LONDON, October 6: (CP)-The British Admiralty, commenting today on a German statement that the United States liner Iroquois might be sunk, said it was surprising that an officer of the former Imperial German Navy like Admiral Raeder should "bemean his uniform by lending himself to such baseness." The Admiralty asserted that the suggestion" enables us once more to realize and measure the criminal mentality of Nazi party leaders." The suggestion emanating from Germany and conveyed in a message sent to the United States that Great Britain intended to sink the Iroquois and blame it on Germany, as Germany still insists was what happened in the Athenia sinking, was so absurd as not to be worthy of reply.

Meantime in Washington it was reported that United States Navy coastguard craft had moved to guard the Iroquois after President Roosevelt disclosed receipt of the startling report that the refugee-laden ship, with at least five hundred Americans on board, was to be sunk. The tip came from the head of the German navy but left unanswered how, why and by whom the sinking was going to be done. Likewise it offered no information as to now the Reich acquired the information.

The Iroquois is now on the ocean enroute to New York.

### SPEECH BEING EXAMINED

LONDON, October 6: (CP)- Chancellor Hitler's peace terms, as conveyed in his Reichstag speech today, will be carefully and unhurriedly examined by the British government in conjunction with France and Poland but observers here give them an extremely remote chance of acceptancc. A government statement added: "But it is necessary to remember two things- first, no peace proposal is likely to be accepted which does not effectively free Europe from the menace; second, something more than mere words will be required to establish confidence" in any German proposals. It was noted that the proposals did not include any suggestion of reparations for wrongs done by Germany to other peoples. The average opinion on the street here is still that Hitler's word is not to be trusted and that the war must be carried on until Hitlerism and international uncertainty is removed. That appears to be also the general view in France.

# IMPORTANCE

The following were material pbinses of the speech, delivered before the German Reichstag today by Chancellor Adolf Hitler:

1. Renunciation of further territorial claims except for old colonial demands.

2 Declaration that Germany and Russia together would "relieve one of the acutest danger spots in Europe" by working for an Eastern peace zone.

3. Specific assurance to the world that he had no designs on the Roumanian Ukraine or the Urals of Denmark and the expression that in Eastern Europe generally and Scandinavia his interests are wholly economic.

4. Declaration that one of Germany's tasks in dealing with fallen Poland was "establishment of a new order of ethnographic conditions-that is to say resettlement of nationalities-and the further declaration that it was a
