questions are of national as well as provincial concern, and British Columbia can take the lead in urging co-operation with the other provinces and the Dominion as a whole.

4.-The health of each of us is importa whole community, and a measure of Stat Insurance should be made effective, not preserve health, but to reduce costs bot average citizen and to industry.

5.-- A general and effective review made of the Educational problem, reject proposed organization that involves a ca tem. We must facilitate the intellectual of each individual member of society in equip him for his daily tasks, and for th ment of such cultural pursuits as may be ing with our social customs.

Triangular disagreements between th boards, municipal councils and the der of education must be adjusted, and or system placed upon a sound financial

6 .- The financial position of our Muniis of increasing concern. An equitable ad must be made as between the province municipalities, and the municipalities a sound financial position.

7.-An effort should be made to Agricultural Lands in order that more of zens may be self-supporting. Agriculti whole must be put upon a sound and y basis, and made capable of sustaining an ing itself, in line with all other nation industries.

8 .- Continuous effort should be put assist industry in Marketing its products ber, agriculture, fishing, mining and, in ery operation where it appears that us vice can be rendered.

9.-Our highways must be kept in good condition, both for the benefit of settlers and the tourist traffic, and expanded as circumstances warrant. In this connection a Highway Board should be established to make for continuity of policy and to inspire confidence in impartial treatment. 10 .- A Public Utilities Commission should be established.
