#### THINGS THAT REALLY MATTER.

We often make a fuss about things that really do not Cincinnati. Only the fact that they matter much and at the same time we neglect the things have played fewer games keeps the that are important. Take the present situation. There is to- the basis of games won and lost, day an election campaign going on and a great many peo- they are actually half a game beple get all worked up over it. But this should not be neces- hind. The St. Louis Cardinals, playsary. All we are doing is trying to choose the best possible ing at home, routed the lowly Bosman to represent us at Ottawa.

We notice that even the C.C.F. organ acknowledges that the Liberals will form the next government but they intimate their party will be the official opposition. This we do not expect.

This week a man came into the office to pay his subscription to this paper. He told us that he was planning to support the C.C.F. candidate at this election. We told him that was his privilege. While we believe the Liberal course is the better one every man is entitled to his opinion. The country will not suffer very greatly if the C.C.F. candidate is elected. He is reported to be an excellent person.

Many of our best friends are Conservatives. They are supporting C. H. Orme and we cannot imagine any harm that would come to the city if Mr. Orme should be elected, dreadful as some of our Liberal friends might feel it to be. In fact Mr. Orme would make an excellent candidate if he were only a Liberal.

#### FIRST THINGS FIRST

While we all think the election important and talk a good deal about it, as a matter of fact, it is not so important as it might seem. Many look upon it as a big sport event on which they have a chance to wager a little money.

we strongly urge people to vote and to the gent interest in politics but there are other much more Bowling Finals

We suggest that what a person does for his city or his country is much more important than what he thinks or what view of Government he expresses through the ballot. Take the purely local view of it.
