MOSCOW (? -- The Soviet magazine New Times said today that Premier Drew of Ontario openly called for war against the Soviet Union in a Toronto speech on March 10." The article said "first he began frightening his hearers with the statement that the Soviet was preparing to carry out no more and no lessthan an invasion of Canada. But right here he hastened to calm his audience with the statement that 'the huge army of Russia will be ineffective against overwhelming air forces and mobile

The article concluded: "But this new adventure plan, like its Hitlerite prototype, is also doom to failure." In his address in Toronto on March 9, not March 10, Drew actually said: "The bare, unvarnished truth is that unless Rusbody on his trip to Victoria and sian aggression is stopped we are the meetings with Premier Hart,] Ministers Anscomb, Carson and in the front line."

The Late "Dan" Matheson

We can join with expression of personal regret which many Prince Rupert people will feel at the passing of the late D. J. Matheson, for years city treasurer of Prince Rupert and the city's final commissioner during its period of receivership.

"Dan" Matheson will, perhaps, be best remembered for the geniality of his personality and his unfailing courtesy and consideration for all those with whom he came in contact and these, in the course of his official duties, were legion. He was also an able and discriminating financial official and administrator and gave this city good service for long years. He was a real pioneer of the province and it is interesting to recall that, back some forty years ago, he was mayor of the now dead city of Phoenix in the Boundary district when M. M. Stephens, now sheriff here, was city clerk. Thirty years later the position was reversed in Prince Rupert when Mr. Stephens was mayor and Mr. Matheson, city clerk.

that the good work is started by a rejuvenated body, it is to be hoped the organization will not be permitted to drop back into its old time lethargic ways.

Talking of Butter

The Prices and Trade Board raises the butter price ceiling on the one hand and now proposes to increase the weekly ration from four to six ounces. For some people the increased price will, of course, be no deterrent to buying. In other cases the increased cost will constrain people to economy in use. The increase in price will be generally accepted without protest since it is designed to give the farmer a better return which will encourage production. As for the four-cent increase in price, it will not be so great a hardship that we will not be able to reconcile ourselves, particularly when we reflect upon what it might be were there no price control.

TERRACE MILLS ARE IDLE NOW

Roads Soft with Spring Thaw So Logs Cannot be Hauled In

Commerce by the ecor Terrace sawmills have been velopment private commit largely in idleness since March the Canadian Chamber of 4 owing to the use of the roads merce for broadcasting being forbidden to hauling of local radio station. The heavy traffic such as logs during \$150 is offered in conthe soft season of the spring with the cost of broader thaw. It is expected the roads The matter was referred will be sufficiently dried up radio committee at las again by mid-April to make their hamber meeting use permissable again. Ooly one mill in the area has been able to Men, Women Par continue cutting, this being the Little, Haughland & Kerr plant Take Special Take Special Take boomed alongside the plant. Praised by Joch

Snow has disappeared right in Terrace but there is still considerable on the country roads.

Commerce Chamber Livens Up

The regular secretary was absent and so was the minute book and the official files but, nevertheless, the monthly meeting of the Prince Rupert Chamber of Commerce last night was a lively gathering in which views were fully and freely exchanged on a variety of matters of local moment. The Chamber of Commerce has been taking on a decidedly new lease of life of recent months, stepping out of its old staid ways in a manner that has not been seen for years, all of which is to the good. We can think of nothing more effective in promoting the development of the community than a good lively Chamber of Commerce and that is what Prince Rupert's is, at long last, developing into. Now

"Seductive Whore"

Consistency is the hobgoblin of little minds—with emphasis on the "little." In a recent issue of CCF News, an 8-sheet publication hailing from Toronto, appears a wild-eyed article insinuating that advertising is more subversive of the juvenile mind than "vivacious" movies. Exception is taken to an advertisement pointing out the merits of training a child to save his pennies in a piggy bank as a means of opening "the doors of opportunity for all little boys and girls."

Foaming at the mouth, the writer of the article describes this copy "as misleading as any piece of copy possibly could be." He concludes with the hysterical shriek-"Long live capitalism! Long live bank accounts, insurance policies and piggy banks! . . . Above all, long live that seductive, illusive whore, the Great Goddess Advertising!"

Imagine the mental and spiritual anguish of this writer when he discovered that the issue of CCF News carrying his phrenetic outburst permitted the seductive and illusive whore to parade in its chaste columns to the extent of 770 lines! He describes himself as "a former advertising hack." Why "former" and why "advertising?" -- Marketing.

covery impossible.

in Vancouver.

Mr. Matheson, who was about

72 years of age, was a pioneer

THE Town of Jasper, nestling in the heart of the Canadian Rockies, and long known Internationally as the home of Jasper Park Lodge, played a very important part in research and levelopment for the British War Office during World War II. Patricia Lake, at the foot of Pyramid Mountain was the scene of experiments conducted in great secrecy for operation "Habbakuk." This consisted of the manufacture of special ice blocks containing fibre for strength and the intention was to construct an ice ship for use in

the sea lanes of the Atlantic from which planes could operate against submarines. Picture No. 1 shows the scene of the experiment with Pyramid Mountain in the background. No. 2 shows the making of the ice blocks with large fans maintaining circulation. No. 3 shows the construction of the "Shell of Secrecy" surrounding the great secret. No. 4 shows the master drawing of what one of the ships would have looked like had the plan been completed.
