Accurate Reporting

Colored or exaggerated news reports designed to attract attention through their sensationalism often lead to protest and embarrassment. Fortunately, the Daily News and its staff had no part in an offending dispatch which appeared in the Vancouver Sun last week in regard to the Eventide Home fire although the factual and accurate Canadian Press dispatches emanating from this office were the ones which appeared in the papers of the country generally as well as forming the basis of the radio news broadcasts of the incident with most of which there was, apparently, no complaint. Making of accurate news reports is the constant care of all experienced newspaper editors but, even with the greatest of care, there are occasions when the imagination or enthusiasm of the ardent or careless reporter foils their vigilance. That has been the embarrassing experience of us all at times and it is bound to happen once in a while in best of regulated newspaper offices.

been questioned. From that aspect, during the years of war, it had all the breaks although it also had very great operating problems which were admirably met.

Conditions are rapidly changing, however, and it is to be hoped that, in its zeal for financial showings, the railway administration and management will not lose sight of the fact that it also has a purpose and a duty in the development of the country and its own assets and that it will not become "penny wise and pound foolish."

Campaign on National Basis

Heading the list of important projects sponsored by the Junior Chamber of Commerce of Canada for 1946 is the Canadian Beautification Campaign to be held May 1 to 11, in which the local Junior Chamber will participate. The value of Beautification or Clean-Up Campaigns has long been recognized. Such campaigns were organized in seven or eight of our large centres in Canada in 1945. Local branches of the Junior Chamber of Commerce have played an active part in these campaigns because they know that they are productive of immeasurable benefits in the matter of public health, fire prevention, tourist development, better housing, fuller employment and civic pride. This year the national executive of the Junior Chamber of Commerce representing over a hundred local Junior Boards of Trade and Junior Chambers of Commerce, with a membership of 20,000 young business men, approved a plan to co-ordinate and extend existing campaigns on a national basis so that the message of Clean-Up, Paint-Up, Plant-Up, Light-Up, Fix-Up could be carried to all Canadians from coast to coast. Up to the present time, over 40 cities and towns are planning to take part in this year's campaign and it is expected this number will be increased within the next few weeks. The project has the complete support of the Canadian, Chamber of Commerce

Canadian National Finances

The Canadian National Railways management is to be congratulated on another year of outstanding success as far as financial showing is concerned. It is very gratifying that a surplus of almost \$25,000,000 should have been achieved during 1945. If a good showing should ever have been made, of course, it was during such a boom year as that one was.

The financial administration of the Canadian National Railways under the Vanghan regime has never
