"I never dreamed electric cooking could be so FAST"

Many women think of electric cooking as slow, yet a modern electric oven heats to baking heat in a very few minutes. And, what's more, electricity KEEPS the oven at exactly the temperature you want for as long as you want it. Take bread-making, for instance . . . many recipes say to bake bread for 15 minutes at 425°, then 45 minutes at 375°. An automatic electric range can do that for you. All you need to do is put your pans of dough in the oven, set the controls and forget you are baking! Your electric range NEVER forgets. And that's only one advantage of electric cooking. A very important feature is economy . . . by actual test you can cook with electricity for less than half-a-cent per meal per person. Let us tell you more about electric cooking.

you bake at home with an ELECTRIC RANGE - we can install one in your kitchen NOW on easy terms.
