Most of Casualties Occurred in North and South Carolina; Recruits Are Being Gained For Ranks of Protesting Workers

NEW YORK, Sept. 6: (CP)-With ten men dead and scores injured, the general strike of textile workers took on a grim aspect today. Shotguns, dynamite, sandbags, barricades and tear gas bombs were used with great frequency by one side or another. Most of the deaths occurred in North and South Carolina. Late reports stated that the strikers were gaining recruits.

## Farmers End Suffering of Drought-Stricke Cattle

Cattle with tongues swollen in parched mouths, with legs wobbly from weakness, with bones plainly visible through shrunken hides are shown being put out of their misery by a government marksman ir the drought-stricken areas of western United States. Cattle are the worst victims of the drought and are part of the 6,500 head which have been killed with bullets since the United States government began its purchasing of stricken heads. Over 3,200 have been bought and moved to new areas.

# Many Pretty Girls Here Struck Fancy of Terrace Visitor To City During Recent Carnival

TERRACE, Sept. 6:-Practically all those who visited Prince Rupert for the week of carnival have now returned. They are unanimous in reporting a perfect week both of varied amusements and of fine weather.

One old timer who had not visited the city for some years said what he noticed had changed the most was the motor cars. On the occasion of his last visit there were still a few horses and the cars and taxis at the time were somewhat shabby. Now he says you see such shiny, swift-moving, expensive looking cars.

There are more nice looking women now than formerly. The last time he went, he says, he only saw four pretty girls and they were all Terrace girls who were working in Rupert. This time he seemed to see many charmers. He was especially rapturous concerning the slim and lovely creature, decked out in an attractive uniform, who brought him coffee and pie which he says is his staple diet when he goes to

### RADIO RECEPTION HERE

The federal department having the matter of radio reception in hand is wise in hesitating to advise the power company to go to any extensive expense in making alterations to its transmission line here until it is definitely ascertained, by the making of tests which are now in progress, that such changes would have the desired result of eliminating noises emanating from the line and improving reception. On the other hand, owners of radio receivers in Prince Rupert, and there are many of them here whose investment in the aggregate would make a very imposing total, are justified in expecting that the power company will do everything possible, after the tests have been made, to remove such disturbance as may be caused by the power line. There seems to be no doubt but that the power line is responsible for some of the trouble but there are also probably other disturbing factors which efforts should be made to eliminate also.

Even though their patience may have been taxed it is to be questioned if anything is to be gained by the resolve of some of the local radio set owners to refuse to pay their licence fees further until some service is given them in the way of improving reception and making their sets more useful and enjoyable. That does not say that they should not be sympathized with for the exasperating difficulties that beset radio reception here. The government, nevertheless, can probably enforce collection of the annual licence fee if it wishes to go to the length of doing so. Refusing to pay the licence will probably not make the authorities any more sympathetic. Possibly it might be just as effective to "play the game," pay the licence and keep up the agitation for improved radio reception here until those responsible are "shamed" into taking some action.

### PUBLIC WORKS PROGRAM

The \$800,000 public works program announced by the provincial government as being about to commence cannot be expected by any means to meet the needs for work in this province. This, augmenting whatever the federal government may decide to do, will not even meet the requirement. The best that can be said of it is that it will be at least a little more than has been done during the past year or so and would appear to be a step in the very desirable direction of replacing the policy of direct relief with a plan of work and wages. There is a long way to go yet, however, before the need for gainful employment has been met and the people will be impatient until further progress is made.
