#### PATTULLO POLICY

Various organizations have at different times laid yards, in one hour. down a war time policy. They have decided to ask those in authority at the time not to conscript men unless they at the same time conscript wealth. That is not exectly the policy suggested by Premier Pattullo of British Columbia. His is not a negative policy. It is positive. He thinks! that Canada should conscript all man power and all wealth men and dollars. That ought to be radical enough for anyone.

When we talk of conscripting all man power we do not mean that every man will be sent to the theatre of war or even that every man will be in uniform. It means that the nation will decide what it wishes each man to do. Those best fitted for aviators will be trained for the air. Those who are skilled mechanics will be given mechanical work. Those needed to carry on the work of the nation will do so. The main thing is to place every man where he can best serve his country.

#### MUST PAY COST

It was announced yesterday that Canada was being chicago asked to pay the cost of her share in the war in the form Brookly of increased taxes. Those Paying on set incomes now will New Y pay a heavier income tax running up to as high as half Boston their income for those in the higher figures. People who Philadelphia use coffee, tea, tobacco, wines or spirits will pay indirectly. Everyone will pay something directly or indirectly and many both. The taxes look like just ones.

#### LO.D.E. ACTIVITY

The Imperial Order, Daughters of the Empire, has been asked to help provide winter clothing for the children being moved from London and other danger centres into the country in Great Britain. It is a meritorious work. The children are being subjected to great hard-ships through no fault of their own. British people in the Seattle Cinches country are taking care of them but it is too much to ask that they also provide clothing. It is a cause that will ap- Lead In Pacific peal strongly to women of this city.
