## QUEBEC STILL LIBERAL

Correspondents from the East intimate that Quebec, which turned out a Liberal Government a few years ago and elected Premier Maurice Duplessis with a good following, is again turning to Liberalism as its natural political faith. A few days ago a convention was held in that province to reorganize the former Young Liberal party known there as "Action Liberale Nationale." ## PLUM NOT RIPE

Evidently the Hankow plum which the Japanese planned to pick was not quite ripe. The big push succeeded up to a certain point and there it met with such severe obstacles that no one can tell what will happen. The Chinese seem to be masters of strategy and a few losses do not mean much. When guns fail the Chinese use water. They pierce the dikes and flood the country. That seems to be part of their strategy just now.
