HITLER ANNOUNCES NEW GERMAN POLICY

German Signature Is Withdrawn From Pact Of Versailles, He Says

Military Sovereignty of His Country Affects No Other Nation—States Case on Colonial Question

BERLIN, Jan. 30: (CP)—Chancellor Adolf Hitler, inaugurating another four years of Nazi rule, having now been in the saddle for four years, today "withdrew" Germany's signature from the Versailles peace treaty in which the "Reich" was declared guilty of launching the world war. Asserting that Germany's resumption of military sovereignty was a matter affecting only the Reich, the Chancellor told the Reichstag: "We have taken nothing from any nation—nor have we done any nation wrong."
Hitler reiterated Germany's claim for restoration of her former colonies and left the door open for "arrangement" with Portugal although saying nothing about the expected acquisition of Angola in Africa on a long term lease.
The chancellor said: "Germany makes no colonial demands upon

Capt. A. Innes-Taylor Speaker Last Night Before Overflow Dinner Gathering of Women's Canadian Club

Speaking before an intensely interested overflow dinner meeting of the Women's Canadian Club in the Boston Cafe last evening, Capt. A. Innes-Taylor of Vancouver gave a graphic account of the 1933-35 Antarctic expedition of Rear-Admiral Richard E. Byrd of which he was a member. The story of this great and hazardous adventure in the world's most remote and least known continent consisting of five million square miles of rock, ice and snow where no man lives and but one variety of animal life resides the year around was, undoubtedly, one of the most fascinating which has ever been told before a local audience. Capt. Innes-Taylor spoke for nearly an hour, practically entirely in a narrative and descriptive way, but so capt were his listeners in what he had to say that probably all would have welcomed the opportunity to tarry longer and hear more. Miss Lillian Halliwell, president of the Women's Canadian Club, was in the chair and fittingly introduced the speaker.
The Antarctic regions, Capt. Innes-Taylor pointed out, were more remote from civilization than the Arctic with which all Canadians were more or less familiar. The climate of the Antarctic was much more severe than was the Arctic. After briefly describing some of the earlier South Polar expeditions including those of Amundsen and Scott in 1910, both of which were successful in reaching the Pole, Scott and his party having, however, perished, Capt. Innes-Taylor told how the Byrd expedition had been conceived in 1928 when Amundsen and Byrd met at Spitzbergen in the course of Arctic exploration activities. The first Byrd Antarctic expedition had been undertaken in 1928 and had proven a success. It was the intention of the speaker, however, to

FIGHTING OF FLOOD

Armies Engaged in Reinforcing Levees and Battling Disease—Death Toll Higher

PADUCAH, Ky., Jan. 30: (CP)—With the crest of flood waters from the falling Ohio River still hovering above this city and with rain and snow forecast, a pick and shovel army of one hundred thousand has been toiling to fortify the billion dollar levee system that guards rich cotton delta lands along the Mississippi River. Every levee was holding today and United States Army engineers predicted that they would continue to hold barring the unexpected. Levee reinforcements have been bolstered by raising the breastworks on both sides of the river and the zero hour is now awaited. This will be when the crest of the flood from the Ohio sweeps past Cairo, Illinois, the confluence of the two great streams, on its rush down the Mississippi to the Gulf. Possibly this will be next Wednesday. The retreat beyond reach of the insatiable enemy quickens as the tireless army is spurred on in defence of the southlands cotton belt.
Health hazards are mounting. One in ten of the refugees are suffering either from influenza or pneumonia. Weary physicians are redoubling their efforts in the needling of typhoid and other vaccines into thousands who have volunteered for treatment in the fight against plague.
The death list is now placed at around 400 with over a million homeless.
At Memphis, Tennessee, slight earth tremors injected a new and fearsome element into the flood fight but hasty inspection by engineers indicated the earth in the dykes was not breached by the vibration.

WINTER IS VERY HARD

Heavy Snows and Low Temperatures Experienced in All Parts of British Columbia

Word has been received in the city of a three foot fall of snow in forty-eight hours in the Prince George district last week-end. As a result highway traffic to Quesnell was completely blocked.
From other parts of the interior also come reports of extremely severe weather with heavy snow-falls and temperatures going below the forty below zero mark.
On Thursday morning it was 44 below zero at Smithers. People arriving here that night from the interior town thought it was quite balmy in Prince Rupert although local people were shivering with no more than twenty degrees of frost.
There has also been much snow and frost around Vancouver and highway traffic thereabouts has been interfered with to a great extent.

DEAN OF COMMONS IS DEAD

Hon. Charles Marcell Passes Away In Ottawa—Unique Record

OTTAWA, Jan. 30: (CP)—Dean of the House of Commons, to which he was first elected in 1900, Hon. Charles Marcell, aged 76, died last night after being in bed for several weeks with a heart ailment. He held a unique record in Canadian politics. He sat for the same riding, Bonaventure, for nearly 40 years, without a break. Gifted as a writer and a persuasive speaker, his career was full and varied.

Important Changes In International Fishing Regulations Are Made

Fish Caught Incidentally During Close Season May Be Kept—Closing Date For Clearing Instead Of Fishing to be Set

OTTAWA, Jan. 30: (CP)—A new halibut fishing convention between Canada and the United States replacing that of 1930 affecting the North Pacific Ocean and the Bering Sea and designed to improve methods of administration in connection with aspects found unsatisfactory by the International Fisheries Commission was signed yesterday by Prime Minister W. L. Mackenzie King and Hon. Norman Armour, United States minister to Canada.
The new convention proposes that any halibut caught incidentally during close season by men fishing for other species may be retained by the fishermen.
Other principle changes specify that, instead of the Commission fixing the date each year after which halibut fishing shall be prohibited in certain areas, it shall fix the date for the last departure from port of fishing vessels for halibut fishing areas.
It is expected the new convention will be submitted during the present session for Parliamentary approval.

were described such as laying down of food bases and the preliminaries for the trips which would later be made inland to the polar wastes. Night commenced on April 17 and darkness prevailed with no sunlight again until August 17. Intense cold as low as 72½ degrees below zero prevailed and all lived under the ice and snow with tunnels connecting the various parts of the camp. To keep up the morale work had been found the most effective means. There were also recreations such as moving pictures, reading, cards and other diversions. Great was the rejoicing when the sun came up. Then the real work of the expedition commenced.

Three principal means of transport were used in the dashes for the polar regions—sledge dogs, tractors and airplanes. The coordination of these was a matter of great importance, requiring precision and care. Capt. Innes-Taylor described more or less cursorily the accomplishments of the expedition in obtaining practical knowledge and scientific data as to the remote southern continent. Among other things great coal areas and deposits of copper and silver had been checked upon. Meteorological, geological, geographical, radio, cosmic ray and other conditions had been studied and much valuable information obtained.

Of outstanding interest was Capt. Innes-Taylor's description of the limited natural life of Antarctica. The Emperor penguins were the only creatures that made their home all the year around there. They bred their young in the dead of winter. They had no nests but hatched their eggs by holding them under their wings. Their enemies were the seals. When the penguins went to the edge of the ice to fish, they were very careful. They would shove one of their number into the water. If he got along all right and was not attacked by seals, they would all go in to fish. If, however, he should encounter a seal, those on the bank would move off and leave him to his fate. Then there were the smaller type of penguin which came in the summer from the Antarctic islands. They were most amusing creatures. Their mode of courting was for the male to bring along a pebble and drop it in front of the female. If the latter picked it up, they mated. If she did not, then the male picked it up himself again and went along to try someone else. These small penguins were very keen to have young. Those which did not have any would fight with those that did for possession of the young. The result was that sometimes the young died because the adults were so busy in fighting over who should possess and care for them.

Value of Expeditions
"I am not interested," declared Capt. Innes-Taylor in conclusion, "in the commercial value of the Antarctic. It, undoubtedly, has a value but not immediate. To me, it seems, if these expeditions do nothing more than show that

Children's Story Hour For Little Folk Held Today

The little Children were fittingly entertained this morning at the story hour by Mrs. R. Cameron, Mrs. S. D. Johnston and Mrs. P. H. Linzey. They pleased the audience with the ever popular stories of "Jack and the Beanstalk," "Little Half Chick," "Teeny Tiny," "Rumpelstiltskin," "Mother Hulda" and the request tale of "The Three Bears." Variety was introduced by an action song.

Next week the program for children between the ages of 9 and 12 will be in charge of Mrs. F. E. Robertson, Winnie Cameron and Mrs. W. L. Stamford. As an added feature John Moran of Green Island Lighthouse, an author of many splendid stories for children, will be a guest story teller.

The speaker repeated the motto which had been found at the cairn in Antarctica in honor of Scott, the British explorer—"to strive, to seek, to find but not to yield."

Mrs. A. E. Parlow proposed a vote of thanks to Capt. Innes-Taylor. This was carried with enthusiasm.
Mrs. J. A. Hinton presided at the piano to accompany "O Canada" at opening and "God Save the King" at closing.

Boys' Club Off To Good Start

Encouraging Reports Are Received At Monthly Meeting

At the monthly meeting of the supervisors of the Boys' Club on Thursday evening a very encouraging report was given. Canvassers covering less than one-quarter of the city have raised \$31.28. If the response in the rest of the city is as good, the work can be carried on. The attendance aggregated 258 which averages almost 12 boys per night.

Expenditures for this month covered coal, a more serviceable stove, shuffleboard and ping-pong, also a large game of donkey.

More chairs, small tables, boxing gloves, games, etc. are badly needed.

Two new supervisors have joined. Just three more will complete the quota.

Musketeers And Ramblers in Tie

Musketeers and Ramblers drew out into a tie for the leadership of the Prince Rupert Bridge League standing last night by defeating Prince Rupert Dairy and Canadian National Recreation Association by scores of 7 to 2 in each case. Grotto, who had been leading, and Sons of Norway, who had been tied for second place with the Musketeers and Ramblers, were left behind when their game was postponed. In the other fixture of the evening Canadian Legion defeated Brakman & Ker 5 to 4.

ASK YOUR DOCTOR THIS

Ask Him Before Giving Your Child an Unknown Remedy

Practically any doctor you ask will warn: "Don't give your child unknown remedies without asking your doctor first."

When it comes to the widely used children's remedy—"milk of magnesia," the standard of the world is established. For over half a century many doctors have said "PHILLIPS' Milk of Magnesia." Safe for children. No other is "quite like it."

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Now also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia."

ALSO IN TABLET FORM: Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Here's Simple Way to Curb a Cold

Two "ASPIRIN" Tablets—A Full Glass of Water—That's All

The modern way to curb a cold is this: Two "Aspirin" tablets the moment you feel a cold coming on. Then repeat, if necessary, according to instructions in the box.

At the same time, if you have a sore throat, crush and dissolve three "Aspirin" tablets in one-third glass of water. And gargle with this mixture twice. The "Aspirin" you take internally will act to combat fever, cold pains and the cold itself. The gargle will act as a medicinal gargle to provide almost instant relief from rawness and pain. It is really marvelous; for it acts like a local anesthetic on the irritated membrane of your throat.

Try this way. Your doctor, we know, will endorse it. For it is quick, effective and ends the taking of strong medicines for a cold.

• "Aspirin" tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

PRE-EMPTIONS

VACANT, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement.

Full information concerning Pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C.; Bureau of Provincial Information, Victoria, or any Government Agent.

Records will be granted covering only land suitable for agricultural purposes within reasonable distance of road, school and marketing facilities and which is not timberland, i.e., carrying over 5,000 board feet per acre east of the Coast Range and 8,000 feet per acre west of that range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, on printed forms obtained from the Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

Pre-emption carrying part time conditions of occupation are also granted.

PURCHASE OR LEASE

Applications are received for purchase of vacant and unreserved Crown lands not being timberland, for agricultural purposes. Minimum price of first-class (arable) land is \$5 per acre, and second-class (grazing) land, \$2.50 per acre. Further information is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

As a partial relief measure, reverted lands may be acquired by purchase in ten equal instalments, with the first payment suspended for two years, provided taxes are paid when due and improvements are made during the first two years of not less than 10% of the appraised value.

Mill, factory or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

Unsurveyed areas, not exceeding 30 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtained after residence and improvement conditions are fulfilled and land has been surveyed.

For grazing and industrial purposes areas not exceeding 60 acres may be leased by one person or a company.

Under the Grazing Act the Province is divided into grazing districts and the range administered under grazing regulations amended from time to time to meet varying conditions. Annual grazing permits are issued based on certain monthly rates per head of stock. Priority in grazing privileges is given to resident stock owners. Stock-owners may form associations for range management. Free or partially free permits available for settlers, campers and travelers, up to ten head.

Nothing to Get Excited About in Offer To Purchase Dogfish—Coastal Purser in Serious Condition Following Accident

The Prince Rupert Fisheries Experimental Station posted notices along the waterfront this week offering to pay 35c per fish for the first twenty-five dogfish caught in the harbor. There need be no excitement in the marine community over this, however. Dogfish are not being wanted for any new or extraordinary purpose. Nor has any new market been developed. The fish are required for the use of Dr. Pugsley of the scientific staff of the station in connection with his return south over the same route.

The condition of Norman A. McLean, pursuer of the steamer Prince John, who is in hospital in Vancouver suffering from severe fractures sustained in a fall from the wharf at Queen Charlotte City while his ship was there two weeks ago, is reported to be quite serious. According to word received yesterday from Vancouver, he has developed pneumonia.

Albert Farrow, steamboat inspector, after having been here for a couple of weeks conducting annual inspection of the steamer Prince George, which is now being given overhaul in the local dry dock, sailed by the Prince Rupert Thursday night on his return to Vancouver.

Taking the run of the steamer Cardena which has been withdrawn from service for annual overhaul at Vancouver, Union steamer Venture, Capt. J. E. Boden, arrived in port at 2 o'clock this morning from the south and sailed a couple of hours later on

C. P. R. steamer Princess Adelaide, Capt. S. K. Gray, returned at 6 o'clock this morning from Ketchikan and sailed at 9 a.m. for Vancouver and waypoints. The Princess Adelaide was in port at the same time as the Princess Norah which was in northbound from 7:45 to 9 a.m. During the stay of the two ships, Alaskans were much in evidence about town. Those going north made considerable purchases of fresh fruits and greenstuffs in local stores to take home in view of the scarcity there of produce on account of the strike tie-up of American ships. There were 160 passengers aboard the Princess Adelaide.

Making her first call here in several weeks, the Ketchikan motor vessel Bellingham was in port yesterday afternoon with eight carloads of frozen fish for transshipment east over Canadian National Railways.
