**ASHAMED OF WHAT?**

Yesterday the despatches told of a bank manager who shot himself when it was discovered that he had defrauded the bank. He was ashamed of himself when his crime was discovered.

The average person would be ashamed to take something which did not belong to him. The thought of being dishonorable is abhorrent to him. There is another class of persons whose shame comes only from the wrong deed being found out. Personal honor does not enter into consideration. The scoffs of the public and the punishment for the deed are the only considerations.

We know little of the case reported yesterday but it seems to be one of those many which occur from time to time where the man is led on from step to step and when found out takes the revolver route to eternity.

**ITALIANS SCORE**

The Italians have scored another point in producing a speed plane faster than any other in the world. Possibly an international speed test will be held in the near future and then the new seaplane will have an opportunity to match itself against the fastest planes from other countries. In the meantime, congratulations are due to the people of Mussolini's country for keeping ahead in the flying game.

**TOO MUCH OF ANYTHING NOT GOOD**

Yesterday we read with astonishment that, owing to the glut of herring in England, two thousand tons had to be dumped into the sea from which it came. So numerous were the fish that they were being sold at ten for a penny instead of a penny each which at one time was the average retail price.

Herring are a good food but too much herring is not good. So with most articles of food and drink. Too much is as bad as none.

Most people like music, but too much music is most objectionable. After a long spell of harmony we look eagerly for discord.

One of the most beautiful things in the world is rest. We all need it often and some never get enough, but too much rest is horrible. It is far worse than too much work.

Brilliant conversation is most enjoyable. We all like to meet a person who can talk entertainingly but woe to the person who talks too long. It were far better for him that he never talked at all.

During last summer the people of many countries including sections of Canada looked longingly for rain clouds. Precipitation was the one thing needed that could bring joy to endless multitudes. Yet in some parts of the world it is said that the people have too much rain and that they tire of it. How sad!

**Strikers Clash With Police**

Strikers, workers and police are tangled here in a furious hand-to-hand melee during the recent uprising in Madrid. It was estimated that 400 were killed as Communists and others protested against the present government. Other outbreaks occurred in practically every other large city in Spain. The revolt was subdued by government troops.

## Free Samples at Druggists of the Remarkable New Aid in the Prevention of Colds

Local Druggists are Now Offering a Free Trial of Vicks Va-tro-nol for Nose and Throat—Also of Its Ideal Companion, Vicks VapoRub.

### New Prevention Idea

This Discovery Introduces Unique Vicks Plan for Better Colds-Control

### How Vicks Plan Works

Following years of research on the problem of colds, Vicks Chemists have developed a new aid in preventing colds—Vicks Va-tro-nol, for nose and throat. This new Vicks preparation is the ideal companion to Vicks VapoRub, the modern method of treating colds.

These two Vicks preparations, together with a few simple rules of health, form the unique Vicks Plan for Better Control of Colds. The helpfulness of the Plan in reducing the number and duration of colds has been clinically tested by physicians. (Full details of the Plan are in each package of Vicks Va-tro-nol and of Vicks VapoRub.)

Briefly, here is how Vicks Plan works:

#### To Help Prevent Colds

Watch yourself and children after exposure to any condition that you know is apt to be followed by a cold, such as—

Contact with others having fresh colds,—crowds, stuffy ill-ventilated rooms, public places—sudden changes in temperature—excesses in living, such as over-eating, smoking or drinking, which reduce body resistance.

### Alex Manson's Plan For Providing Transportation For Northern B. C. Mines—No Gold in Vanderhoof Strike—Deal on Georgia River

A. M. Manson, M. L. A. for Omineca, has commended the action of the provincial government in sending a well qualified location engineer to select the best route for a road from Fort St. James to Finlay Forks. Such a road would be a great boon to the mining industry of the Omineca district. At present there is a road from Vanderhoof, a distance of forty-two miles, to Fort St. James. Beyond Fort St. James there is a semblance of a road to Nation River which, by now a mere trail, swings to Manson and Germanen Creeks, on to the Omineca River and down the Meslinka to Finlay Forks. This road has been badly located, states Mr. Manson, who brings out that the government has taken an important step towards adequate transportation into this rich area by sending the location engineer in the person of W. K. Gwyer, former district engineer at Prince Rupert for the provincial department of public works. He suggests that a good road be provided eventually to Finlay Forks by building as much as funds will permit each year. Once at Finlay Forks the road would reach a strategic point for the opening up of the entire northern half of the province. It would open into the back door of the great Peace River valley and give it an arterial highway to the central and southern portions of the province. Mr. Manson's viewpoint is that the roads will make possible the development of the mines and that the mines in turn will bring the railways. He emphasizes that it is folly at this stage to talk of spending \$40,000,000 on a railroad into the Peace River, arguing that the railway will come when the mines have demonstrated that the traffic is there. Mr. Manson instances the fact that the Consolidated Mining & Smelting Co. which has had parties in the area for a number of years, sees sufficient possibilities to acquire the Canadian Northeastern Railway charter and to begin construction this year from Stewart. He feels that the great mining company is in the north to stay. The railway from Stewart, he believes, will eventually extend to Finlay Forks where it will connect with the road from Fort St. James. These two main arteries will be the means of access to the rich mineralized areas which will no doubt in time be served by roads linking them either with the railway or with the Fort St. James-Finlay Forks road.

## Guide to Correspondents

The Daily News welcomes correspondence on live topics of the day or any other subject of public interest, but letters must be brief and to the point. The long-winded correspondent has no place in modern journalism.

Every letter must be signed by the writer, not necessarily for publication but as a matter of good faith and courtesy. All unsigned documents go to the waste paper basket. Letters of a caustic character must have the signature appended for publication.

Letters should be written on one side of the paper only. Correspondents must avoid personalities and the language should be such as would be allowed in the ordinary rules of debate.

## Vancouver Paper Would Get States To Finance Road

The Vancouver Sun, in an editorial, agrees that the cost of \$14,000,000 estimated in connection with the construction of the section through this province of the proposed Alaska-Yukon highway is obviously beyond the means of British Columbia to finance at this time but advocates that the British Columbia government would be warranted in showing some initiative in the matter of ascertaining if some deal could not be made where-

by the United States, which is so anxious to have the road, would foot the bill. Indeed, the Sun points out, the province of British Columbia has already made a substantial contribution to such a highway by having already built a road to Hazelton.

Mr. and Mrs. Horace E. Alton left on last evening's train for a month's visit in Sault Ste. Marie, Ont.

Victor Basso-Bert was the speaker today at the regular weekly luncheon of the Prince Rupert Rotary Club in the Commodore Cafe, his subject being "Fascism." There was a good attendance of members with President J. J. Little in the chair.

# Omar the Tentmaker knew...

OMAR certainly knew the value of publicity—wherever his poetry was quoted, people spoke of his tents. Probably they were good tents—they might have been the best procurable—it is also quite likely that people from far-off villages came to buy from him, but—it was eight hundred years before all the world knew of him and his famous pre-prohibition slogan, "A loaf of bread, a jug of—" (pardon us). Eight hundred years after he died, we are all convinced that Omar made tents—not only that, but we have heard so much about them we are convinced they must have been GOOD tents. Were they obtainable today we would probably buy one. However, poor Omar has been gone nearly nine centuries.

● HIS ADVERTISING CAME TOO LATE TO DO HIM ANY GOOD

● Isn't it the way? Merchants who have anything to sell, decide to advertise and do so indiscriminately, without enquiring into the merits or demerits of the various media—the greatest mistake a merchandiser can make—and all for the want of five minutes' reasoning—for that is enough to convince any person that the best selling media are those which reach all of the desired market all of the time—THE DAILY NEWSPAPERS.

## WHIFFLETS

From the Waterfront

Bringing passengers, mail and freight, C. N. R. ss. Prince John, Capt. Edward Mabbs, arrived in port at 6 o'clock this morning from Vancouver via the Queen Charlotte Islands and will remain over here until 10 o'clock tomorrow night when she will sail on her return south over the same route. The vessel ran into some unusually rough weather on the way north and was forced to heave to south of Skidegate Inlet for a time.

Forest Ranger J. B. Scott of the Queen Charlotte Islands is in port with the departmental cruiser Lillian D. On his way from the logging camps on the lower end of the Islands, he called at Queen Charlotte City.

The salmon sealing season has now closed on the Queen Charlotte Islands, according to word received in the city. The season is reported to have been not very profitable, either to the canneries or the fishermen. Coho, trolling on Skidegate Bar continues to be fair with the Canadian Fish & Cold Storage Co. still buying fish.
