Military authorities reveal that men of that regiment failed return from embarkation leave after the battalion left Terrace on December 4 to return to Quebec before going overseas. Strength of the unit was 800 men.

During the Terrace disturbance - described by military authorities as a "mutinous condition"-members of Les Fusiliers | du St. Laurent and its companion regiment, the Prince Edward Island Highlanders, told a Daily News reporter that "they might move us out of Terrace but they can't make us go overseas."

At that time the two battalions were parading through the streets of Terrace and ignoring the authority of their officers in protest against the newly invoked government decision to send 16,000 draftees to the battlefronts.

Is Germany Collapsing?. . .

Decisive events affecting the whole course of the war may well occur within the next few days. With the great Russian offensive on the eastern front attaining a measure of success that even the most optimistic of prognosticators had hardly dared anticipate the enemy are now frantically endeavouring, with all resources at their command, to bolster up their defences within the Fatherland itself. This, it has now been disclosed, involves the transfer of forces and equipment in large quantities from western to eastern front, running the gauntlet of terrific Allied air pounding to move eschelon by day as well as by night.

Optimism Pays Dividends . . .

Edmonton has long been fortunate in getting good administration. from key city officials, so it is not only the influx of population and the dramatic new role of the city as metropolis on the road to Asia that accounts for the very satisfactory financial report recently given to the citizens.

For 10 straight years, the Edmonton Journal points out, the city has collected each year more than the current municipal levy. Total collections of current taxes and arrears amounted last year to 124% of the 1943 levy. It was just about the same in 1943 and 115% in 1942. Sale of land acquired through tax sales in past years is the key to this favorable situation.

Edmonton's optimism a generation ago when it built roads and sidewalks and sewers far out into the prairie, has long been a standing joke, whooped As the Russian campaign on the long and uproariously by the "wise,

THRIVES NOW! · Authorities say the difference

between husky children and those who are poor eaters, underweight and nervous is often simply a matter of proper nourishment, especially an adequate supply of vitamins.

But vitamins alone are not enough. For authorities now agree that vitamins do not work alone. They work as a team with certain other food

For this reason, thousands are switching to Ovaltine. Unlike mere "vitamin carriers," Ovaltine food beverage contains not only extra vitamins but nearly all the precious food elements needed for health and top vitality. These include Vitamins A, B1 and D, the important minerals calcium, phosphorus and iron, high quality proteins and quick energy fuel-food—a combination of food elements authorities agree are needed for best results.

So, if your child is thin, nervous and not developing properly, why not turn to Ovaltine as thousands are doing. Three normal meals plus two glasses of Ovaltine a day give your child all the extra amounts of vitamins and minerals needed for health and top vitality.
