#### The Bolivian Situation . . .

It is now apparent outside Fascist influences inspired the pre-dawn revolution of December 20 last defeated United States Engineer- their determination by snaring by which Major Alberto Villareal deposed General ing Department by a score of 30 two baskets at the very start. Penaranda and set himself up as President of that South American republic. This, of course, it why the United States, Great Britain and several South American nations have refused to recognize the new regime. Evidently, the first reports that the coup was spontaneous and solely nationalistic were not in keeping with the facts of the case.

With the accessible world against her, it is difficult to see how Bolivia can carry on for any length of time with her pro-Axis administration.

### Pacific Strategy . . .

The tide of United Nations air and sea power in the Pacific is now flowing so strongly that inundation of the whole bastion of Japan's outer defences appears to be in sight. The strong new blows of the Allies in the New Britain-New Guinea theatre-Americans and Australians co-operating by air and tare. by land-make it look like General Douglas Mac-Arthur is getting the strength to go places and everyone knows where he wants to go-back to the Phillipines. Of course, there are still other obstacles DOOTE besides Wewak and Rabaul on the road to the Phillipines but it is being shown now that, without extensive naval help, progress can be made.

The new attacks on Paramushiru naval base in the northern Kuriles may be accepted as part of the general plan to strike more directly towards the heart of Japan while in the south the campaign goes regarded by many as one of Haldane 2. A Leighton 4. Robon to cut Japan's communications with her southern conquests and for the establishing of Allied contacts Americans for Eddie Wiseman, with China.

### Homes Can Be Provided . . .

To keep industrial workers in Prince Rupert it today for Glen Brydson. The was necessary to build hundreds of homes in the great centre, who starred with Wartime Housing scheme. It was interesting how readily the government found the means to provide slumped after the trade. But these emergency dwelling places which might not back with the Habitants in have been everything they might have been but which, 1936-37 he regained his oldat least, are filling a temporary need.

If the government can provide homes for people so efficaciously in an emergency of war, the thought arises that it ought to be possible to do so when peace returns. We do not suggest that we should fill up the country with houses of the type that Wartime Housing has provided in Prince Rupert but it does seem that something effective might be done after the war is over to develop a plan of real assistance to the people in home building-a plan which people of all circumstances will be able to avail themselves

One of the essential conditions for a peaceful and happy nation, we would say, would be comfortable and contented homes. To provide them with homes would be a long step in providing social security lack of which, after all, is one of the principal reasons of human discontent and more serious social ills.

Home building must play a major part in any and all plans of postwar reconstruction.

## INCOMF TAX RETURNS

We hate to remind you but-Income Tax returns still have to be prepared!

Did you take credit for all that you were entitled to in

We have a simple record form in respect to 1943 which will assist you in preparing these complicated forms and

in recording your post war refunds or deferred tax. In addition, there is a filing envelope for receipts for donations and medical expenses and for wage and divident duductions slips, etc., all of which have a bearing on the tax you will pay in 1944.

This record system was devised by a chartered accountant for the use of personal taxpayers.

## To the Health Seeker

Perhaps, a "Belief" exists that "everything has been tried and, failed"? Has "faith" subsided to the low ebb of accepting as a fact, the belief that a disease is incurable? Meanwhile, a vague misgiving persists that: Somehow, somewhere there must be an answer to incurability.

Chiropractically, the greatest handicap to health restoration is: So many cherish a traditional faith or belief to the bitter end. Meantime, a simple disease descends into an indefinite and complicated realm of incur-ABILITY. Thus faith and belief hinders, and denies, the natural self-curABILITY within themselves the rightful duty to remedy (meaning: to cure again).

Such statements, of disease, special or general are verified by an exhaustive survey. Over 93.000 persons turned, when disillusioned and disappointed, to Chiropractic (Nature) as a LAST resort.

Some 410 qualified Chiropractors raised no question as to the merits of faith, belief or, the competency of any remedy, to cure again. Nature had preordained that everything was incorporated within. Nature's OWN Remedy substituted incur-ABILITY for cure or marked improvement in 79,000 cases; or, 85% of tiresome, intangible disease names.

A critical reader may question this astonishing record. For the needy there are two basic considerations: The belief that a condition is obstinately incurable as, against the Chiropractic record with thousands of varied, incurable cases. Both cannot be right.

When faith and belief fails to move mountains, Mahomet must go to the mountain. Possibly, the earnest Health Seeker discerns, by the mountainous record, that everything has not been tried; that, high odds yet remain in his favor.

As Mahomet would resolve: If Chiropractic eventually, why not . . . NOW!

#### CANOL OIL PROJECT (Continued from Page 1)

nterest was not identical with that of the Canadian or United States Governments, the regulations under P.C. 742 were expanded to include all the Yukon Territory and the western part of the District of Mackenzie. Permissions have not been granted to others than the nominee of the United States Government, Imperial Oil Company, Limited, because of the desire not to put any obstacle in the way of development of oil resources for vital war needs and because of transportation dif ficulties in the area.

#### PRINCE RUPERT'S PART IN SCHEME

While the original Canol plan was designed to solve the problem of oil supply for Alaska and the Yukon if enemy action should interrupt tanker movement up the coast, the United States Government had the supply line under existing conditions to supplement tank car Men's Officers movement over the highway. In August, 1942, it proposed to the Canadian Government the building of a pipeline from Skagway, Alaska, 110 miles to Whitehorse, passing through British Columbia. To this proposition the Canadian Government agreed. Permission was also received to construct installations for storage and loading at Prince Rupert, British Columbia, from which point oil was to be moved by barge to Skagway through the inside passage. The pipeline Skagway to Whitehorse been operating for some time.
