I am not advocating the increased use of meat because one serving of meat per day is sufficient and almost everyone does have at least that much. What I do want to stress is the increased use of a certain type of meat and that is the glandular organs, namely liver, heart and kid-

All meats are a rich source of the highest quality protein. But liver, heart and kidney in addition to supplying you with protein, also supply you with vitamin A, the B vitamins and iron. Liver is the very best source of food iron and is so important that it should be always served once a week. Neither pork nor beef liver is as expensive as calves liver, yet both yield more vitamins and minerals than do calves liver.

The glandular organs can be served in so many different ways - liver can be fried or baked with vegetables or made

Milk for Babies

Millions of babies have been raised on Carnation Milk formulas that their doctors have prescribed.

There are three big reasons . . . First, Carnation Milk is as nourishing as milk can be - and it's irradiated for extra "sunshine" vitamin D. Second, Carnation's safe because it comes to you sealed and sterilized. Third, Carnation's readily digestible, because heat-treatment gives it a valuable soft-curd quality.

You don't have any milk worries when your doctor puts the baby on Carnation. Write for free book "Your Contented Baby". Carnation Co. Ltd., 470 Granville St., Vanc.
