- If you are a merchant, jobber, wholesaler or other dealer receiving ration coupons from your customers, your bank stands ready to show you how to deposit or otherwise deal with the coupons you receive. The same applies if you are a "quota-user."
- 2 It has nothing whatever to do with your regular bank account, in which you deposit dollars and draw cheques in dollars;
- 3 It is purely a relationship between dealers and commercial banks. Ration Banking begins only after the consumer has used his coupons to purchase rationed commodities.
- 4 The banks' job is mainly of an accounting nature -acting as an agent of the Ration Administration, Wartime Prices and Trade Board, under carefully defined regulations.
- 5 Ration Coupon Banking relieves the Ration Administration of the tremendous burden of handling, verifying and accounting for used coupons with which consumers have obtained their supplies.

6 If you are a consumer only, it in no way affects how much or how little of rationed commodities you receive. Banks do not issue ration coupons, nor do they have anything to do with the actual rationing of commodities.
