Premier Benilo Mussolini has refused to yield any ground from Italy's demand for a free band in establishing a protectorate of Ethiopia accompanied by military occupation. He refuses to enter into any negotiations on a basis less than this.

In Canada the election is causing a good deal of unrest. Regiment Business people are wondering what is going to happen. Many a scheme of government sounds well when its backers are theorizing but when it is proposed to put it in practice it is discovered that the obstacles to the change are almost insurmountable.

Moderate changes looking to an eventual state of democratic rule are probably the ones to be preferred. No country can afford to be static. Progress must be the rule. Also no country can afford to make such changes that it is cut off from the rest of civilization. The middle course is always safe and causes less suffering to those affected by the changes that it is desired to bring about.
