VICTORIA, Feb. 25 0 -British Columbia's coalition government has neglected to make any plans for providing the sitizens with jobs, Mrs. Grace McInnis, C.C.F. member for Vancouver, said in the budget debate in the Legislature yesterday. She declared that, instead of worrying about shipyard lay-offs, the governmen should pay more attention to alternative employment to take care of the laid off.

Mrs. McInnis said that one in every five jobs in Canada today was held by women and one out of three in British Columbia. There were 1,200,000 women working in Canada today and many of these were under 20 years of age. Half of the number would be unwilling to return to their homes after the war.

Possibility of Enemy Offensive...

There is no particular surprise at the renewal of the German air raid attacks upon Great Britain. The fact that for a year or so there had not been very many did not convince very many people that the Nazis were unable to deliver them. Even Prime Minister Winston Churchill admits that more and heavier blows in various ways may be delivered against the British Isles by the enemy. As the Nazi conditions get more critical, these blows may become more intense and there are numerous possibilities in the form they may take.

What goes for the Germans and Britain may also go for Japan and United States and Canada. Because the Jap has been fairly quiet in offensive tactics of late should not be taken to imply that his possibility of such tactics is exhausted. If we are thinking this we may be rudely awakened one of these days. The danger is that we may become too com-

placent meantime.

An irony of the day: more beer and less butter.

Why Dairy Products are Scarce...

Shortages of various dairy products for Canadian domestic consumption have been apparent from time to time. These shortages have been created through export of the products to the United Kingdom and other destinations. Exports of dairy products to the United Kingdom are in accordance with agreements between the governments of Canada and the United Kingdom.

Exports to destinations other than the United Kingdom are under strict control. An export permit is required for each shipment of value in excess of \$5 and unless the proposed export is in order, authorization to export is denied. These exports are confined almot exclusively to other parts of the Empire, such as the BritishWest Indies, Newfoundland, British Guiana, India, Ceylon and the exports are in accord with the wishes of the British Ministry of Food. Also there are exports of relatively small quantities to possessions of countries maintaining governments in exile which are co-operating with the Allies-for example, the French possessions of St. Pierre and Miquelon, to Dutch Guiana and to the Belgian Congo.

The best way to kill time is to work it to death.
