UNEMPLOYMENT AMONG MEN HIGH

An influx of workers to Prince Rupert on the strength of anticipated industrial development here this summer is one of the factors contributing to current higher unemployment figures among male workers in the opinion of Unemployment Insurance Officer E. V. Whiting.

Number of men seeking jobs at the week-end was 442, as compared with 414 at the corresponding time a year ago. Of the 442 listed as unemployed, 419

The law requires that the stamped books must be returned to the employees immediately on termination of employment.

The second resolution urged that the government's policy of not employing workers in the 45year age group should be removed. The policy did not apply in the case of veterans. The resolution urged that it be dropped completely.

Red Cross and You

LUMAN SUFFERING takes many forms. It I may strike as illness and pain, as misfortune and natural catastrophe, as bewilderment and hopelessness against overwhelming odds.

To alleviate these sufferings, to prevent disease and to promote the health and welfare of the people of Canada-that is the task of the Canadian Red Cross Society, the task of its workers and its members-ever-renewed, ever-necessary.

As a good neighbor, as a responsible human being, each one of us wants to aid distress wherever we may find it and to prevent, if possible, its occurrence. In the complexities of the modern world, one man's hand is not enough. Only the co-operative effort of a great Society, geared to work efficiently, quickly and humanely, can hope to stem the flood of misfortune, of accident and emergencies that can overtake any one of us. Only a great Society, international in scope, can bring hope to millions of our fellowmen in other portions of the war-scarred

The highest of human ideals—Concern with the welfare of others—is the motivating force of Red Cross. To translate this ideal into action, Red Cross and its thousands of volunteer workers need the help of every person in Canada including Prince Rupert. By contributing your share in the 1949 appeal for \$4000 in Prince Rupert, you become an active partner in one of the greatest humanitarian forces working for good in the world today.

COMICS AND CENSORSHIP

/IOLENCE begets violence. Comic books, which have peddled sex and violence to youth for a profit have aroused violent opposition and the natural thing to resort to is official censorship. But is such official censorship the really effective rem-

There is inherent danger in censorship. The inescapable fact is that a censorship established for good purposes can often turn into a censorship for evil, mistaken, or partisan purposes. It is the worst of all possible remedies and often more dangerous than the evil it seeks to correct.

The comic book industry, despite all its pious protestations, has brought this on itself—and is likely to bring more of the same unless it shows more effective self-censorship. But the only safe remedy is in the awakened citizen, the home, and the civic organization which can bring pressures short of censorship against this form of mental dope.

PAGING BILL HERBERT

DILL HERBERT, much-travelled and usually O well-informed commentator of the Canadian Broadcasting Corporation, should come to Prince Rupert and get up-to-date on his civic centres.

We are told that Bill put on a broadcast from CBR in Vancouver one day last week in which he told about a new Civic Centre at North Vancouver where he said the innovation was being made of school children using the place for various activities, where vocational classes were being held in such subjects as handicrafts and where there were

numerous other community diversions and pursuits. There was no objection about Bill giving North Vancouver a nice plug on its Civic Centre and we rejoice at another community than ourselves being so fortunate. But when he suggested that North Vancouver had the only Civic Centre in British Columbia where this sort of thing was going on it was a little too much, considering the Civic Centre activities-all this and more-which have become commonplace and accepted in Prince Rupert these several years now.

Of course, the last time Bill Herbert was in Prince Rupert was back in the early days of the war before he went overseas as a war correspondent. He should see Prince Rupert now and, possibly, Prince Rupert would get a plug on the national network not only on account of its Civic Centre but on many other interesting and possibly distinctive things here.

> In early days the "horse power", operated by teams of horses hitched to its arms and walking in a circle, supplied the power to operate the threshing machine and other farm machines. Today tractors and engines supply the power to operate most farm machines. Nickel Steel and Nickel Cast Iron are used for important parts of tractors and other farm machines to give extra strength, toughness and wear resistance, and to eliminate breakdowns.

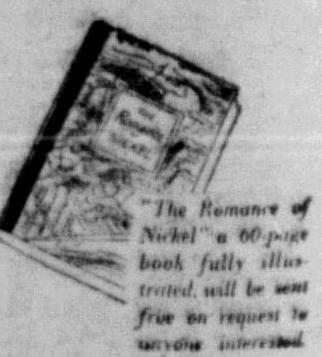

Canadian Nickel sold Abroad brings in U.S. Dollars

Since more than ninety per cent of the Nickel produced in Canada is sold to the United States and other countries, it brings a constant flow of dollars back to Canada. In fact, Canada's Nickel industry is one of our chief sources of U.S. dollars so essential at the present time to maintain our foreign trade and make available products not produced in this country.

These dollars help pay the wages of the 14,000 Nickel employees, and help provide the dollars which make it possible to pay millions in freight to Canadian railways, to buy timber, steel, coal, machinery and supplies amounting to many millions each year.

These millions, flowing into all industries through the length and breadth of Canada, help create jobs for Canadians.

OTTAWA - Jackson Dodds C.B.E., Dominion Commissioner of the Canadian Boy Scouts' Association, said at a luncheon here "there was a most dangerous tendency among Canadians to take the commonplace things of life too much for granted."

In Canada, where forces for good were regarded as common place, enemies of democracy are working day and night unceasingly to spread their propaganda and expand their influence. These destructive forces were composed of men and women "to whom the spiritual and democratic is anath-

"Few of us," said Mr. Dodds, "can be unaware of what will happen to this country unless some positive forces are brought to bear on the development of our young citizens. We are too well aware of the destructive forces in our midst, the men For and women who thrive on hate, twisted minds which hate all men who believe in freedom."

As a depositor or borrower, you value privacy in money matters. Your banker protects that privacy. Your banking transactions are not open to the eyes and ears of your competitor, your neighbor, your community.

In other words, the manager of your branch bank and his whole staff are working for you.

Contrast this Canadian way with conditions in lands where freedom is denied-where every bank is a political tool, every banker a public official working for the State! State monopoly of banking, proposed by Socialists here, would open your banking transactions to political intrusion.

OF B.C. OIL

VICTORIA-The potential oil bearing lands of British Columbia will soon be thoroughly explored, according to Hon. E. T. Kenney, Minister of Lands.

Considerable areas are now being prospected in the Queen Charlotte Islands which first attracted attention a good many years ago.

A good chance exists, says Mr. Kenney, of finding petroleum or natural gas in commercial quantities.

In the past two years more than 1,750,000 acres of land have been taken up under petroleum prospecting permits.

There has been exploratory drilling in the Peace River district. Drilling is also going on now in the Flathead Valley in far southeast corner of the province, just across the border from Montana.
