Truman Asks Congress For Big War Chest

Canada May Lift Air Force

WASHINGTON (CP)—President Truman today asked Congress for a ten billion dollar program to provide men and materials for the Korean fighting and to guard against armed aggression elsewhere. He asked that all limits on the size of the armed forces be lifted and for the calling of national guardsmen and reserves if needed.

Mr. Truman warned that the free nations must guard against the possibility of Communist attacks elsewhere in the world and cautioned against hopes for a quick Korean victory.

Victim Assault

Prince Rupert Man
Painful Assault

W. Lefler, who has been in Vancouver on vacation, arrived in the Prince Rupert on the south he visited Lefler at Tranquille san-

Strategy of the North Pacific. . . .

Soviet post-war expansion, at the expense of China, Manchuria, and Japan, has changed the geopolitical and economic aspect of the whole Far East, including the strategic defence of nations bordering the Pacific Ocean.

The coast of Asia, from the Arctic to the Himalayas is now Communist-controlled, except for the Achilles heel of South Korea. The Soviet Far East war potential has been increased by air and submarine bases on Sakhalin and the Kurile Islands, naval installations at Port Arthur, and the development of ship-building and marine industries on the Amur River.

North American defence is based in the Pacific on a line that connects the Philippines, Ryukyu Islands, Japan, Aleutians and Alaska. Other Pacific islands previously mandated to Japan are also under United States jurisdiction. A year ago American troops evacuated South Korea and this area is now the scene of civil war, directly threatened by Soviet-sponsored Communism, which, unless checked, might become a threat to the Japanese Islands.

Should the conflict on parallel 38 develop into wider hostilities, United States air forces based in Japan could stem at source Soviet sea and air attack on the American continent. But loss to the United States of an Asiatic foothold would mean withdrawal to Alaska and the Aleutians, thus losing also the advantages of short-range tactics and a possible out-flanking movement northwards from Japan.

The map shows the strategic importance, both to the United States and the U.S.S.R., of Japan and South Korea.

Ten Billion Dollars Sought For Fight Upon Aggression

Flash

TRUMAN TONIGHT
WASHINGTON — President Truman will speak on the Korean crisis and make recommendations for emergency measures in a radio address tonight at 7:30 P.D.T. His speech will be carried on both networks of the C.B.C. as well as on four American networks.

RUSSIANS ADVISING
TOKYO — Russian officers have been with the Northern Korea forces since the invasion of the south, according to an authoritative report received here. There are between ten and twenty, acting in an advisory way, and not as combatants.

CANADIAN PLANES
OTTAWA — Canadian combat planes would be a welcome addition to the United States air force units in South Korea, it is believed here. About a dozen have been suggested.

WASHINGTON, D.C. (CP)—President Truman today asked Congress for a ten billion dollar program to provide men and materials for the Korean fighting and to guard against armed aggression elsewhere. He asked that all limits on the size of the armed forces be lifted and for the calling of national guardsmen and reserves if needed.

Mr. Truman warned that the free nations must guard against the possibility of Communist attacks elsewhere in the world and cautioned against hopes for a quick Korean victory.

"The attack upon the Republic of Korea," the President said, "makes it plain beyond all doubt that the international Communist movement is prepared to use armed invasion to conquer independent nations."

Along with new military measures, the President proposed a partial home front mobilization.

There will be no price controls or rationing now, the President said. He said, however, that a sharp tax increase, together with other economic controls, was necessary to curb inflation and help foot military bills.

There will be restraint on credit expansion for building, probably higher down payments and less time to pay, and there will be curbs put on inventory hoarding.

The purpose is to make more goods available for production of defence materials.

QUICK RESPONSE
Responding swiftly to President Truman's call for action "without delay," the House of Representatives authorized \$1,222,500,000 of military aid to the free nations to combat communism abroad.

OTTAWA — Government trade and economic experts were of the opinion that President Truman's proposed \$10,000,000,000 aid-to-Korea program will materially stimulate arms purchase commitments in Canada.

The commitment now calls for purchasing by the United States of \$25,000,000 worth of Canadian defence supplies.

Will Buy In Canada

Sabotage On Warship Seen

LONDON — Sabotage is seen by the Admiralty in mechanical difficulties which were encountered by the super-modern 17,000-ton destroyer Cavendish off the east coast of Scotland. After "foreign bodies" were found in the machinery, the warship returned to port for repairs.

The possibility of a well-trained gang of saboteurs being active in the British Navy is not ruled out.

Minister At Lakelse Lake

TERRACE—Hon. E. T. Kenney, minister of lands and forests, arrived here at the weekend and is spending a few days at his summer home at Lakelse Lake before proceeding Friday on a trip to the Peace River country. He will be back here again before leaving about the middle of August for a trip to the United Kingdom and Scandinavian countries with C. D. Orchard, deputy minister of forests, and H. R. MacMillan, the prominent British Columbia timber operator.

Occasion of Mr. Kenney's visit was taken for the holding of a Masonic picnic at his place on Sunday and there were about sixty visitors out.

Mrs. Kenney and son, Edward, are at Lakelse for the season.

Nehru Again— Admission Of China Sought

WASHINGTON — India's Prime Minister Nehru today renewed his proposal to bring Communist China into the United Nations as a step toward solving the Korean crisis.

In a new note to State Secretary Acheson, the Indian leader argued that admission of Communist China, as demanded by Russia, would not be "an encouragement of aggression." He said that in making this approach to the United States and Russia, India was seeking to "strengthen the United Nations in resisting aggression."

Nehru's second note was in response to Acheson's rejection of the idea of seating Communist China now as a preliminary to possible settlement through the security council.

Battle For Taejon Is Resumed

Thousands Of Americans are Landed Amphibiously

TOKYO (CP)—Red artillery shells screamed into Taejon today in resumption of the western battle in the Korea conflict. Both Taejon, former city of 150,000, and an adjacent village were under North Korean Communist artillery fire. Elements of the United States 24th Division, which fought the Reds to a standstill at the Kum River, are still holding the city.

Earlier thousands of fresh United States infantrymen were plunged into the war on other fronts.

General MacArthur's headquarters also announced that the 25th (lightning) division has gone to the battle area. First information did not make it clear whether it was put ashore by an amphibious force.

One of the new divisions—presumably the 25th—is known to have hit the Communists already.

The force was assembled and transported to the battle zone in only ten days.

The amphibious landing came as Allied planes struck far and wide, heaping heavy damage on the North Korean supply lines.

Pack animals were seen moving Red supplies, indicating that air strikes had crippled Communist gasoline supplies.

The first cavalry landed unopposed at Pohang, a little port 65 miles north of Pusan, important United States supply base on the southeast coast.

It was the first amphibious operation of the conflict and throws thousands of fresh troops into the Korean battle zone. The cavalry division piled ashore unopposed yesterday in the seaborne landing on enemy territory.

The new United States division will lift some of the fighting burden from the American 25th Division.

At Pohang cavalry roared inland seven miles or more without meeting the Communists.

Number of men landed was a military secret.

Invasion Of Greece Seen

Warning Issued To United Nations
Nations By Balkans Committee
LAKE SUCCESS — The United Nations committee on the Balkans warned today that the Russian-led Cominform may be planning an attack on Greece.

Secretary General Trygve Lie advised member countries that the United Nations Balkans committee, with events in Korea as an example, reported Communist propaganda attacks on non-Communist Greek government might well be a cover-up for invasion plans.

500 REDS ARRESTED

BERLIN—West Berlin police last night arrested about 500 Communists who came into Berlin from the Russian sector to collect signatures for a so-called Stockholm "peace resolution."

COLDWELL

OTTAWA — M. J. Coldwell, national C.C.F. leader, said last night his party fully supports the action taken by the United Nations in the Korean war. He said his party's position could be very simply stated. "It is full support for the action taken by the United Nations, full support for the principle of collective security, and our readiness to carry our support of that principle into all it may involve."

ANOTHER CLOSE ONE

LONDON — The government yesterday survived another motion of censure by the Conservatives—this time by nine votes. The vote came on the Conservative challenge to the government's 35,000,000 pound East African peanut growing scheme.

DREW

SASKATOON—speaking here last night Progressive-Conservative Leader George Drew forecast an early resumption of a blockade on which the Opposition partisan foreign policy in Canada and the government would work together.

Mr. Drew said there was already evidence of the government keeping the Opposition better informed. His party was ready to give the fullest possible cooperation in defence matters and against Communism.

NEW FRASER BRIDGE

VICTORIA — An order-in-council, passed today, authorized the construction of a new \$1,500,000 toll bridge across the Fraser River between Rosedale and Agassiz.

As I See It

By ELMORE PHILPOTT EAGLE VS BEAR EVERYBODY knows that one of the greatest power struggles of all times is going on right now and that the heavyweights in the rival blocs are the United States on one hand and the Soviet Union on the other.

There are many levels on which one might consider this struggle. "The Eagle and the Bear," is a fine new book by Pennington Hall. It is published by Ives Washburn, New York. It is called "a primer in political philosophy."

west believe, and react and live as we do, why the Russians believe, and react, and live so differently?"

THE AUTHOR believes we can, with lucidity and conviction, that there is a deeper chasm which divides the world today than mere power politics.

"The west" is more than a name, he shows. There is one part of the world in which the world in which the thinking of all the people derives from certain religious, moral and philosophical ideas from a common watershed.

The English, American and French revolutions were all various expressions of the same general proposition - that human beings have certain NATURAL rights; that the well-being of the person, the individual, is the highest good.

"We hold these truths to be self evident..." wrote Jefferson. But everything that he wrote, and almost everything that Tom Paine wrote or Patrick Henry declaimed was in fact re-written or otherwise de-tain common inheritances.

There WILL BE LITTLE possible argument with this half of the author's general proposition. The other half seems to me more debateable.

The opposing philosophical concept - poles apart from that of the west - is the German, which the Russians took over. (Perhaps I should more precisely say "which took over Russia".)

This German concept derives from Hegel's dialectical materialism. It carries on through Fichte, Mark and Nietzsche. It justifies and glorifies the totalitarian idea that the state is more important than the human beings it is supposed to serve.

THE WEAKNESS IN THIS new book seems to me in assuming without examination the proposition that German totalitarian philosophy permanently conquered Russia.

It seems to me that Russia, of all nations on earth, has roots to her own thinking that much pre-date Lenin, Marx. It seems to me that the Russia which beat Germany at Stalingrad, for instance, had little if anything to do with dialectical Russia which stood, as it had materialism. It was the eternal in the days of Napoleon.

My hunch is that in the long run Russia will play a part in history which is more in line with the ideas of Leo Tolstoy's War and Peace than with Marx's manifesto.

Yet for all that I agree heartily with the great Canadian who loaned me this book that it is "one of the clearest, most direct examinations" of the present world situation.

Skeena Member Visiting Atlin

ATLIN - E. T. Applewhaite, M.P. for Skeena, is spending the week in this camp visiting his constituents in town and on the creeks. He arrived by air on Saturday after having visited the Acadia Valley in Saskatchewan, Calgary, Edmonton and Whitehorse on the way here.

Most Women Are Working

By MURIEL NARRAWAY Canadian Press Staff Writer LONDON - One of every three paid workers in Britain is a woman.

The same goes for factory workers. In the case of agricultural workers, the woman-to-man ratio is 7 to 1.

Nine of every 10 single, and one of every five married, women do paid work.

Of these, nine out of 20 are unskilled workers, four are skilled, two or three do routine clerical work and four fill higher clerical, technical or professional positions.

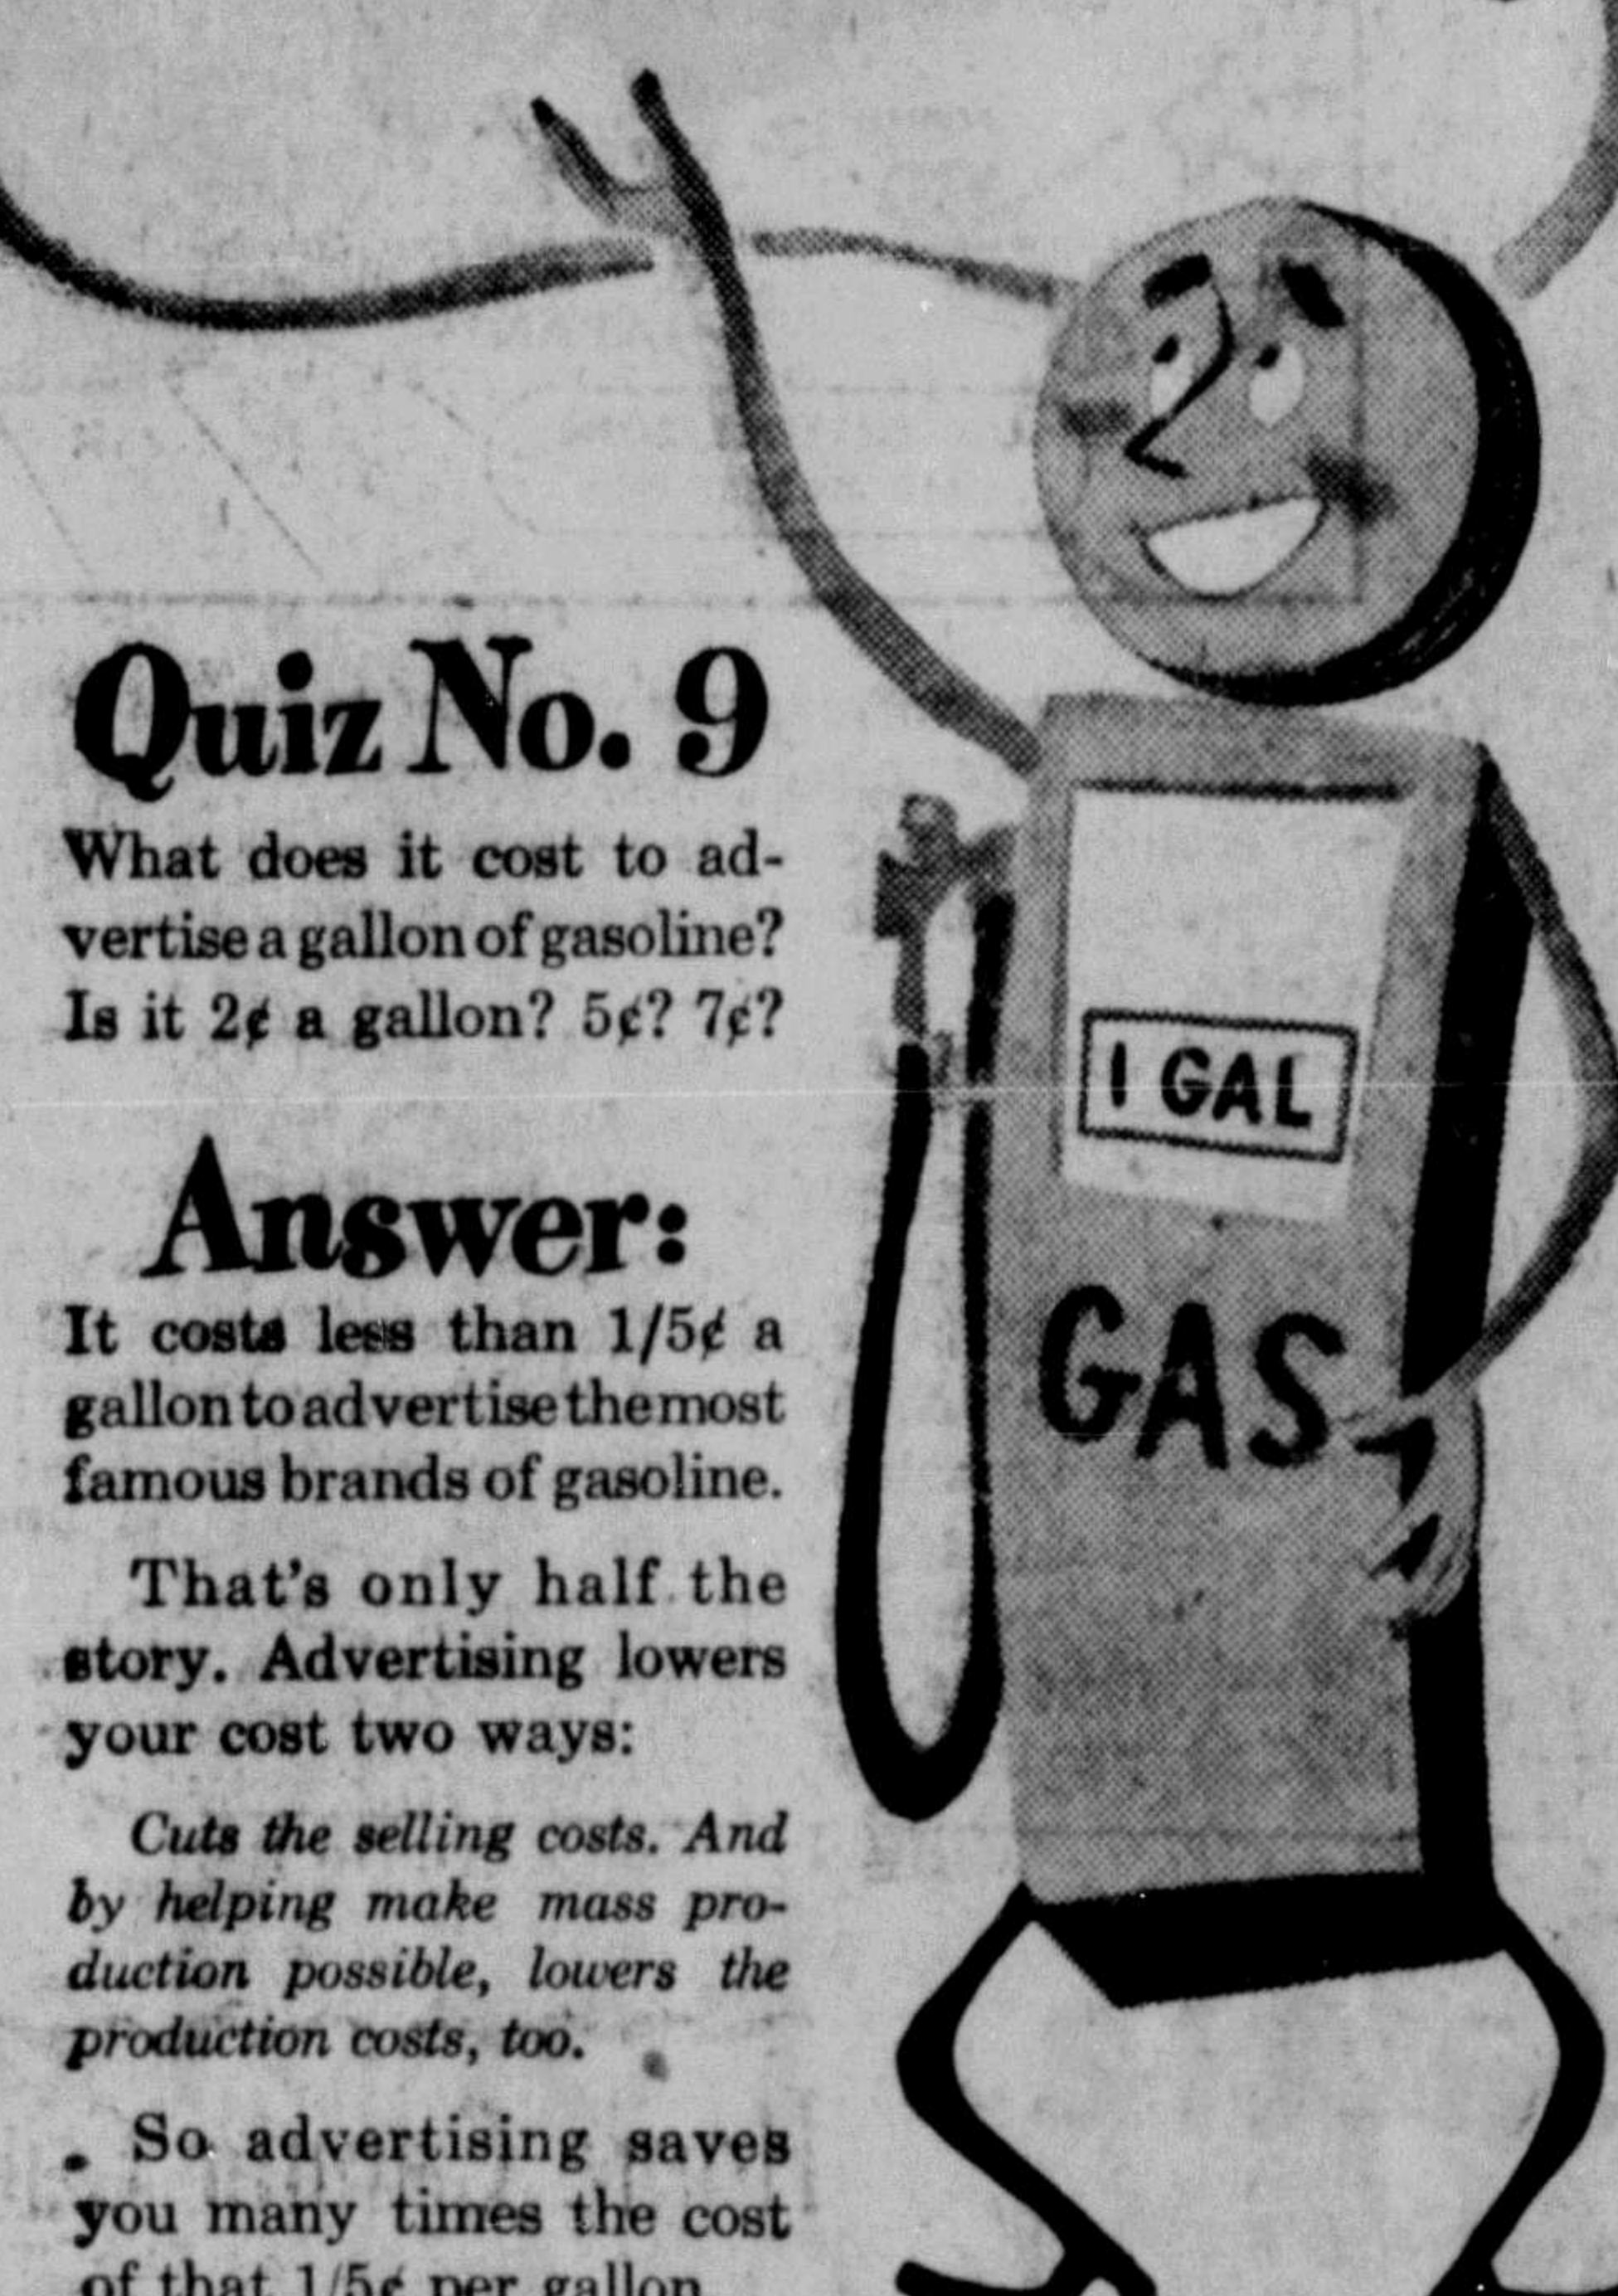

These and other facts are contained in a first report on women prepared by the Economic Information Unit of the treasury.

Mrs. L. S. Horton of the Economic Information Unit told the Canadian Press the report had been issued in response to an increasing demand by women's organizations throughout the country.

WANTED FACTS More and more women were clamoring for facts and figures on export, productivity, employment, building and all economic factors with direct bearing on home life.

Created to explain economic problems in clear and understandable language, the Unit (Continued on page 3)

Bet You Don't Know This About Advertising

Quiz No. 9

What does it cost to advertise a gallon of gasoline? Is it 2¢ a gallon? 5¢? 7¢?

Answer:

It costs less than 1/5¢ a gallon to advertise the most famous brands of gasoline.

That's only half the story. Advertising lowers your cost two ways:

Cuts the selling costs. And by helping make mass production possible, lowers the production costs, too.

So advertising saves you many times the cost of that 1/5¢ per gallon.

Published By This Newspaper To Help Foster A Better Understanding of Advertising's Function in our Society.

Electrical "Hands" make work light. Electricity is the handiest worker! It does everything better, more cleanly, more quickly. An automatic toaster, for instance, gives you toast just the way each member of the family likes it... and does it while you are busy with something else. And an automatic iron, thermostatically controlled, makes ironing a pleasure. The more electrical "hands" you have to do your work, the more hours of leisure for you. If you have a birthday or anniversary coming, why not tactfully suggest something from this list: AUTOMATIC TOASTERS, REGULAR-TYPE TOASTER, AUTOMATIC IRONS, REGULAR-TYPE IRONS, COFFEE MAKERS, FOOD MIXERS, VACUUM CLEANERS. SOCIAL and PERSONAL

Mrs. J. A. Sim and daughter, Marilyn, Victoria, arrived by plane Monday to spend some time with Mr. Sim here.

Dr. F. P. McNamee, Eye, Ear, Nose and Throat, is reopening his practice in Kamloops, Suite 6-10 Galloway Bldg., 220 Fourth Avenue, August 1st. (170p)

A chimney fire at the home of H. L. Pierce, 139 Market Place, called out the fire department at 8:30 this morning. Although the chimney was burning badly, no damage was caused.

We have a wonderful assortment of earrings at present. Largest range runs from \$1. to \$3 but we have plenty of better earrings as well. Bulger's. (11)

William Wellens, son of Mr. and Mrs. Arthur Wellens, flew to Vancouver this week for a holiday.

Regular meeting of Women of the Moose Wednesday, July 19, at 8:15 p.m. (11)

Mr. and Mrs. Hummell arrived in Prince Rupert by train last night and sailed this afternoon on the Prince Rupert for Ketchikan.

C. H. Klotz, project engineer, Columbia Cellulose, Watson Island, returned to the city on yesterday afternoon's plane from a brief business trip to Vancouver.

Dominic Elio, former well known local business man, who left here two years ago and has since been living in Kamloops, arrived in the city by plane yesterday afternoon for a brief visit. He came here from Port Alice, where he visited with an uncle, and will proceed on Friday night's train to Jasper to spend a week before returning to Kamloops. Since Mr. Elio left the city he made a trip to Italy.

G. B. Hill of Chicago, enroute to Alaska, called at the Daily News office this morning and ordered the mailing out of a number of today's issue of the paper to friends in the United States, Canada and England.

Roy Becker was brought home from Terrace by train last night with a broken leg and taken to Prince Rupert General Hospital for treatment. His condition is reported favorable. Mr. Becker was holidaying with his family at Lakelse and suffered the fracture in a simple fall on a rock. Mrs. Becker accompanied him to the city.

Miss Solveig Mork arrived by plane Monday afternoon from her nurses' training duties at Royal Jubilee Hospital, Victoria, to spend a vacation with her parents, Mr. and Mrs. H. Mork, Seventh Avenue East.

Made Records But Lost Toes

PARIS (AP) — Five French mountain climbers have returned from the Himalayas with claims to a record in mastering Anapurna Peak, 26,496 high. But glacial cold almost got them. Maurice Herzog, expedition leader, lost all his toes and all his fingers up to the first joints. Louis Lachenal lost all his toes. Others were battered and physically exhausted from climbing Anapurna Peak in the Everest group.

Bare Top Dresses "Done To Death"

NEW YORK (AP) — West coast designer Howard Shoup finds women "wonderfully confused" about what to wear to a cocktail party.

Tweeds and bare-top evening dresses often show up at the same party, and "both look terrible," said Mr. Shoup as he showed his fall collection here. His recommendation is a simple dress-and-jacket ensemble—the dress lowcut, if desired, for possible dancing later—in a dark, rich fabric.

Incidentally, Mr. Shoup predicted a swing back to the covered-up look in evening dresses, even to long sleeves. The bare-top has been "done to death," he said.

South America Voyage Recalled

Capt. Fred Kohse and his partner, Fred Nelson, who took the Arrawanna from Vancouver to Chile at the first of the war, have been fishing areas 2 and 3 during the season. They have been turning in good catches, too.

Although veiled, in wartime censorship, there was considerable talk about the movement of the ship at the time but delivery was completed. Since then the ship has been used as a tender in the harbor at Santiago.

Although now they are no longer partners, they are still good friends and Fred Nelson, who is working on Fred Kohse's boat, are in Ketchikan together on a strictly pleasure voyage.

Women Of Moose Publicity Meet

After a business meeting on Monday night, the publicity committee of the Women of the Moose at the home of the chairman, Mrs. G. Robinson with nine members present, enjoyed a session of cards. First prize was won by Mrs. P. Dvornik and second prize by Mrs. Frank Parlette. Delicious refreshments were served by the hostess. Those present were Mrs. Frank Parlette, Mrs. H. Harrison, Mrs. A. Hamilton, Mrs. P. Dvornik, Mrs. H. Graham, Mrs. O. Tweed, Mrs. Thomas Glenn, Mrs. G. Robinson, and Miss Sylvia Johnson.

WOMEN WORKING (Continued from page 2)

has worked in close co-operation with the women's organizations, providing much lecture material. MATERIAL

The report explains the part women play in the earning and saving of dollars. It shows that women form a main artery of industry, productivity, export and, as a natural cycle, the economy of the nation.

In reference to dollar exports, and imports, Canada is mentioned on three pages of the four-page report. Page one says: "The quantity of exports to Canada and the United States has been larger than a year ago, and is still increasing."

The report was well received by the British press. Commented A. J. Cummings of the Liberal News Chronicle: "It makes far more entertaining reading than most of the stuff churned out by government departments."

Hail! Hail! The Gang's All Here!

Ray Reflects and Reminisces

A halibut vessel with four husbands and four wives puts out from Prince Rupert for the north. What's the big idea back of it all? Business, pleasure, sight-seeing, picture-taking, fishing, fighting or what have you? Yes, there must be something in this sea-air, after all.

President Truman has been asked to raise a trillion dollars and plan a century campaign against Communism. Oh, well! In this stage of world lunacy, anything beyond a billion doesn't matter much one way or the other.

Whatever patch of snow that managed to stay late on Mount Morse across the harbor should have by this time vanished. It's melted, or been washed away. How many newcomers to Prince Rupert go to the exertion of scaling the peak? It's an easy climb if you start at the right point.

which is near an old cannery site on Tucks' Inlet. There used to be a cairn somewhere on the crest and, within it, the names of a party of pioneers and the date. It may be still there, but the chances are slim. The gales and storms of forty years can do a lot of wearing and tearing.

Latest from Stewart suggests a state of gladness in this redoubtable camp but there's nothing surprising in this. Times are always pretty fair in Stewart and Portland Canal. Disappointments do not sour or discourage. Dan Mann's railway was just an incident. There used to be newspapers there. Well, why not? Stewart was never known to feel blue but has been heard to explain any number of times "just wait till you see us next year."

One recalls the old days of the big hotel dining room in Prince Rupert. Once, a former United States President addressed a luncheon here. Mr. Taft was in excellent form and in close touch with current affairs. He was, he concluded, "about to return to shed the light of his intelligence on his fellow countrymen."

After all, although the Duke of Marlborough owns a palace and all that, he is human and just the same as anyone else. He loaned the mansion of Bierheim for a charity dance and nearly 2,000 attended. Next day he found costly hall carpets all but ruined by burning cigarettes, stains from spilled drinks all over the place and more damage elsewhere. He felt something like the occupant of a \$50 flat who, throwing a party, is disappointed in her friends.

UNIVERSAL FRANCHISE

Voting is compulsory in Venezuela between the ages of 21 and 65; from 18 to 21 and above 65, it is optional.

Jack McRae Guest Speaker

Terrace Board of Trade Has Annual Strawberry Dinner

TERRACE—J. D. McRae, M.L.A. for Prince Rupert, was the guest speaker last Friday night at the annual strawberry social dinner of the Terrace and District Board of Trade. He gave a complete and interesting review of the last session of the Legislature and dealt with many matters of mutual interest between Skeena and his own riding of Prince Rupert.

The dinner was presided over by C. J. Norrington, president of the Terrace and District Board of Trade, and there was a large attendance.

Mr. McRae complimented the local board on their active association and expressed his regrets at the absence of E. T. Appleywhite, M.P., who would otherwise have been the speaker. Then he proceeded to give Webster's definition of a strawberry which sounded like anything but the luscious red berry that had just been eaten and enjoyed.

Then followed a few statistics of Terrace such as its 200 feet elevation, its 40-inch yearly precipitation and 32 days of frost, stating it should be economically sound to produce fruit and vegetables for the Prince Rupert market, which last year, took \$10,000 in fruit and \$10,000 in vegetables from this district.

Mr. McRae detailed the rise of forestry operations with the coming of the Columbia Cellulose which has already 300 or 400 employees in this area.

The B. C. government was keeping in step with this progress. Forest management for the perpetuity of the timber was touched upon by the speaker

HAULED FROM BARREL—Major Lloyd Hill, 31-year-old Niagara Falls riverman, is hauled from the steel barrel in which he planned to go over the Horseshoe Falls on Sunday. Hill was removed from the barrel and prevented from continuing over the cataract after it was trapped in the under current of a small dam above the falls. The barrel continued the trip and was recovered in a battered condition. Hill plans to make the trip at a later date. (CP Photo)

also the B. C. Power Commission, hospital insurance, the Aluminum company and the highways. He spoke of the future development of the Peace River and natural gas, the production of which, he said, should be encouraged in the Peace River and should be brought into central B.C.

It was the fifth annual strawberry social and was held in the I.O.O.F. Hall. Attending were almost 100 people several of whom were from out of town.

Luscious strawberries from the farms of Hamlin and Thomson and W. Appledorne were served, topped with quantities of whipped cream, cake and cookies. This was the work of the refreshment committee headed by E. S. Sargent and Dr. K. McPherson and assisted by Mrs. C. J. Norrington, Mrs. H. Spencer, Mrs. Osborne, Mrs. H. King, Mrs. McAdams, Mrs. Newhouse, Mrs. J. Stevenson, Mrs. Giraud, Mrs. Sargent, Mrs. D. Kerr.

The strawberries followed the close of a short business meeting. President C. J. Norrington introduced each guest and thanked all who had made the evening such a social success.

Letters of regret at their inability to be present were read from E. T. Appleywhite and district engineer W. E. Bottomley.

'Teen Age Star Back To Stage

LONDON — Sally Ann Howes, teen-age British film star, is going back to Repertory Theatre—to start all over again.

After only one year's run, the Rank organization allowed the option on her £50,000 (\$155,000), seven-year contract to lapse, due to a financial crisis in the film industry.

With only one week's stage experience, Sally hit the headlines as child star of "Thursday's Child." Later she played in "Pink String and Sealing Wax" and "The History of Mr. Polly."

After making "Honeymoon Deferred" for an independent company, Sally has no further immediate film commitments.

"So I decided to start learning my job and the best way to do that seemed to be to start in Rep," said Sally, the daughter of stage star Bobby Howes.

It's a long step down, but Sally's not downhearted.

"Lots of people are in the same boat," she says. "You can't just sit and look sad."

Old Smithers Mine Reopens

With a two-phase production plan whereby a small mill will be installed immediately for the treatment and shipping of gold ore, the proceeds of which will be used to finance the development of extensive silver-lead-zinc resources and the setting up of a much larger mill for the purposes of the lower value minerals, the well known old Glacier Gulch mining property near Smithers has changed hands and is once again the scene of active operations.

Glacier Gulch is situated on Hudson Bay mountain overlooking Lake Kathryn and about six miles west of Smithers.

The property has been acquired from the original owner—Stuart Campbell, Grover Loveless and Les Banta—by the Glacier Gulch Mining Co. Ltd., a company of young Fraser Valley men, headed by W. E. Forbes of Mission as president and consisting also of L. W. Boddie, Mission, vice-president, L. Quance of Vancouver and John Borne of Abbotsford.

With C. A. Munro as superintendent, seven men are now at work on the property clearing up the workings and renovating buildings and road which connects the property direct with the highway.

In the city yesterday was Mr. Forbes who was looking into the possibility of acquiring the old government ore sampling plant which might be used as a mill for the gold ore. Mr. Forbes was accompanied by Harry King of Terrace.

Mr. Forbes, speaking to the Daily News, referred to the unusual set-up of the property with its two distinct ore bodies—one gold-bismuth and the other silver-lead-zinc, the development and operation of which could be so complemented.

Expectation is that the gold mill will be producing this year.

The concentrates will be shipped out over the railway from Smithers.

There are some 500 feet of tunnels and shafts on the property which shipped four carloads of gold ore between 1933 and 1937.

The property is equipped with five camp buildings which Mr. Forbes says are sufficient to meet present accommodation requirements.

Silver Standard At Duthie Mine

SMITHERS—Interesting rumor current here is that Silver Standard Mines Ltd., which for some time has been successfully operating the famous old mine of that name at Hazelton, has become interested in the equally famous Duthie mine on the eastern slope of Hudson Bay mountain here. Once one of the spectacular mines of this district, the Duthie has been inactive for many years but has always been regarded as having further definite possibilities.

A FEW POINTERS — Governor-General Alexander gets a square dance lesson after a "chuck-wagon dinner" at the Calgary Stampede. Viscountess Alexander, top right, danced in the same set with A. L. Smith, member of parliament for Calgary West, and Mayor Don Mackay. The Alexanders spent two days at the week-long stampede. (CP Photo)

IN 50 YEARS
ALUMINUM HAS GROWN TO BE A LARGE PART OF CANADIAN LIVING
Toronto—First Aluminum-ware factory in Canada

Building the home for Wear-Ever 1912
1950 is the fiftieth anniversary of the Wear-Ever line in Canada. These aluminum cooking utensils were introduced here at the beginning of the century. Their popularity grew so rapidly that, by 1912, a new factory was needed to supply the demand. This was built in Toronto. It was the first plant in Canada to make aluminum articles—and this was only a dozen years after the first Canadian smelter had started making aluminum ingots at Shawinigan Falls.
Today Alcan has twelve plants, all of them engaged in the aluminum industry; while more than 1000 independent companies across Canada shape the metal into all sorts of useful forms—from kettles to freight cars.
