We can think of no place in British Columbia more adapted and more pleasantly situated for the accomodation of people who require care and service yet not active hospitalization than that lofty and beautifully located bench overlooking the pretty village of Terrace and the expansive Skeena and Lake River valleys.

The people who go to the infirmary at Terrace, we are sure, will enjoy life there and the people of Terrace will be glad to have them around.

#### YEAR OF HIGH HOPE

ANADIANS have reason for high hope. Our resources are still so great that even with less than a healthful, honest effort to contribute to our share of the world's work, most of the men, women and children of this country will be better housed, better clothed and better fed in the coming year than nine-tenths of the people of the earth. There is always the hope that Canadians as a whole will rise to their opportunities and by greater intelligence and industry make physical and spiritual gains which will provide Canada and its customers with a higher standard of living and a growth of good will which will contribute immensely to peace.

The danger of 1949 is that Canadians may be satisfied with less than their best effort and waste their opportunities to serve their own good and the good of mankind.
