Why an Easy?

Scores of different washers are on the market. Scores of others have come and gone. Not one employs the same principle they used ten years ago-Easy excepted. Cylinder, Oscillator, Dolly, Agitator are all obsolete today. The Easy Co. has used and developed the vacuum cup principle for 57 years. All others force the clothes through the water.

27c Easy forces the water through the clothes. There's a difference.

A factory representative will be with us during the week. Easy Washers and Easy Ironers will be demonstrated. Call for demonstration. Your presence will be appreciated.
