# FIRST SNOW OF SEASON

Mount Morse is White Capped Today as Real Touch of Winter is Felt Throughout District

When low clouds which have been obscuring the mountains hereabouts lifted this morning, it was seen that the first snow of the season had fallen on Mount Morse, being fairly well down below the top of the mountain. On the higher levels hereabouts, the rains of the last few days have evidently taken the form of snow. The air is becoming definitely chilly and there is the first real hint of winter.

The Government Telegraphs daily weather report this morning showed snow at Burns Lake with the thermometer there and at Smithers hovering just above freezing point. Throughout the district there is heavy rain.

### McCAFFERY'S LOGIC

The address of M. P. McCaffery to the Chamber of Commerce the other evening was unanswerable logic, clear as crystal. He said in effect. The government is buying the wheat from the farmers at a fancy price, therefore they own it. The government owns the railway and is anx ious to make it pay. The government owns the Prince Rupert elevator and presumably would like to make it pay It would be a simple thing for the government to route some of its wheat to Prince Rupert over its own road and put it in its own elevator, especially at a time when the elevators are glutted in Vancouver and the government is paying five cents a bushel extra to carry the grain east.

The government is sending some of its wheat to For Churchill where it must remain all winter whether it i wanted elsewhere or not. Prince Rupert has a harbor that is open all the year round and wheat can be shipped from i

at any time. If Prince Rupert is to be continually ignored and slighted and handicapped as it has been in the past, i might be a good thing to consider whether it would be good thing to ask Alaska to enlarge the Panhandle so as to include this city. Were this done, we should get action Johnson with a view to improving the port. As it is we can't have P. Dickens a road, we can't have a port, we can't have anything that really counts.

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmfu poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely.
