MR. MANSON TO WITHDRAW FROM CIVIC POLITICS

JAMES CARTER DROWNED IN GALE OFF COAST OF GRAHAM ISLAND

Was Out on E. D. Stevens' Launch When Gale Came On—Tried to Make Landing at Ti-El River—While Trying to Reach Skidegate Their Steering Gear Broke and Boat Turned Turtle in Breakers—Joe Tasarat Escapes After a Fierce Struggle

(By Special Wireless)
Skidegate, Oct. 14.—Half famished and suffering from the cold, Joe Tasarat, a French settler of Lawn Hill, has reached here with the sad news of the death of James Carter by drowning in a launch accident off the east coast of Graham Island. The sad affair happened on Wednesday afternoon, and Tasarat had a narrow escape of his own life.

safety. They decided to try and make the Ti-El River, but when they reached there the tide was too low to gain an entrance. With a choice of risking their lives waiting till the tide rose or of going to pieces on the bar, they decided to put to sea again and make for Skidegate.

launch was driven closer in shore to the breakers. Wallowing in the trough of the waves, she was suddenly swept among the breakers which rolled her over, throwing the men out into foaming water. Tasarat, after a great struggle managed to make the shore, but his unfortunate companion perished among the breakers.

"OLE OLSON"
The Well Known Swedish Comedy is Calculated to Make Anybody Laugh.

and his dialect and mannerisms are considered by the critics as very true to nature and the Swedish character. Miss Margaret Doyle will be seen as the winsome Genie and Miss Pookie Mullalley in the part of the wife, a small part to which she adds much dignity. The remainder of the cast will be seen to advantage. In the last act several clever specialties will be introduced amongst which will be Mr. Arthur Cyril in Scotch songs.

BUSY MAKING WAR PICTURES
The Tripoli Campaign is Now Being Fought in the Hills of New York State by Assyrians.

WHAT SAID THE PASTOR WHEN THE TRESTLE FELL?

Anxious Moment for the Recording Angel During Operations in Preparation for a Prince Rupert Banquet—Popular Pastor Placed in Unpleasant Predicament

Little did the guests at a certain banquet recently realize what fearful risk was the nice smooth ceiling of the hall sheeted in time for the ceremony. While the work was in progress the Recording Angel had an awfully anxious time, and the reputation of a certain pastor hung in fearful suspense for whole minutes at a time with one hairbreadth escape hailed by the Recording Angel with a sigh of intense relief.

made from a plume of his wing into his celestial ink pot. But there was nothing doing. Then the awful moment came. A willing and weighty helper clambered on to the pastor's platform to help him adjust the plank. For a second things seemed all serene as both craned their necks heavenward. Then suddenly with a snap the plank on which they balanced broke, and down crashed pastor and flock amidst a shower of nails, shavings, and ejaculations. In the momentary babel of expressions that ensued the Recording Angel got a bit rattled jotting down the expletives that burst from the lips of the scattered flock of helpers amongst whom the pastor was buried. What the pastor himself said is unfortunately not on very clear record. The Angel began the word with a "D" but made it "Dear-Deer" on second thought. Some of the helpers didn't get off quite so lightly it is whispered, and altogether the Recording Angel wouldn't go through such another moment of breathless suspense for a year's salary.

MAYOR MANSON TO RETIRE

His Organ Says That He Will Not Seek Re-election Next Year.

The Journal announced editorially last night that Mayor Manson has decided to retire from municipal politics at the end of the year, and accordingly will not seek re-election. Mr. Manson is at present away touring the constituency in company with Mr. H. S. Clements, M. P., of Vancouver.

FIRST TO CLIMB THE WHITE PASS

Dr. Charles G. Percival with Bull Dog Auto Passed South on City of Seattle—Will Go to New York Across the Continent.

On board the S.S. City of Seattle which passed southbound yesterday there travelled Dr. Chas. G. Percival, of New York, with his Abbot Detroit bull dog car stowed snugly on the forward deck of the steamer. He was en route for Seattle, and spent an hour ashore in Prince Rupert seeing the progress of the city. He was impressed by our method of making good roads out of the raw rock and muskeg, and from the autoist's point of view appreciated Third avenue's increasingly smooth surface.

TINY BOAT LEAVES FOR MASSET WITH GASOLINE AND DYNAMITE

Perilous Trip Undertaken by the Tingley Brothers—Are Risking the Ocean Voyage With Dangerous Cargo—Passenger Steamers Refuse to Carry the Explosives Owing to Customs Regulations—Fears are Expressed for Their Safety

At two a.m. today in the darkness with a stiff cold breeze sending squalls down the harbor the two brothers Tingley, boys well known in Masset started off on a really perilous trip attempting to make Masset in a twenty-five foot boat heavily loaded with gasoline and dynamite.

must have so the hardest amongst them take the risky trip in small launches to Rupert and back for supplies. The brothers Tingley got their boat at Seymour Narrows. It is a small boat used by surveyors on the sheltered waters of the coast. Fitted with a 7 H.P. Fairbanks engine it was making the trip north when in Johnson Strait a heavy sea running gave the craft such a dusting that the boys put into Alert Bay and there fitted the boat with a light runk cabin to throw off the water. With only this protection after a thorough over hauling at the Rupert Marine wharf, and the fitting of two extra pumps, the boat is row making the dangerous trip. A stop was proposed at Stephens Islands for further tightening up of the gear before the last long stretch is attempted. News of

the safe arrival of the boys at Masset will be eagerly awaited in Rupert.

Sherlock Holmes Dead

London, Oct. 14.—Joseph Bell, the eminent Scottish surgeon, who was the original of the character of Sherlock Holmes, is dead at Mauricewood, Milton Bridge, Midlothian. He was born in Edinburgh in 1837 and was an instructor of Conan Doyle at Edinburgh University. His hobby was the study of mysterious crimes.

Building Permits Low

Building permits to the amount of \$1400 were issued this week. They include four minor jobs, cottage buildings, and alterations, and one residential building for B. H. Crossett on Eighth avenue to cost \$900.

KETCHIKAN MILL IS FIRE SWEEPED

Fire Visited the Alaskan Town at Eight O'clock Last Night

(By Special Wireless)
Ketchikan, Alaska, Oct. 14.—The Ketchikan saw mills were destroyed by a fire which visited here last evening, doing a great amount of damage. The fire was at its worst at about eight o'clock but is now subdued.

Old-timers' New Home

Mr. and Mrs. F. S. Clements have moved into their new bungalow on Third avenue and Eighth street. The bungalow is beautifully finished and furnished, and very conveniently planned as will be remembered from the description published of it in the News lately.

"George" Was Early

Soon after nine this morning the S.S. Prince George, G. T. P. passenger boat, arrived ahead of time with a party of passengers large for the end of the season, and abundance of freight. Captain Saunders had nothing to report beyond the fair weather conditions which prevailed for the most part of the run.

BIG COPPER MERGER

Baron Rothschild Will Head the New American Combine

Duluth, Oct. 14.—A number of influential copper magnates of England and America are making an inspection tour of the copper mines in Arizona, and it is stated on excellent authority that a merger is in progress of the various copper companies of the country. "It had been intended to have W. E. Corey, of Duluth, act as the head of the consolidation, but owing to the attitude of the United States government toward trusts, it was deemed wiser to have the company formed in London with Baron Rothschild at the head."

FINAL FIGURES OF ELECTION

Clements' Majority Over All is 188. He polled 1810 Votes Altogether to 1622 for Duncan Ross. Official Announcement by Returning Officer.

Final results of the Dominion Government election in Comox-Atlin riding is as follows:
H. S. Clements 1810.
Duncan Ross 1622.
Majority for Clements 188.
Spoiled Ballots 47.
Rejected Ballots 18.

Rejected ballots are those bearing any mark by which the voter could possibly be identified, and the percentage of these in this election, less than one-half per cent, is very small.

F. G. Dawson, the returning officer, gives out the above figures today as the official return. In the event of any dispute regarding the figures a recount may be called for within four days of this announcement by the Returning Officer.

No Telegraph News

Owing to a breakdown of the land telegraph wires during the recent gales the News has had to trust to the wireless stations for most of its outside news today.

Some rare and beautiful things in chinaware have arrived. Ask to see them at Wallace's. 2t

PATHETIC FUNERAL

Remains of the Late Mrs. Stover Will be Interred at New Westminster.

Funeral services for the late Mrs. Stover are held this morning at the Catholic Church. The remains will be shipped for interment by the S.S. Comox tomorrow at New Westminster. Very great sympathy is extended to the husband bereaved early in his married life, and left with motherless little ones.

New lot of very pretty cretonnes.—Wallace's. 2t

HALIBUT AND RED COD

Splendid Haul by Indian Boatmen. 1500 lbs. Landed This Morning.

Messrs. William E. Dudoward and David Dinny, two Indian fishermen well known on the waterfront brought in today a fine haul of 1500 lbs. of halibut and 200 lbs. or so of red cod. The latter fish are caught just beyond the harbor entrance, and have the peculiar trick of dying almost as soon as the hook grips them. When dead the air bladder expands in the fish so that it rises to the surface like a little red buoy.

NEW ISLANDS ARE FORMED OFF THE ALASKAN COAST

Capt. Fred Schroeder Brings Strange Tale into Port—Saw Four Islands Cast Up Before His Eyes Out of Boiling Mass Near Bogoslov

San Francisco, Cal., Oct. 14.—Bringing a tale of new islands off the Alaskan coast, islands newly formed in nature's workshop and thrust upon the sea under the eyes of his ship's company, Fred Schroeder, captain of the schooner Elviera, steered his vessel into this port last night, fresh from a sea otter hunting cruise in the Arctic. Schroeder said that as his vessel neared Bogoslov, an island peak in northern waters, a burst of vapor rose above the island, splashing the spray with bright colors. From the ascending cloud-dust rained down upon the sea, stirring it to a boiling mass and as the vapor cleared, a new land was in sight.

SPECIAL CHURCH SERVICES

Presbyterians Will Dedicate the New Church Hall Tomorrow Morning.

On Sunday morning the first service will be held in the Presbyterian Hall on Fourth avenue, near McBride street. On Thursday night the Presbyterian Banquet marked the first opening of the hall, but the special dedication service will be Sunday morning. It is always a feature on these occasions for all the children to be present. Mr. Kerr will preach on "The Home and the Child."

"When it cooled off," said Schroeder, "there were four new islands. We could see them distinctly but they quivered in such a strange way that we did not attempt to approach them."

Wrong Again

"Prince Rupert has expectations of becoming the second largest port on the British Columbian coast," says the Vancouver News Advertiser.

Spoils of the Sea

The trawler Kingsway came in this morning with a fine haul of fish to be shipped south by the George after boxing in ice at the Kingsway's depot by the Davis wharf.

DAILY EDITION.

SATURDAY, OCT. 14

TRADING UPON IGNORANCE

Over in England certain ecclesiastical circles, as well as the population of the village of Tivetshall St. Mary, Norfolk, have been vastly entertained of late by an amusing contest which took place between the vicar of the parish and one of his flock. The parishioner, an agricultural laborer, had passed some disparaging comments on the vicar's work, which were resented. Finally, Hodge challenged the vicar to "swap jobs." The vicar promptly consented. The challenger backed out, however, when the vicar placed the following schedule for the laborer to perform as his Saturday's work in the contest:

9.30-10.0—Retranslation of English into Greek.

10.0-11.30—Oecumenical documents of the Faith. Revise the "definition" of the Council of Chalcedon.

11.30-12.30—The Homo-ousian and the Constantinopolitan symbol.

12.30-1.0—The "hapax legomena" of the Apocalypse.

3.0-5.0—House-to-house visiting in St. Mary's.

6.0-6.30—Write out notices for church porches and choose hymns for Sunday.

6.30-9.0—Prepare two sermons and a children's address.

Of course the parson won on a bluff. "Hapax legomena" sounds very formidable—in Greek. The laborer was frightened from his task by an unfamiliar phrase. Possibly he would not have recognized his familiar "cow with a long tail" under the pedantic definition of "a bovine with a caudal appendage of exaggerated longitudinality."

To no brother cleric would the parson have attempted the bluff that he spent his week in retranslating English into Greek, in contemplating the Homo-ousian symbol, in revising the Chalcedonian definition—or even in Saturday afternoon house to house visiting—while two sermons and an address were left till last thing on Saturday evening.

Nor is it at all likely that any English parson in this day of sweat shop evils and rack rented peasantry, would waste time in preparing a revised definition of a question that even in 451 A. D. possessed no interest for the people at large. Indeed, on the other hand it is quite probable that Hodge was quite capable of the job, had the parson merely explained to him that the Chalcedonian problem was as to whether two perfect and complete natures could live in unison in one body. Hodge was beaten on a bluff.

The little incident, amusing in its way, has its bearing, upon the broad public issues of real life.

How many people, for instance, were stampeded during the recent election, just as easily as was Hodge by his smart-Alick vicar, by the fear of something that looked big and terrible because they didn't understand it. The annexation cry was an appeal to blind fear. The "save our natural resources for ourselves" cry was even more palpably a cry that depended for its success upon reaching a public so ignorant of elementary economics that they could not realise that progress waits on the sale of our natural resources.

Not one man in a thousand who voted against reciprocity, has ever bothered to think for himself that the deficit in our balance of trade with the United States which he was anxious should not be paid in natural products, must else be paid in good Canadian coin.

Members of the Canadian Manufacturers' Association who talked to such good effect in the East about "the balance of trade," "saving Canada for the Empire," "saving Canada for the Canadians," etc., traded as much on the ignorance of the Canadian voters as did the English parson on his less literate parishioner.

Prince Rupert and the Skeena district may well feel proud of the fact that they withstood the appeals to ignorance and cast a rational and enlightened opinion on the recent reciprocity proposals.

Letters to the Editor

ABOUT THE GOVERNOR-GENERAL'S SCHOOL MEDALS

Dear Sir,—Lord Dufferin, in 1876, introduced the custom of donating annually certain bronze medals, to be awarded to the pupils of the public schools of the Province of British Columbia, upon the results of the high school entrance examination, a custom which has been kept up to this day. His Excellency Earl Grey, very generously increased the number of these medals from 4 to 15.

These 15 bronze medals, have been distributed during the past six years, in British Columbia, in such an unfair and unsatisfactory manner as to bring little honor, either to the donor or to the recipient.

For instance, in 1906, the first year the 15 medals were distributed one was given to a school district where there was no competition, and the pupil to whom it was awarded got 634 credit marks, and ranked 48 in the Province; whilst the district that ranked first in the Province, where 6 passed the examination and the head pupil got 842 marks, got no medal. Another district, which ranked 55, where 8 passed the examination and the head pupil got only 609 marks, got a medal. The district that ranked third in the Province, where 7 passed, and the head pupil got 831 marks, got no medal; whilst a medal was given to a district that ranked 32 where 5 passed, and the head pupil got 677 marks.

This shows clearly that neither competition nor excellence in scholarship cut much figure in the distribution.

In 1911, a medal has again been given to a district that ranked 55 where 7 passed the examination, and the head pupil got 632 marks; whilst the district that ranked third where 14 passed the examination, and the head pupil got 827 marks, got no medal. There are many instances of similar unfair awards.

The first explanation vouchsafed by the department for such vagaries was, that these bronze medals were given to districts where a high school was established. When this explanation was published in the press, a district where there has been a high school since 1903 demanded why it had not gotten a medal in 1906, or 1907, or 1908. The explanation was then given that these medals were awarded to districts where there was the most competition at the high school entrance examination. The fact is that neither explanation is correct.

In 1907, two districts without a high school got a medal and two districts with a high school got no medal. In 1908, a medal was actually taken away from a district with a high school for 6 years where 3 pupils passed. One was given to a district with no high school where 12 passed, while another district with a high school for 5 years where 17 pupils passed got no medal.

It is very gratifying to read in the speech of His Excellency Earl Grey to the boys of Trinity School, Port Hope. "There was something rotten in the character of Canada, if her sports were not quite straight or fair," and "to give no countenance to those who did not play the game fair."

The foregoing shows that there will have to be an understanding with the McBride government that those bronze medals will be distributed, in the future, according to some fixed principle, so that there will be no chance of a recurrence of anything like the incidents cited above, whilst H. R. H. the Duke of Cornwall, is our Governor-General.

On behalf of the pupils of the Public Schools, of the Province of British Columbia.

JOHN N. MUIR.

Barrister and Solicitor.

107 Metcalfe Street, Ottawa,
September 28, 1911.

Another Great Story

THE DAILY NEWS READERS HAVE ANOTHER TREAT IN STORE FOR THEM

The News has received so many letters of appreciation from its readers for its enterprise and judgment in securing the serial rights of Captain Clive Wolley's great story, "The Tenderfoot's Wooing," that it has gone still further.

The News has secured the serial rights for
Louis Tracy's Great New Story

"The Pillar of Light"

and will start the story Next Week.

Louis Tracy is the greatest writer of fascinating adventure stories in England.—His plots are vigorous.—His characters are lifelike. There is not a dull paragraph. His stories are models of good English too. . . .

What The Pillar of Light Is

The "Pillar of Light" is a sea story of love and adventure. As you may guess the "Pillar of Light" is a lighthouse. The story concerns the romance of Stephen Brand the lighthouse keeper and man of mystery. It is a story of heroic deeds in many lands. It will hold you to the very last word and delight you all the time. In the end you will see the greater meaning of the title "The Pillar of Light. : : :

This story is exclusive in British Columbia to the Daily News and its readers. See that you get the story from the start by having your name entered on the Daily News books as a subscriber.

How to Handle Gasoline With Safety

AN ARTICLE OF PARTICULAR VALUE TO PRINCE RUPERT PEOPLE

Gasoline will generate 8,000 cubic feet of gas, which if ignited will expand 4,000 times this space, and one gallon of gasoline properly mixed with air, sixteen parts air to one of gasoline—and compressed has an explosive power of 83 2-3 pounds of dynamite.

Gasoline in itself is as harmless as water, and when properly confined, is not an explosive. The explosive resulting from gasoline is created by the exposure of gasoline to air. A gasoline vapor is heavier than air, so that when gasoline is exposed in a building, the vapor has a tendency to constantly drop, and to lie very close to the floor, under any obstruction, or in corners, settling in the lowest point possible, remaining there until a current of air strong enough removes it.

Gas from gasoline being heavier than air is no doubt the cause of the recent disastrous fire in the Winnipeg garage. While it cannot be authentically stated, it is believed that because of the gasoline being transferred inside the garage in open buckets, and the atmospheric conditions being most favorable to gasoline forming a vapor quickly, the entire lower strata of air in the garage became permeated with gaseous vapor, and one of the horses which had been driven to the garage, striking its shoe on the cement floor, made a spark, which ignited quickly the gaseous vapors, causing immense property loss of over \$250,000.

Gasoline, as well as other volatile liquids, should be stored underground, in a well-made tank designed for the purpose. The tank should be so constructed as to prevent evaporation, and all flanges or openings should be on the top. Under no consideration should there be openings on the side or bottom of the tank, which would in any way permit the liquid to flow from the tank by means of gravity. The quantity of gasoline which is stored should regulate the thickness of steel of which the tank is constructed. Naturally, a large storage tank, say about 1,500 or 2,000 gallons, should be manufactured of 3-16 inch to 1-4 inch plate, thus eliminating any possible chance of the weight of the tank itself causing it to buckle, and thus spring a leak.

Gasoline, if maintained at a low uniform temperature, not only retains its quality, but the possibility of evaporation is reduced to the minimum. Gasoline tanks should never be placed in vaults or pits, as they simply provide a hiding place for the gasoline vapors which may result from leakage or accident, and the tank buried in the ground, simply covered by the earth, has never been known to explode if properly vented. While it is conceded that the only method of storing gasoline is in underground tanks, it is absolutely vital to the success of handling this liquid with the minimum amount of danger to have them properly vented. The vent pipe from the tank should extend at least sixteen feet above the top of the tank. This will insure no evaporation, inasmuch as gas will never rise sixteen feet unless under pressure. The vent pipe should be protected by a fine wire gauze mesh, and where the vent pipe enters the flange on the tank, another wire gauze should be provided, so that if the walls of the building fall, and the vent pipe be broken, there is no possible chance of the gasoline in the tank becoming ignited. Fine wire gauze mesh is used for the same reason

that it is used on the miner's safety lamp.

There are several methods of drawing gasoline from the tank, but that which is the most commonly used, and which seems to be the most successful, is by means of an approved self-measuring pump, which should be located higher than the tank. All pipe lines for suction or vent should be made absolutely tight by cement which is not affected by the action of gasoline. No point in the suction line must ever be below the top of the tank, as it is necessary to guard against any accident that may happen to the pipe line in case of fire, and, as a result, the gasoline be forced into the building by gravity.

Gasoline, or any other inflammable liquids, should never be handled by pressure system, as such an arrangement does not permit the control of the gasoline, for if the discharge line becomes broken, the liquid will automatically discharge itself into the building, and, as a result, is very dangerous, especially in case of fire, as it will help to increase same. If a pump is used to draw the liquid from the tank, it is obvious that then the operator ceases the operation of the pump, the flow of the liquid stops immediately, and there can be no further disturbance of the liquid in the storage tank without the operator again working the pump.

While the use and application of gasoline is continually broadening in various ways, it is now principally used in automobile garages, paint oil stores, and what is commonly known as the dry-cleaning establishments.

In addition to the safe storage of gasoline in garages, there is another grave hazard which confronts the fire department of every city,—i. e., what is known as the dry-cleaning establishment. It is not an uncommon thing for gasoline to be stored in these places in common open tubs, and frequently in a room where there is an open fire. Stringent by-laws should be passed by all municipalities, which will compel this class of business to either herdle the naphtha by the modern method, or to be compelled to discontinue business at once, for this method of handling gasoline in dry-cleaning establishments is no longer necessary. There are mechanical devices to be had, which will reduce the danger in dry-cleaning establishments equally as much as now provided for garages, as mentioned above. Modern naphtha storage and control equipments can be had at a minimum cost, which will enable the dry-cleaners to use their gasoline over and over, if desired, and yet store it with safety.

The modern methods of oil storage should receive most serious in the handling of paint oils, such as raw, boiled, turpentine, etc., in hardware stores. It is well known that waste or saw-dust, saturated with linseed oil, will take fire spontaneously in a temperature of about 70 degrees. Now, while these oils may be considered inflammable, they can be safely stored in above-ground tanks, provided they are substantially built, and evaporation proof, and there is to be had a modern system which will eliminate this hazard in hardware stores, factories and mills, not only reducing the hazard to the minimum, but effecting a great saving in room, and being otherwise of value to the user.

Insurance companies are both to give reductions in insurance where any appliance is installed, unless there is absolutely no question as to the merit of the equipment. If insurance companies do recognize a system, it should certainly be an evidence of its worth. The board of underwriters throughout Canada have not only acknowledged the value of modern systems of oil and gasoline storage, but are giving material reductions in rates, wherever these systems are installed, not only in public and private garages, but in hard-

"THE DEVIL'S HORSE"

Just off the main road from London to Cambridge, between Ware and Puckeridge, is a straggling hamlet called Standon Green End. Here in the middle of a meadow, says "Cycling," stands a remarkable monument, known as the Balloon Stone. Under a hinged metal flap is a bronze plate bearing an inscription chronicling the first balloon ascent. Lunardi's ascent created a tremendous sensation, all London turning out to witness his departure into the upper atmosphere. His sole companions were a dog, a cat, and a pigeon. When he was nearing the earth in the field where the Balloon Stone stands, five laborers declined to take hold of his mooring ropes, and swearing they would have nothing to do with the "devil's horse," took to their heels. But for the plucky conduct of a young servant girl from an adjoining farm-house, who seized the ropes and summoned assistance, the pioneer balloonist would not have effected a landing.

ALL THE DIFFERENCE

"Patience, my dear patience!" reproved Mr. Bounce complacently. "I'm quite sure Jim didn't mean to upset his cup of tea, and it will be easy to get out a fresh table-cloth. Accidents will happen, you know, in the best regulated families—mind your glass, Willie—and it's no good crying over—Careful, Willie! I always think—"

THE WAY OF A REFORMER

He was one of those sad-faced men who delight in becoming railway-carriage bores, and when he saw a happy-looking stranger smoking contentedly near by he felt compelled to ask a few questions.

IT WAS CURIOUS

"Come in." The door opened to admit a shabby-looking individual, the shine on whose coat would have done credit to the hardest-working shoemaker.

GOOD IDEA

Jones was at the theatre, and behind him sat a lady with a child on her lap, which was crying unceasingly.

BARS "OFFICE BOY" LAWYERS

Chicago Judge Says He is Tired of Hearing Motions from Attorney's Clerks.

Half a dozen budding lawyers

lost several pounds of dignity when Judge Landis, of Chicago, waved them aside and announced that he was through with listening to "office boys' present motions.

"I am tired of giving up the time of this court to office boys who don't know that they are talking about," said the judge. "It is not fair. There is not another judge in town that is imposed on by the lawyers as I am, and I am going to put an end to it."

"If the practice can't be stopped any other way, I shall rule that none but a qualified lawyer can present any matter to this court."

F. G. Dawson, Returning Officer at the recent election, is very busy today making the final count of the votes. The official result will be announced shortly.

ITEMS OF SPORT

Lynn has reserved two former Nutmeg league pitchers. Freddie Reiger and Red Waller, the latter jumping the team after a short stay. Ivor Swanson is not on the reserve list. It is thus evident that Bridgeport only loaned Swanson to Lynn to finish out the season and that Gene McCann banks on using him again next year.

Unofficial batting averages in the New York State league for the season just closed rank Chic Hartley, the former Holyoker, who played the outfield for Albany as the third best sticker in the circuit, with a mark of .325. Jack Deal, with Syracuse, hit for .276, and Pete Noonan, with Wilkesbarre, hit for .235.

The Haverhill club has reserved Third Baseman Ray Campbell, the former Pony, for next season. Haverhill turned Campbell over to Albany in the closing days of the season and claims title to him because of the failure of Albany to pay for him as agreed.

Frank Connaughton, leader of the Waterbury pennant winners in 1910, and who led the Brockton club the past season, is mentioned as one of the strongest candidates for the job as manager of the New Bedford club next season.

Vancouver ball club's reserve list is as follows: Catchers—Carl Lewis, John Shea, Jack Sorenson; Pitchers—George Engle, Gayle Jervis, Roy Willett, V. H. Belford, George Rustemeyer, Eli Cates, L. E. Gervais, James F. Clark, O. L. McQuary, Gus Thompson, W. C. Theile, J. R. Buckles, Joe Coolins, J. C. Morelands, N. L. Seidel; Infielders—J. T. Bennett, Harry Scharnweber, R. E. James, N. S. Brashear, A. W. Merkle; Outfielders—Emil Frisk, Charles Swain, S. S. Flanagan and Ed. Kippert.

George Robey, a comedian, is resting on his laurels after having sent Champion Jack Johnson sprawling to the mat in a bout in the Palladium. Robey swang twice to Johnson's jaw before the champion could counter. After Johnson had picked himself up he knocked Robey into the arms of the timekeeper with a volley of rights and lefts, and then picked his adversary up and carried him off the stage. Robey had challenged Johnson to a bout.

The first ball game between the east cell house and the west cell house teams at the Atlanta federal prison was played yesterday. The silence rule was lifted and the bleachers roared as though a world's championship were at stake. Behind the players, in front of them, on either side of them, stretched long grey walls, but the men on the sward kept their eyes on the ball. The west cell house team won, 12 to 7.

The "come back" aspirations of Oscar Battling Nelson, former lightweight champion, are crushed as the result of a severe beating he received at the hands of Young Saylor, a rising scrapper from Indianapolis. Saylor won decisively in twelve rounds, having the better of every round, and was given the decision. Nelson took one of the worst beatings of his long career.

"LOOKS YOUNGER"
How to Make the Most of the North Room

Should be papered either in pink or a sunny yellow. White paint and enamel adds greatly to the brightness and should be used generously. Very thin curtains, of net preferably, are best. Use as many mirrors as possible. These give the best results when hung rather low. An open fireplace is a boon in any room, but most especially in a dark one. A number of growing and flowering plants scattered about the room add to the cheerful atmosphere.

Miss Mary A. Srively, the president of the Canadian National associations of trained nurses who is now on a visit to England, has received a huge compliment from the British Journal of Nursing. It is hoped that she will attend the international meeting to be held at Cologne next year.

"It is with pleasure that we note how young and bright the late lady superintendent of the General Hospital, Toronto, looks after a year's rest from official life," says the paper named.

PRETTY COMPLIMENT TO LEADING CANADIAN NURSE

Miss Mary A. Srively, the president of the Canadian National associations of trained nurses who is now on a visit to England, has received a huge compliment from the British Journal of Nursing. It is hoped that she will attend the international meeting to be held at Cologne next year. "It is with pleasure that we note how young and bright the late lady superintendent of the General Hospital, Toronto, looks after a year's rest from official life," says the paper named.

= THE COSY CORNER = DEVOTED PRINCIPALLY TO THE INTERESTS OF WOMEN

This is a little section of the paper, which from day to day will be devoted to subjects of special interest to women. Any and all of the ladies of Prince Rupert are invited to contribute to its columns, and to take part in its discussions. Suggestions and criticisms are invited by the editor. The hope is expressed that "The Cosy Corner" will fill a social need.

MANICURE SECRETS Notes on the Care of the Nails for Pretty Fingered Girls

You may possess a whole case full of pretty things and yet not know how to make your nails behave themselves. To soften the cuticle hold the fingers in a bowl of hot water and soap suds to which a few drops of almond oil have been added. Then cut the nails round or oval and sandpaper the edges. Push back the cuticle till the half-moon at the bottom shows. Use an orange stick for this, never a metal instrument, and don't be too strenuous about it or you will make your hands very sore.

Then apply the red salve, dust with powder, and polish, repeating the process if you have time. Wash the hands in warm water and wipe the nails by pushing back the cuticle with a towel. Last of all, polish with a buffer that has not been dipped in powder.

White spots on the nails are caused by bruises or insufficient nourishment. Cover them at night with a paste made of equal parts of myrrh and turpentine. In the morning rub with olive oil to remove the application.

A sure and easy method for cleaning the finger nails is to make a paste of powdered borax and lemon juice. Rub this on and under the nails and leave for a few minutes, then scrub with soft brush dipped in warm suds. Where the nails have been discolored by handling fruits, vegetables or simply need a good cleaning this simple method will make them clear and white.

Brittle nails require copious applications of fats. Cover the finger tips at night with vaseline or cold cream and always wipe

WINDOW BOXES OF BRASS AND COPPER ARE BRIGHT AND EFFECTIVE. Cretonne coverings in gay colors and designs are recommended.

QUEEN COLLECTS MASCOTS Royal Heart of Alexandra Beats Warmly for Dumb Creatures

Queen Alexandra has always collected mascots. One afternoon lately she was paying a call in Belgravia, and, quite unobserved, a black kitten of a most plebeian order climbed up the back of her Majesty's chair and, arriving at the top began to play with her widow's veil. The hostess got up quickly to remove the cheeky intruder, but Queen Alexandra asked to whom the kitten belonged, when it transpired that it was a stray one. Her Majesty requested to be permitted to take it home, and she did. Queen Alexandra has a solemn old owl at Sandringham, which she regards as a mascot. Her friends, knowing this, have from time to time given her numbers of ornaments representing owls, and now she has a table which is devoted to the collection.

FOR WILFUL WIVES No "Obey" in This Marriage Service

Boston, Mass., Oct. 14.—Members of the Boston suffragette organization have declared in favor of a new marriage service, as drawn up by Miss Alice Store Blackwell, leading exponent of "voes for women" in this city. The service is as follows: "I take thee as my wedded husband, to have and to hold, etc., in sickness and in health, to love, honor and cherish, till death

You Can Buy Diamonds ...BY MAIL...

You may purchase through our mail service the finest diamonds for us to secure in Europe.

We import direct from Amsterdam and Antwerp, yearly, more diamonds than any other firm in Canada. This enables us to give our patrons choice and the advantage of importers' prices.

Write us for information re our lines of diamond engagement rings, brooches, etc.

them over with a little of either after washing the hands.

Grape Jelly
Select the grapes when not fully ripe. Wash and drain, then put them into a preserving kettle; mash well and heat till the skins are broken and the juice flows freely. Strain and use the juice only with an equal weight of sugar.

HOUSEHOLD HINTS
Grease on a wall can generally be eradicated by covering with clean blotting paper, and then passing a warm iron over it.

It is sometimes difficult to understand how clothes come from the wash spotted with iron-rust. This may be caused by the chemical action of a bluing that contains iron, with the soap suds. There are two ways to prevent it—thorough rinsing and another brand of bluing. If you want a watertight vessel in which to wash dishcloths, napkins or any small articles of clothing, fold a cloth and lay it over a drain pipe of the sink and turn a saucer upside down over the cloth. This will make an ideal wash basin to use instead of a bucket or par.

COAL NOTICE

Skeena Land District—District of Queen Charlotte Islands
Take notice that Austin M. Brown of Prince Rupert, saddler, intends to apply to the Chief Commissioner of Lands and Works for a licence to prospect for coal, oil and petroleum on and under the following described lands on the West Coast of Graham Island:
