have enthusiasm and a vision, even though foggy.

Let's count our blessings here. They will surprise us. Let's gather all facts and figures we can about ourselves and our port city, then tell every town in British Columbia and the large cities of Canada and those in the West Coast states.

Make our leading citizens public relations counsels when they travel. Make hundreds and thousands Prince Rupert conscious.

Make contact with industrial and trade leaders at Vancouver. Ask them how we can share more fully in things to come. By asking their advice we will get their interest and by playing our cards with enthusiasm we can imbue them with some of our enthusiasm and thereby enlist their support.

The City of Edmonton has a wide-awake chamber of commerce that made Ottawa conscious of its importance and potentialities. We can do the same. We might well tie in with Edmonton as we are both northern gateways. Let's ascertain from Chicago how by their efforts they made their city the great hub it is.

To get anything worthwhile - such as we at present vaguely wish for Prince Rupert-takes work -real work, and sustained enthusiasm. Let's get at it. Let's follow up the Skeena Highway opening with the launching of a new prosperity campaign.

But is this picture too fantastic? Will the development take too long, and will it be too much work? The Daily News does not think so. Enthusiasm begets enthusiasm and no effort toward community development is ever totally in vain.

ANADA needs every man, woman and child to be strong and healthy, alert in body and mind, to carry on the tasks of war and to enable this great Dominion to take her rightful place in the world when final victory is won.

It is the duty of every housewife, of every individual to study the rules of eating for health, for whilst most of us eat enough in quantity, we do not always get the proper balance into our daily diet. We should therefore study the body's daily requirements in such basic elements as proteins, minerals, energy foods. Pictured above are the six
