NEW URANIUM FIELD IN CANADA IS NOW **NEAR PRODUCTION** OTTAWA (CP)-Min-

> ister of Trade and Commerce C. D. Howe last night offered industry a year's free use of radio isotopes of tracer atoms from the Chalk River atomic plant. He also said that a second crown-owned uranium field was now near-production but he declined to say where.

The offer of the radioistopes is expected to stir industry forward on what is described as "the first great contribution of atomic energy to peace-time purposes."

Unofficially it is believed that

NEMOCRACY only attains its goal when its citi-I zens think more of their duty than their rights. A primary duty of each and all of us is to form a judgment from the experience available about everything that concerns the well-being of the state and our fellowman. Thereby lies good citizenship.

Like some church-goers who hang up their religion with their Sunday clothes-to be used only on the Sabbath-too many Canadians unthinkingly leave their citizenship at the polls. It is important, of course, that one should present himself at the polling booth. But he should demonstrate interest in public affairs at all times and should participate actively in them.

CIVIL CASES STOOD OVER Three civil actions were stood

over until the January sitting of the court and three naturalization examinations were conducted by Judge W. O. Fulton Monday at the monthly trialsetting session cf County Court. The three civil cases involved money claims and are being handled by the law firm of Brown and Harvey. They were: R. E. Turner versus Gordon

Jolliffe, \$92.44. B.C. Packers Ltd. versus Leonard Mercer, \$581.

Fred Labelle versus Vile Lamaux, \$150. Examinations in connection

with naturalization proceedings were given to Melvin Julian Hetland, Adrian Pieter Van Stolk and Lee How Guey.

"Better Than Ever"

WEEK OF PRAYE

SET FOR JANUA

Prince Rupert's annual,

The indiscriminate security that neither asks for effort nor encourages it will depress the whole foundation of society.

RANGE OF QUALITY

THE SKEENA HIGHWAY has now been called everything one can think of. The latest report was "Perfect." 'A few days ago it was "Impassible." The range is very great indeed. The Prince Rupert Automobile Association (surely an authoritative source) in its most recent reference to the road, suitably crowned it. And now, in winter at least, excellence reaches its serene zenith.

SOME GOOD BOYS

THREE BOYS, standing with the Governor-General, had their photos taken recently in Ottawa. They were decorated for bravery in saving life or trying to. Our own Scout Roy Clifford, from Terrace, was one. The others live in Quebec and Ontario. In all, they represent a large proportion of the whole of the Dominion. How does all this stack up against the peevish plaints and over-emphasis given "juvenile deling"ency?" There are still quite a few pretty fair young fellows in Canada. Quite a

NEW TYPE OF MACHINE FOR SPRAYING FRUIT-A new type of fruit spraying machine, shown during its demonstration at Marden, Kent, Eng., is hauled by a tractor to the site to be sprayed. The invention is unusual in the fact that previous machines have used high pressure while the "Autoblast" uses low pressure insecticide with high pressure air. This mobile plant virutally created its own hurricane, which, impregnated with insecticide, is carried to the topmost branch of the highest tree, and so applies a fog-like drench of pest destroying insecticide that completely envelopes the tree.
