Good Government--or Bad LOW OFTEN have we heard it said that every nation gets the sort of government it deserves?

It's a smart phrase and like many smart phrases it is only partially true. There are people who have had better governments-and worse-than they have deserved. But the seed of truth is there. The measure of our interest in our own affairs is the measure of our achievements as a nation.

Canada has rarely had the sort of bad government that challenges radical action. It has been easy for us to be complaisant. At intervals we go importantly to the polls to register the results of our rather haphazard thinking and to take a stand on issues that, too often, we only dimly understand. If this attitude is challenged we counter with the well-worn argument that there isn't much we could do about it anyway.

There are things we can do about it. If that is not so then democracy is done. We can inform ourselves. We can get over accepting whatever views are placed before us, and begin to assess what they mean, where they lead, and what they might do to Trafalgar. Better markets abroad

mean bigger payrolls at home

Like other basic industries of British Columbia, our fisheries depend largely upon export markets for steady employment of large numbers of men and women and maintenance of high wage standards. The battle for these markets is unending. It is a situation which can only be met by more intensive sales efforts, better marketing methods and highest quality products. Only by the willing co-operation of all concernedfishermen, plant employees, technicians and management can these markets be maintained and extended, to the benefit of all.

The handsome archbishop is momentarily without a church for his church was dissolved by state decree on January 1, 1948, when all foreign relief funds were cut off. The archbishop was born in Hungary but brought up in Poland. He returned to Hungary 10 years ago to organize his own branch of the Roman Catholic Church.
