It is to be expected that he will be re-! moved as recommended by the Commission.

Apart from the personal aspects of the Commission's report, some important recommendations as to penitentiary administration in the country are made by the Commission. Some of these deal with the form of administration while one of the most interesting is that which; advocates the centralization of all penal institutions under federal control. With handling of crime generally a federal matter, this would appear to be a logical step to take and one which will probably be implemented. would relieve the provinces of a responsibility and expense which naturally should be in federal hands.

ABERHART SLAPPED AGAIN

Two acts of the Alberta Legislature—that is, of the Aberhart government-have been disallowed by the federal government. Outside of the province of Alberta, the two measures-the Home Owners' Security Act and the Securities Tax Act-are of little significance. Nevertheless, the disallowance of more Aberhart legislation by the federal authority is of general interest.

From a political standpoint, it is difficult to say Chicago whether this federal disallowance will hurt or help the Al- st. Louis berta Premier when he goes to the people.
