

**CANADA'S ENTRY**—The Wanderer IX, on loan to the Halifax Squadron of the Canadian Naval Association, is the only Canadian entry among the 63 yachts taking part in the Newport-Bermuda race which starts June 21. The 64-foot staysail schooner will be skippered by Cmdr. John C. Reed of Halifax and Toronto and will carry a crew of 10 from the RCN's Atlantic Command. (CP from National Defence)

## Union Rejects Offer of Companies Without Asking Fishermen's Views

**Halibut Landings**  
Halibut landings have fallen sharply on the waterfront. There were no boats in this morning and only four landed here on Wednesday.  
It is thought all boats now in from the principal fishery—2A and 1B—which were out at midnight last Sunday, will be in by tomorrow.  
While no figures are available for the total catch this season, fishermen estimate that more than 15,000,000 pounds of the 500,000-pound quota have been landed at Prince Rupert. There are Wednesday's sale on exchange:  
**American**  
Loki M. 21,000, 21.2, 17, 13, 13.  
**Canadian**  
Loki Mak, 35,000, 21, 17.6, 14.5, 15, 13, 13.  
Loki N, 35,000, 20.8, 17.2, 17.2.  
Sold to the Co-op: Isa, 4500.  
More than 380,000 pounds were landed here Tuesday. Here are the details:  
**American**  
Bennie, 25,000, 21, 16, 13, B.C. Packers; Bergen, 18,000, 21, 16, 16; Pacific, Frisco, 7000, 21, 16, 16.  
**Canadian**  
Robert B, 28,000, 20.6, 16, 12.5, 16; Melville, 35,000, 20.6, 16, 16; Baron, Island Queen, 15,000, 15, 13, 13; Atlin; Invercan IV, 20.5, 15.18, B.C. Packers; Loki, 54,000, 20.7, 15.5, 13, B.C. Packers.  
Sold to the Co-op: Seamount, 16,000; Covenant, 16,000; Prospector, 31,000; Mobro, 4,000; 37,000; Neptune, 16,000; Northern Breeze, 25,000; Cape Hatteras, 18,000; Dicky Boy, 8,000; 1, 20,000; Tramp, 18,000; 17, 000; Borgund, 5,000; 18,000; Norris M.

## US Should Learn Finance From Canada

**NEW YORK**—The New York Daily News suggests in an editorial today that President Truman send a commission to Ottawa to find out how Canada manages her finances.  
"This would involve a feat of pride-pokering," the News says, "but it would also dig up a barrel of useful tips and information which the people of the United States badly need."  
Noting the Canadian dollar is worth more than its U.S. counterpart, the News says this "humiliating upset is only a dramatic part of a larger picture."  
"That picture includes Canadian government encouragement of private enterprise, farming out of government powers to provincial officials instead of hogging them in the Dominion capital city of Ottawa, firing useless public pay-rollers and in various other ways firmly refusing to imitate the U.S. . . ."

## Russians Extend Shoot-to-Kill Security Orders

**BERLIN**—The Russian zone government today decreed extension of shoot-to-kill security measures including the border around Berlin as well as the frontier with West Germany.  
The order, signed by Communist boss Walter Ulbricht, deputy prime minister, directed security police to "extend generally" measures begun on the inter-zonal frontier to "hinder the entrance of diversionists, spies and terrorists in territory of the German Democratic Republic."  
The order provides sentences for violators "unless they are not of at least two years in jail for liable for higher punishment under other regulations."

## Record Vote Forecast in Pr. Rupert

Today is election day in British Columbia.  
Voters in Prince Rupert electoral district—there are 9088 on the list—are choosing the man who will represent them in the Legislature for the next four years.  
Active voting began early this morning and by 1 p.m. more than 1250 had exercised their franchise. There are 6077 eligible voters in Prince Rupert riding.  
First of the four candidates to cast his ballot was Tom Christie, Progressive Conservative, who arrived at the Civic Centre 15 minutes before the poll opened.  
Smiling and cheerful, Mr. Christie greeted the many early voters with a handshake and directed his crew of scrutineers. Shortly before noon, Jack McRae, Liberal, seeking re-election, and Art Murray, Social Credit standard-bearer, cast their ballots.  
George Hills, CCF candidate, who has been out of town for the past two days, is not expected at the polling station until late this afternoon.  
The three other candidates talked and met the many voters who began flocking to the polls in great numbers after the stores closed.

### MACHINERY WORKING

Returning Officer A. Bruce Brown had everything in readiness, and all deputies were in their places by 8 a.m. except one, who did not arrive until almost 8:30.  
Lateness of her ballot box inconvenienced three voters, but otherwise the entire set-up was working to perfection.

A record vote is forecast, especially with the bright warm weather attracting many persons to the polls who might otherwise not have ventured out.

Outcome of the election will not be known until after polls close at 8 p.m., Pacific Daylight Saving Time.

First person to complete his ballots this morning was William White of the Department of Transport. He and John W. Eastwood, also of the transport department, voted before going to work.

**Mr. and Mrs. Peter Montehal** were the first couple to arrive at the polling station and they, too, completed voting before a large group of night workers arrived on the scene.

Throughout B.C., 798,376 persons are eligible to vote and early reports said the weather throughout the province was good and indications pointed to a big vote. In the 1949 provincial election, 73.65 per cent of the eligible voters exercised their franchise.

## Gas Pipeline By Mid-1954

**OTTAWA**—The Board of Transport Commissioners was told yesterday that Westcoast Transmission Company, Ltd., can complete by mid-1954 its proposed natural gas pipeline to Vancouver and northwest United States from the Peace River area in British Columbia and Alberta.

Charles R. Hetherington, representative of the engineering firm, made the statement during the board's hearing of a Calgary company's application to build the pipeline.

Mr. Hetherington, speaking for Westcoast Transmission Company, said if the board approves its application the company is confident of approval by the U.S. Federal Power Commission for its pipeline into Washington and Oregon.

Hearing continues today and the transport board ruling is expected before the company goes before the U.S. commission next week.

Mr. Hetherington said natural gas markets in lower British Columbia and the mainland are not sufficient to warrant building the pipeline unless it can be extended to the U.S. Pacific Northwest area.

# Officer Killed In Mine Explosion Near Rupert

## CCF Makes Gains, Liberals Down In Saskatchewan

**REGINA**—Saskatchewan today started off its third stretch of Canada's only socialist-governed province.  
Premier T. C. Douglas' CCF government is stronger from yesterday's general election; the Liberal opposition is cut, and other parties are nowhere in the legislature representation.  
In gaining authority to extend his regime over this predominantly rural province beyond his first eight years, the 46-year-old Baptist minister who heads Saskatchewan's government took over 42 of legislature's 53 seats and hacked down Liberals representation from 19 to 11.

## Convict Stabs 9-Year-Old Girl Hostage

**CARLETON PLACE, N.Y.**—An escaped convict, Donald Snyder, 25, making a desperate effort to seize a getaway car, stabbed a nine-year-old girl hostage to death yesterday as police closed in on him.  
Hit by three police bullets, the convict surrendered and was taken to hospital.  
His victim, stabbed with a butcher knife as the mother looked on, died an hour later.

## IWA Threatens Strike By Saturday Midnight

### 200 Columbia Cellulose Loggers Would Be Affected

The conciliation board majority report aimed at settling the dispute involving 32,000 B.C. loggers has been rejected by the International Woodworkers of America.

The report, made public yesterday, recommended no wage increase for loggers and sawmill workers who are seeking a 25 cents hourly increase.

Operators, who originally asked for wage cuts, said today they were willing to reach a settlement on the basis of the majority report.

The IWA has threatened to strike at midnight Saturday, when the present contract with 163 coast lumber operators expires, unless its demands are met. Current basis wage is 1.29¢ cents an hour.

J. Stewart Alsbury, district president of the IWA, said at Vancouver today that the majority report was "rejected unanimously" by the policy committee, according to Canadian Press.

He said also that returns from a union-conducted strike vote indicated nearly all members favor a walkout to back pay demands. The IWA asked that a government supervised vote be held tomorrow.

**Time does not permit conducting such a vote before the Saturday deadline, a spokesman for northern operators told the Daily News this morning, adding:**

"If the union calls a strike before a government-supervised vote is taken, it will be an illegal strike calling for severe fines to union officials."

Among operations which would be closed by a strike are camps at Terrace and another one just north of Rupert of the Columbia Cellulose Company. More than 200 men are employed at the two operations.

A company spokesman said, however, that enough logs are now on hand to continue operation of the Watson Island pulp

## Bandits Take Over Hotel, Rob Guests

**NEW YORK**—Three bandits took over operation of the mid-Manhattan hotel for three hours before dawn today, systematically robbing at least 25 guests who were entering or preparing to leave.  
One took over the telephone switchboard, another operated the elevator, the third ran the desk.  
The manager and small staff were locked in a room.

## 'Copters to Be Used in Rescue Work

**OTTAWA**—Six big helicopters for use in Search and Rescue work in Canada are expected to be delivered late in the summer of 1953, an RCAF spokesman said Wednesday.

The helicopters, made by the Piasecki Helicopter Corporation near Philadelphia, are ordered for an estimated \$2,436,000.

It is expected two of the new craft will be stationed near Vancouver, one in Whitehorse, Y.T., or Edmonton, one at Trenton, Ont., and two at Greenwood, N.S.

## One Injured as Pair Attempt Demolition

By LARRY STANWOOD

The body of a 42-year-old Royal Canadian Navy mine disposal officer is being flown from Prince Rupert to Esquimalt today, after he was killed last evening in a mine explosion near here.

Another man was injured.  
Lt. Cdr. Edward Borradaile of Victoria died instantly when a mine he and Petty Officer Donald Ross, 30, were attempting to demolish exploded on the beach of Bonilla Island, 70 miles south of Prince Rupert.

The injured man is in "good" condition in hospital, suffering a lacerated leg.

The two men arrived in Prince Rupert from Victoria Tuesday night to investigate a report that a mine was found, washed up on the beach, a Navy spokesman told the Daily News.

The men left early yesterday aboard RCMP launch "PML15" to investigate. In late afternoon, when the two men were working on the mine, "a violent explosion rent the air," said the spokesman.

In the wake, the officer was found dead; the other man bleeding from a leg wound.

A Queen Charlotte Airlines Norseman, piloted by Capt. Norman Jermyn, made difficult contact with the police launch and flew the injured man to hospital here.

An airlines official said extensive radio communication was used in a ground-to-air-shore network for a rendezvous with the police launch.

The Navy said in a telephone interview with the office of the chief of staff at Victoria, that the mine was reported last Saturday by a native fisherman, Robert Hill of Kitkatla.

He told the Navy he had sighted what he thought was a mine May 10, but had been out fishing and unable to reach Prince Rupert until last week-end.

The Navy spokesman said it was not known just how the officer was killed and the other man injured.

"All we know is there was a violent explosion,"

An inquiry by the RCN is expected.

Both Lt. Cdr. Borradaile and P.O. Ross are married. Their homes are in Victoria.

No opinion has been offered by the Navy as to what kind of mine it may have been. Further investigation will be carried out by RCMP here and Lt. Noel Langham, staff officer of HMCS Chatham, Prince Rupert.

The police launch returned today with the body of the officer.

## BULLETINS

**CLOUDY ELECTION IN B.C.**  
**VANCOUVER (CP)**—British Columbians at the polls today elect a new provincial government in mostly cold, cloudy weather. Some districts reported rain. Polls opened at 8 a.m. but voting slow during morning in most of the province.

**HUGE ICEBREAKER CHRISTENED**  
**LAUZON, Que. (CP)**—The icebreaker D'Iberville, biggest built in North America, slipped into the St. Lawrence River today. The giant vessel was christened by Mrs. J. C. Lessard, wife of the deputy minister of transport.

**LACK MANPOWER TO STEM RIOTS**  
**WASHINGTON (CP)**—The United States Army high command told Congress there wasn't enough manpower in Korea to control Communist rioters in the Kejo Island prison camp. Army officials said they were not prepared for outbreaks. This was disclosed today as the House of Representatives made public a censored version of testimony given Monday by Army Secretary Frank Pace and Gen. Lawton Collins, chief of staff.

## Hottest Action Waged in Korea

**SEOUL**—United Nations fighter-bombers and tanks today blasted Chinese Reds on two western front hills with deadly explosives and burning jellied gasoline, in support of attacking Allied ground troops waging one of the Korean war's hottest actions this year.

Stepped-up fighting broke out Saturday around Chorwon, 46 miles north of Seoul, when U.N. infantry captured two high points. The Reds have tried unsuccessfully every day since to knock the Allies back.

Both sides used tanks or self-propelled guns, artillery and mortars.

**Discuss Cold War**  
**WASHINGTON (AP)**—State Secretary Dean Acheson plans to discuss cold war problems with the British and French foreign ministers in London late this month, and may also visit West Berlin and Vienna to talk with German and Austrian leaders. Acheson plans to leave June 22 by plane for London. He is to receive an honorary degree June 25 from Oxford University.

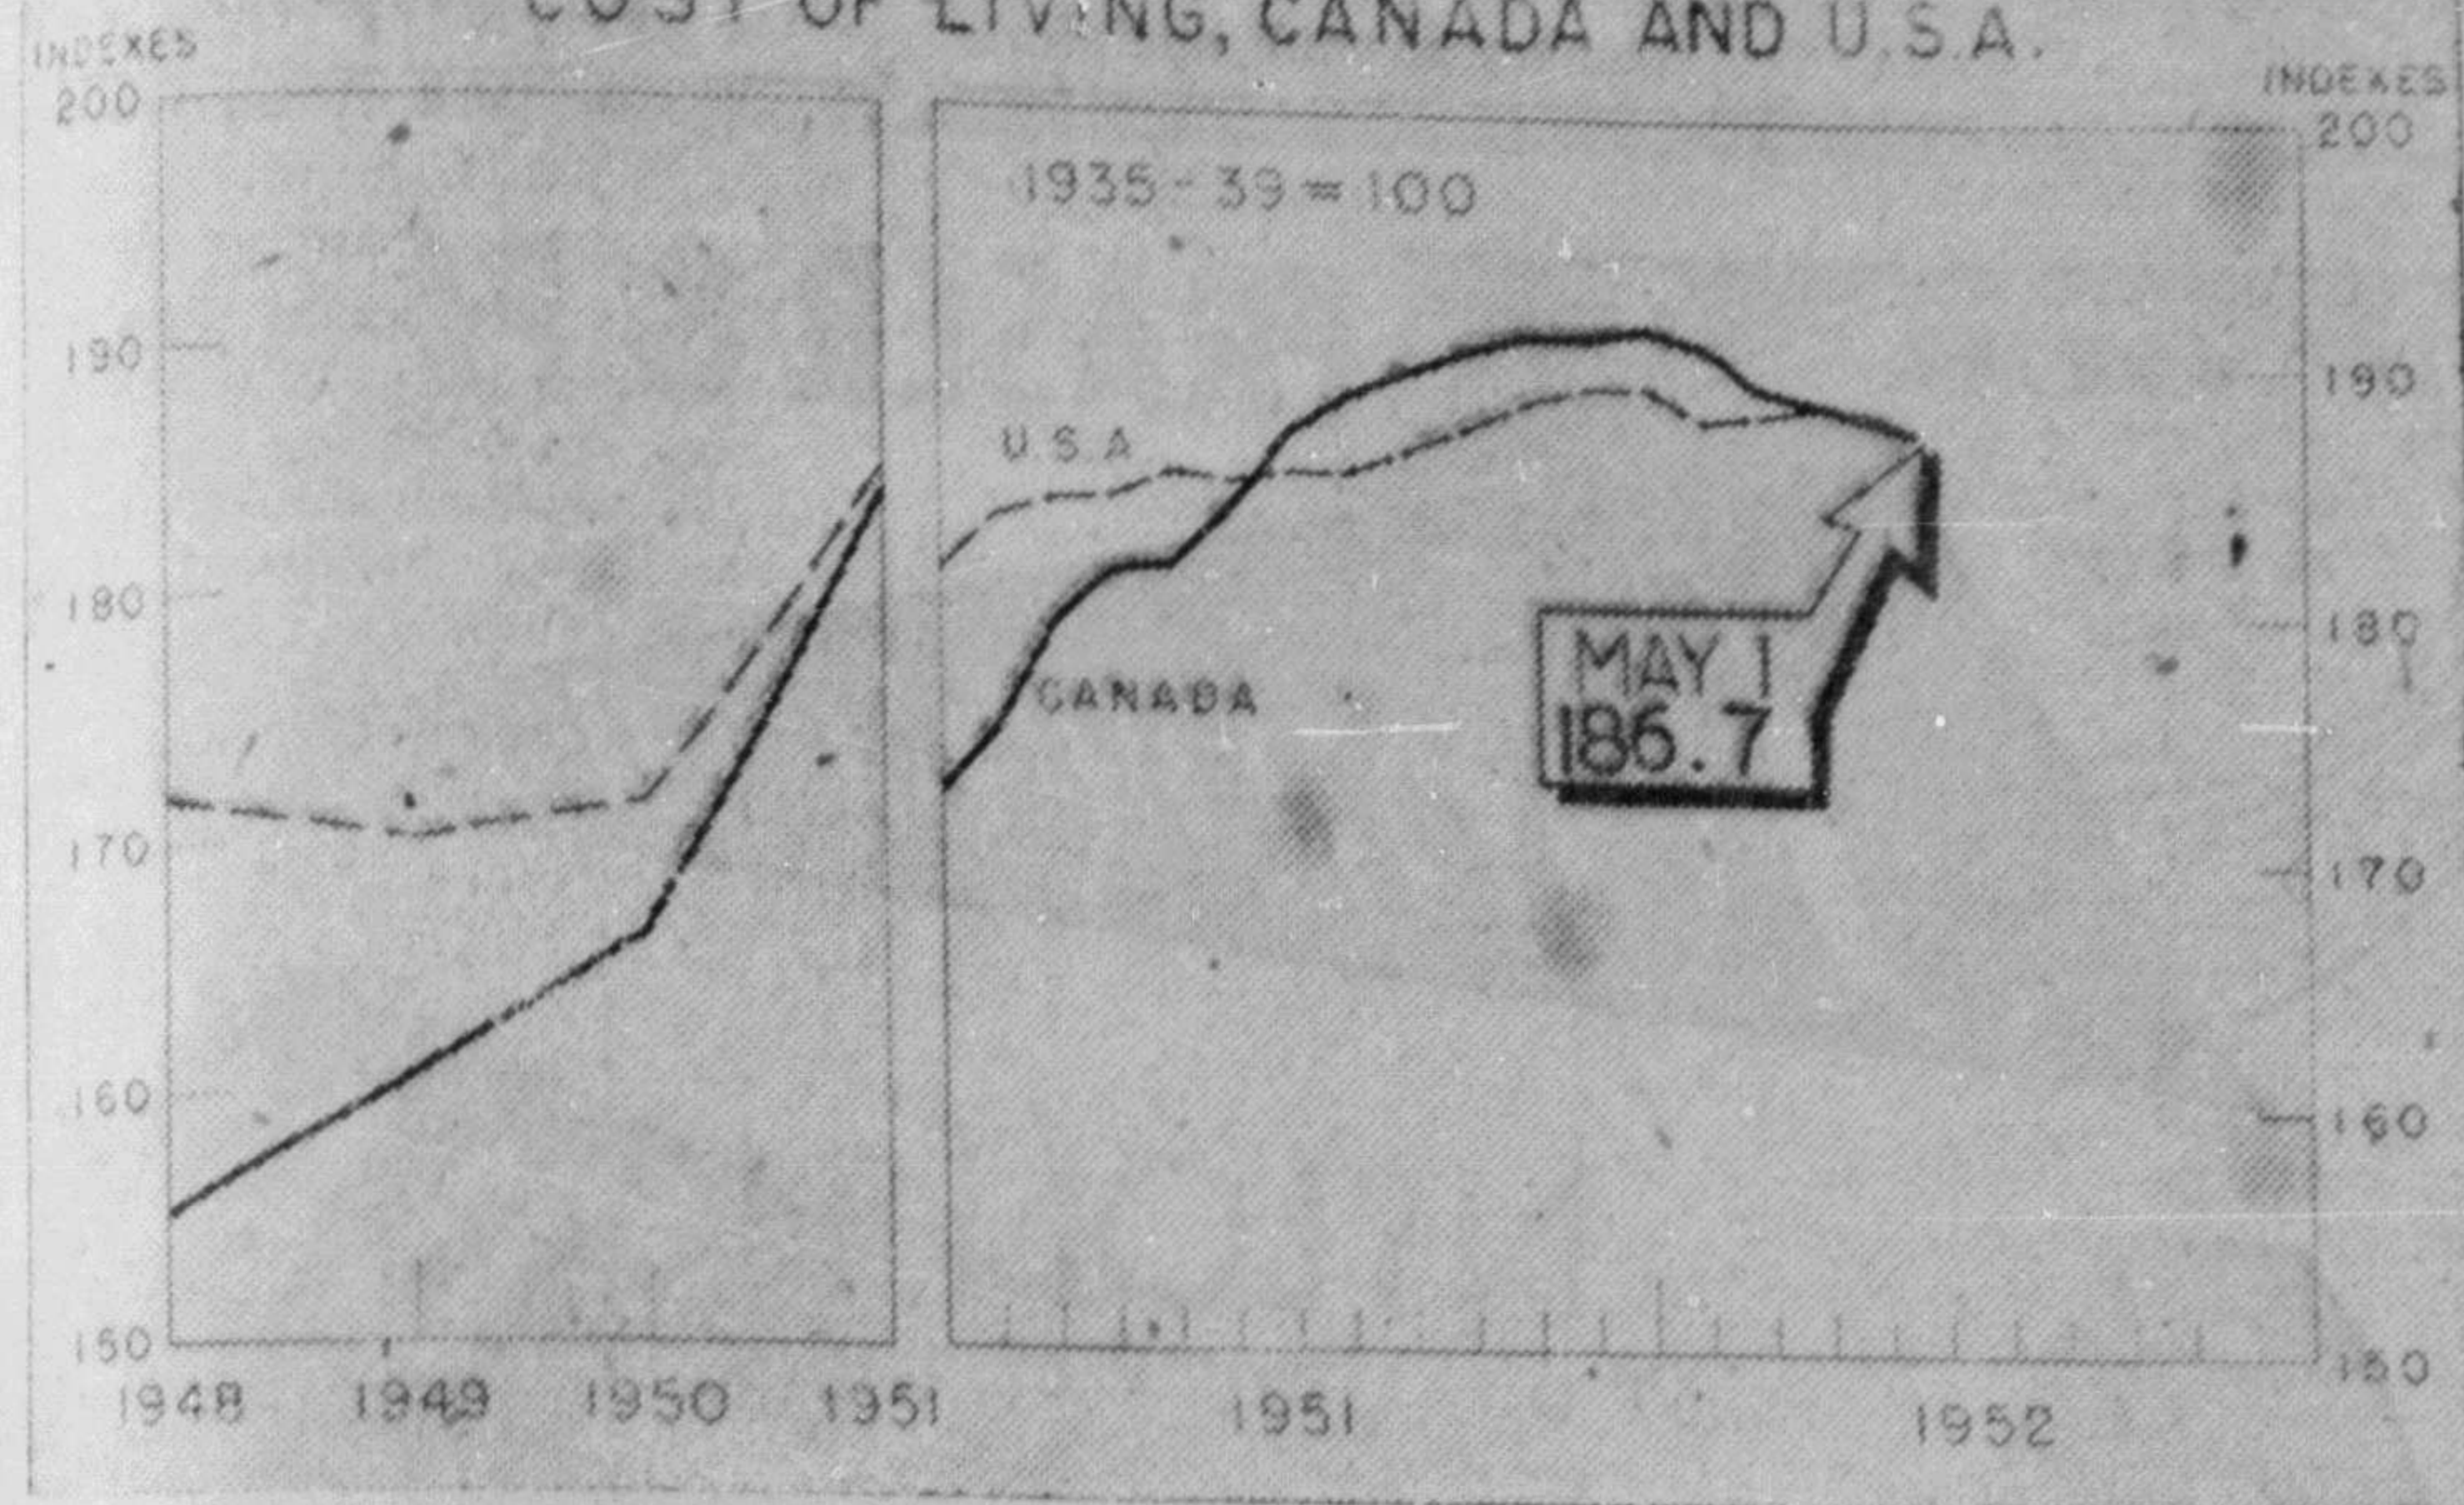

**Garfield Leaves \$100,000**  
**NEW YORK (AP)**—Actor John Garfield, at first reported to have died almost broke, left an estate valued at \$100,000. This estimate appeared on a petition for probate of the will, filed in Surrogate's Court. Garfield, who died of a heart ailment May 21 at the age of 39, left most of the estate to his widow, Mrs. Roberta Garfield. She was named executrix.

# COST OF LIVING, CANADA AND U.S.A.

**INDEX DROPS**—The cost of living index declined by two points during April to 186.7 from 188.7, the Bureau of Statistics reports. It is the fourth consecutive monthly drop in living costs from the peak of 191.5 last December. The drop in the index, based on 1935-39 prices equalling 100, virtually pushed prices back to where they were in June a year ago. The dotted line shows the United States Consumers' price index. These indexes measure percentage changes in prices in each country but should not be used to compare actual levels of prices between the two countries.

## Gerd Lien Married At Pretty Cathedral Setting

Beautifully-decorated St. Andrew's Cathedral was the setting for the marriage of Gerd Margaret Lien of Prince Rupert and Gerald Martin Harvey of Vancouver.

The bride is the daughter of Mr. and Mrs. Peter Lien and the groom is the son of Mrs. Beatrice Harvey of Vancouver. Rev. Canon Basil Prockter officiated at the rites, at which the bride was given in marriage by her father.

The bride's long-sleeved lace and net gown was posed over white satin. A fingertip veil was fastened to her Juliet cap and her only jewelry was a string of pearls. She carried a Colonial bouquet of mauve and white orchids.

The church was filled as she entered on the arm of her father, preceded by her attendants in pastel colors.

Matron of honor, Mrs. Betty Lien, wore a floor-length gown of pale green net and the bridesmaids, Miss Marie Skalmerud and Miss Enid Sedgewick, wore identical gowns, Miss Skalmerud wearing pink net over satin and Miss Sedgewick wore mauve net over satin. They all carried Colonial bouquets of carnations.

Little Cecilia Smith, flower-girl, wore an aqua blue long nylon dress and had on a poke bonnet. She carried spring flowers.

The groom's mother wore a navy blue formal print dress and a corsage of roses.

Mr. Arne Lien, the bride's brother, was groomsman and Mr. Harold Skalmerud and Mr. Bill McIntosh were ushers.

A reception was held at the Sons of Norway Hall after which Mr. and Mrs. Harvey left on their honeymoon. They sailed Sunday night in the Chilcotin for Vancouver and Seattle.

For travelling the bride wore a green suit, mauve accessories.

### Free Ice Cream Ends

BOSTON (AP)—An old Boston tradition ended yesterday—free ice cream for the youngsters on July 4th. Mayor John Hynes, father of four, said the city no longer could afford the annual ice cream parties in the city's 22 wards. He vetoed the council's request of \$53,000. "The situation in recent years has got out of hand," explained the mayor. He approved funds for the usual fireworks and band concerts.

**INDIA MINISTER**—Mrs. Rajkumar Amrit Kaur, a slight, gentle princess, has taken on one of the world's toughest jobs—health minister in the Indian government. She is the only woman member of Prime Minister Nehru's cabinet. She has announced three pilot birth-control projects will begin shortly in India in an effort to control increases in population. She is the only daughter of the late Raja Harnam of Kapurthala. CP Photo

Mr. and Mrs. Jack Christensen left on today's plane for Toronto to attend their son John's graduation in radio and television at the Radio College of Canada.

## UK Newcomer Thrives in West

CALGARY (CP)—Wild tales about trigger-happy cowboys and war-painted Indians of the old days don't faze Edith Collet, a recent arrival from Liverpool, England.

She finds western tales tame compared with her wartime adventures in England with an anti-aircraft battery.

Baseball is one thing that has captured the fancy of Miss Collet, recently appointed junior Red Cross field organizer for southern Alberta with headquarters in Calgary. Her English accent echoes through the stands at every game she attends.

Baseball is only one phase of Canada's life that Edith has found interesting. She was introduced to Alberta's special brand of square dancing at a giant square dance festival here and now she's all set to buy herself a flowered skirt and all the trimmings.

Miss Collet graduated from the University of Liverpool where she studied social science and town planning.

## Breakfast Clubbers Study Meet

The Credit Women's Breakfast Club met in a study group at the Civic Centre on Wednesday evening. The subject for study this time was "Customer Relations."

Mrs. Jocelyn Bolton, of Rupert Motors, introduced the speaker of the evening, Mary Turner, of Sheardown Super Valu.

With apt quotations from "How to Win Friends and Influence People" by Dale Carnegie, along with personal experiences to illustrate points and high lights, Miss Turner turned the subject matter in the manual "Credit Educational Course" into a lively and humorous discussion. The study group though serious in its intent (there are examinations to pass at the end of the course) gives the subjects at hand a lively twist.

Each meeting something new and of value in the business world is taken by each member. The next study group will be held in the Civic Centre June 25.

## Farmer Queen To Promote British Life

LONDON (Reuters)—The queen of Britain's farmers, Dodo Griffiths of Tregaron, Wales, has been chosen to promote British life and farming methods on a five-month goodwill tour of Canada and the United States.

Dodo, 21, voted "Rally Queen" by more than 1000 farmers last year, is one of six members of the national federation of 1353 young farmers' clubs who are making the tour.

The party will arrive in Quebec aboard the Cunard liner Samaria June 13 and will spend the first month of their tour as guests of the Junior Farmers of Ontario.

In the U.S. they will be guests of the 4-H Clubs and the Future Farmers of America organization.

Besides farming 27 acres and looking after 12 dairy cattle and 60 head of poultry, Dodo is a licensed auctioneer—thought to be the only woman livestock auctioneer. "At first I got extra bidding because farmers liked the look of me," she said today. "Now they have used to the idea."

## Halifax Appoints Catholic Teachers to Staff School

### Guides Blind Hubby on Trip

SYDNEY, N.S. (CP)—A blind war veteran and his school-teacher wife have left this Cape Breton city for Europe for a two-to six-month tandem tour of Spain, France, Germany, Poland and Italy.

It's not the first such jaunt for the plucky pair.

Dave (Dempsey) Ferguson, one of four brothers in the army in the Second World War, and his wife, Patricia, travelled about 3000 miles across Europe last year on a bicycle built for two.

It was at the small French village of Authie, near Caen, that Ferguson lost his sight in June, 1944, through a burst of German shrapnel. He met his wife, then a Red Cross nurse, while he was convalescing at Baker Hall, Toronto.

Ferguson took a course at the Canadian Institute of the Blind, learning typing and Braille. After their marriage, the couple registered at Victoria College and both graduated with BA degrees.

Later they travelled through London, Paris, Glasgow, Nice and Amsterdam. Pat steered the bike and gave Dave a running commentary on the scenery and people.

For travelling they usually wear Indian buckskin jackets

HALIFAX (CP)—Halifax school board, after considerable argument, last night approved the appointment of five Roman Catholic sisters from a teaching order to the staff of a new school to be opened this fall.

The vote, on a motion made by a Jewish member of the board, was 7-4.

The five sisters will be transferred from other schools and their positions filled by Catholic lay teachers.

Manuel Zive, who made the motion, commented: "Two things dangerous to argue are religion and politics. We have had peace for almost 100 years. Let us not do anything to upset that peace."

When another commissioner questioned the legality of the move and suggested a check with the city solicitor, Mr. Zive replied: "Asking for a legal opinion would be a delaying action. Anyway, I'm glad we Jews don't have to have separate schools."

They bought at the Calgary Stampede on a bicycle tour of Canada.

Their English-made bike has three gear shifts, is equipped with water tanks, sleeping bag and luggage carriers. On their trips they average about 12 miles an hour.

Following their last European tour, the Fergusons showed slides of the trip at various halls here. Folks hope the couple will be back this year.

## X-rays Urged For Heavy Smokers

By FRANK CAREY  
CHICAGO (AP) — Twice-a-year X-ray examinations for middle-aged men who are heavy smokers were recommended today by a Washington, D.C., doctor as a means of improving the attack on lung cancer.

Declaring that there is a high proportion of lung cancer among heavy smokers than among non-smokers, Dr. J.J. Winthrop Peabody said he believes such an X-ray procedure would assure spotting any such cancers early enough to allow successful surgical operation.

"Until this is done," the Georgetown University doctor told the annual meeting of the American Medical Association, "mortality (from lung cancer) will continue to be high."

### New Posts For Railroad Men

MONTREAL—Three senior appointments in the passenger traffic department of the Canadian National Railways were announced here Wednesday by O. A. Trudeau, general passenger traffic manager.

Chief of the passenger tariff and ticket bureau, H. C. McLaren, has been appointed manager of the bureau at Montreal. Leo J. McCarthy was appointed assistant to the general passenger traffic manager, and Leo P. Coady has been named special passenger agent at Montreal. All three have had extensive experience in the passenger department.

85 percent of people who have it. He declared the diagnosis can be made early in the disease, even while in the "silent stage" or when cough is the only apparent symptom.

In another report to the meeting, two Chicago doctors said allergic diseases are apt to develop in children of parents who themselves are sufferers from allergies—and that therefore the children should be shielded from substances capable of producing allergic reactions.

They said that in such families, dogs and cats should be removed from the home, lest the children get a reaction from

their fur; stuffed toy animals, heavy drapes and bedroom carpeting should be avoided; and mother should even watch the type of cosmetic she uses to make sure it does not contain a chemical derived from a certain form of iris plant.

Doctors Leon Unger and Albert Under said youngsters showing any evidence of allergy "should be advised to avoid becoming farmers, bakers, furriers, upholsterers, grain mill workers, florists or workers around animals."

"It is easy to avoid these occupations," they said. "It may be difficult to change when an adult."

**FISH STORY**—Five-year-old Tim Malvinczky of Calgary has already felt the heady thrill experienced by veteran fishermen, making a truly big catch. He stands proudly beside the 25-pound, 41-inch pike he hooked in the Bow River near Calgary. He held on to it until help came to land the big battler. (CP PHOTO)

## New Machine Keeps Babies Alive Though Heart Stops

TORONTO (CP)—An artificial heart-lung machine devised here has successfully kept a baby alive for five hours while the heart was stopped.

The machine, considered the most in the world likely to be used extensively to take over the work of the human heart and lungs during treatment, was shown on exhibition today at the American Medical Association annual convention in Chicago.

It is the work of eight experts led by Dr. W. T. Mustard, Dr. A. L. Chute and Dr. John B. All of Toronto. It comes in two main sections: a pump and a lung.

The heart, entirely mechanical, was devised by Campbell, a controller of the Banting Institute. It is produced commercially by the Eldorado Company of Port Hope, Crown Prince, which also makes the atomic bomb used in the treatment.

The lung part is simply a pump for the blood. No successful mechanical lung has yet been made.

The machine has been used in eight babies while their hearts were stopped. Although the attempts to correct their conditions failed surgically, the artificial heart-lung machine kept them alive though their hearts were stopped.

## Russian Children Can't Get Enough Toys and Clothes

By THOMAS HARRIS

STOCKHOLM (Reuters)—Russia's leaders, busy with the cold war, are forgetting the children.

Toys, children's clothing, nursery furniture—all the things which make a child happy—are becoming increasingly scarce in the Soviet Union.

Readers, and even officials, are writing to the papers complaining about it.

The output of children's footwear, one labor leader wrote, was only 76 per cent of the volume planned. Output of children's stockings was only 74 per cent of the quota.

The Moscow area, formerly a big supplier of children's goods, cut down its output of school children's equipment and stopped making clothing for children under school age.

Leningrad area, which produced "thousands of high class children's goods before the war," now is importing them.

In the outlying republics themselves, things are worse. "In the Ukraine," the labor leader wrote, "one would think that children had lost all interest in toys."

**NO PRODUCTION**

Reasons given for the shortage of children's goods are:

There is no real central planning for the production of children's goods. Manufacture is the responsibility of the local industries' leaders and they are often indifferent.

The local industries are asked to produce children's goods to a certain value each year. Many factories take the easy way and produce shoddy, expensive goods.

The toy industry—and children's goods industries in general—are badly located, and dispersed in widely separated areas, making distribution difficult.

Many provincial towns lack children's goods stores so that the manufacturers receive little guidance on customer needs.

Raw materials are scarce and all the available evidence reaching here points to this being a major reason for the toy shortages.

All the controlled newspapers assure readers that the state is planning improvements. But no one says when the improvements will take place.

British Columbia uses \$1,400,000 of chlorine, \$900,000 of sulphur and \$450,000 of caustic soda annually in the manufacture of pulps.

## Jasper Opens Doors to Landslide of Tourists

JASPER—Opening day of the summer season at Jasper Park Lodge, famed Canadian Rockies resort, was officially today, but it actually began two months ago, when Harold Gunning, manager of the lodge, arrived. Since that time, Mr. Gunning has been busy supervising the refurbishing of the village of log bungalows and the main lodge to have everything in readiness for the arrival of the first guests of the year.

Some maintenance work has been carried on all winter by the small year round staff, but springtime activities have been many. All of the furniture which had been stacked and covered for the winter, had to be cleaned and placed in position; rugs unrolled and cleaned; walls, ceilings and floors cleaned and some of them refinished; draperies cleaned and rehung; household linen and dishes for the 650 guests accommodated at the lodge put in order; electric light bulbs replaced in all the fixtures and lamps after these had been cleaned; the summer staff of more than 400 assembled and new members trained for their duties.

About a month ago, the gardening staff began the outdoor planting of the flower beds and rock garden which beautify the spacious lawns in front of the main lodge and the bungalows. The hanging baskets and flower boxes brightening the porches and the potted plants for the interior of the lounge in the main building were coaxed to bloom in time for the opening. In the

## G.B.S. Letters Go on Sale

LONDON (AP)—Some of George Bernard Shaw's letters to Mrs. Patrick Campbell, the noted actress who was his great friend, go on sale June 23.

One of the letters was written after an apparent quarrel. For in it the dramatist says: "Very well, go, the loss of a woman is not the end of the world. The sun shines; it is pleasant to swim; it is good to work; my soul can stand alone. But I am deeply, deeply, deeply wounded."

Shaw had said concerning his correspondence that "there can be no question of publication in our case until Charlotte's (his wife's) ashes and mine are scattered."

The Shaws and Mrs. Campbell now are gone and Mrs. Campbell's grandson, Patrick Beech, is offering the first series at Sotheby's. The firm describes the letters as "the most important and extensive series of Shaw letters ever offered in these rooms."

The letters cover the whole period of the friendship between Shaw and the woman who, he said, "picked the work of nature to pieces and remade it whole heavens finer."

## Kits for Asian, Latin American Midwives

The United Nations International Children's Emergency Fund (UNICEF), is supplying 2000 midwifery kits to countries in Asia and Latin America. The kits (as shown above) will be used by village midwives on whom women in those parts of the world are almost wholly dependent. For the first time these kits will have at hand the essential instruments, medicine and material for modern midwifery practice. They weigh about fifteen pounds, and can be carried on the midwife's back or separated and carried by hand.

Prince Rupert Daily News  
Thursday, June 12, 1952

## US Troops Hunt For Missing Koje POWs

By The Canadian Press

KOJE—United States troops hunted today for missing comrades of 339 frightened anti-Communist prisoners of war who broke away from 4,800 marching Reds.

The breakaway came during an otherwise orderly evacuation of the fourth trouble-ridden POW enclosure at the United Nations prison camp.

The anti-Red POWs said the missing prisoners had been halted before Communist kangaroo courts, before today's transfer. They didn't report the number.

Death at hands of their liege-lords was the fate of 16 POWs missing from an enclosure emptied Wednesday.

Camp Commander Brig.-Gen. Boatner expected to order the evacuation of the fifth compound, No. 66, tomorrow. Some 2,700 ugly-tempered North Korean officers and 650 non-coms there are reported fashioning knives and spears.

## Premier Supports Gas Pipeline To B.C. From Alberta

Special to The Daily News

VICTORIA—Provincial government support of the application of the West Coast Transmission Company to the Board of Transport Commissioners in Ottawa for permission to construct a natural gas pipe line from Alberta and the Peace River district of British Columbia has been given by Premier Byron I. Johnson.

The West Coast Transmission Company's application involves the expenditure of more than \$100,000,000 on a pipe line that would first serve British Columbia before servicing other areas in the Pacific Northwest.

It likewise will enable gas wells in the British Columbia Peace River section to utilize the piping facilities so that wells brought in, in that area, will have a ready market.

ney, chairman of the Board of Transport Commissioners, by the premier, after consultation with all members of the cabinet, reads as follows:

"On behalf of the government of British Columbia I wish to express our support of the application of West Coast Transmission Company to transmit natural gas from Alberta and the Peace River district of British Columbia through the Pine Pass and the interior of British Columbia to the lower mainland and the Pacific Northwest generally.

"This route was endorsed by a resolution of the British Columbia legislature as being in the best interests of the Canadian people and British Columbia in particular.

"Trust that the representations we are herewith making will be given serious consideration by you and your fellow commissioners when arriving at your decision."

## LAST RESORT

A species of moss or lichen growing on rocks in northern Canada, "tripe de roche," was often used by hungry Indians and fur-traders.

## Bigamist Not Suspected by Legal Spouse

GLASGOW (AP)—A trusting Glasgow wife said her husband slept away from home for 11 years "but I never suspected the truth."

The truth turned out to be that mailman Peter Miller had set himself up a second home—complete with second wife.

At first he used to tell his legal wife he was staying with friends for the week-end, then it was every night of the week.

"But every morning about 10 o'clock, he would arrive home and make breakfast," his legal wife said when Miller was charged with theft and bigamy in Glasgow Sheriff's court.

"He was a very good man in he house. When I used to complain about him not coming home at night, he threatened to leave altogether, so I just said nothing at all about it," the legal Mrs. Miller said.

Miller gave his legal wife £3 a week, his other wife £4 and kept the odd shilling for himself.

He might never have been caught if he had not started robbing the mails, "to give these ladies some little extra benefits," his counsel said.

Miller was jailed six months for bigamy and stealing £40 out of mail packets.

## THE ROUND-UP

By GAYLE TALBOT

**YORK**—It would have been a remarkable and profitable season for the New York Giants had they not lost Willie Mays to the Army. The National League champions will be lucky to have only temporary.

Things about baseball are difficult to explain, and the role this joyous boy with the high-pitched voice played in the day-by-day life of the Giants is one of the transcended by a great deal of the importance of his batting and fielding, good as they were.

**Was Sort of a Mascot**  
The Giants adopted Willie, and he became a sort of mascot, a win symbol. The veterans of the clubhouse when he ran out under his cap on the bases looked like a bumpkin in a locker room, but when he wasn't around they told he was making catches out of the field and throws to the outfield probably never excelled, if not, in the history of the game.

None of this explains why the Giants figured after an emotional reaction

## Sauer Belts Three Homers for Chicago

**YORK**—Hank Sauer of Wrigley Field Wednesday belted three tremendous home runs to account for all of the runs in their triumph over Philadelphia Phillies.

Sauer's clouts raised his output for the season to 18 and in his runs batted in ledger a top production figure in the league.

Cub destroyer has whacked eight home runs this month in only two games behind pace set by Babe Ruth in when the Yankee immortal belted a record of 60. Ruth led his 18th homer in his game. Cubs have played 50, marked the second time

## Jolting Jake Takes Decision

**DETROIT**—Jolting Jake Lamotta barged past Irish Bob Murphy's left hook in a savage ninth and tenth round comeback assault to win a 10-round unanimous decision Wednesday night before a near sellout crowd of some 16,000 fans.

Lamotta weighed 169½ and Murphy 175½.

Sauer has hit three home runs in one game against Simmons, a major league record.

Home runs also figured in the only day game in the American League, the pace-setting New York Yankees clubbing Detroit Tigers 7-2, with Joe Collins socking two homers and Yogi Berra one to lead the way.

Consumption of paper products and standards of living are very closely correlated. Improved living standards demand increased volume of pulp and papers.

## Racing Begins Saturday at Lansdowne

(Special to the News)

**VANCOUVER**—This city's racing season will commence Saturday at Lansdowne Park where 10,000 fans are expected on inaugural day.

The Lansdowne Season continues for 35 actual days of racing winding up on July 31.

Official report that a bumper crop of the best horses in Western Canada and the Pacific Northwest are already stabled at Lansdowne and forecast that this will be the finest racing season here in years.

Among the many innovations this season is a double Quinella, the first one on the opening race each day, and the second one on the eighth and final race each day. This means elimination of the daily double, but officials believe the extra quinella will be popular and have installed special apparatus to speed mutual betting to a faster pitch than ever before.

A second innovation is in the printed program. For the first time locally, racing fans can buy a program which gives them past performances of each horse so the race can be studied beforehand.

Among the featured events during the first week are the Inaugural Handicap on June 14, the Lansdowne Handicap on June 18 and the Lulu Island Handicap on June 21.

## Baseball Scores

**American NIGHT**  
Cleveland 0, Washington 1  
Chicago 3, Philadelphia 5  
St. Louis 9, Boston 11

**National NIGHT**

## CYO Edges Motors in Soccer Competition

By J. S. WILSON

CYO scored a close win over General Motors last evening in a regularly scheduled North Star league game, eventually winning 6-5.

Motors opened the scoring when Bishop placed a penalty kick well clear of the opposing goalie. Corelli equalized within a few minutes only to have Bishop put his team ahead with a good shot following Robinson's well-taken free. Zilvermit got a neat equalizer and Terland put the CYO a goal up, and half-time found the CYO leading 3-2.

Phillips got a quick goal to make it 4-2 after a scramble in the goalmouth but Tait kept the Motors in the fight with a good goal. From Phillips' cross, Zilvermit netted one and Hank Nuyten made it 6-3 for CYO.

Murray narrowly missed, then following a corner well taken by Murray, Bowman reduced the margin. In another attack Matthews scored to make it 6-5. Bishop headed a beautiful shot that went just wide and then Matthews missed an open goal. At the other end Boulter was lucky when a hard drive hit the crossbar.

In spite of the large number of goals against him, Boulter did well. He was very unlucky with one shot that bounced badly but listed high shots clear and gathered the low ones. Robinson and Eby defended well. Bishop played a great game both defensively and offensively. He got two goals and used his head to good purpose. The forwards lacked team play in spite of getting five goals. Lien and Bedford did well. Tait was the best forward.

Maron kept a good goal for CYO and Eckert and Mohan tackled well and kicked strongly. The halfback line was hard to beat with Corelli shooting well and Letourneau turning in a fine game. Herrygers was good. The forwards were fast and dangerous with good ball control and combination.

## Women Organize Softball Team

A women's softball team has been formed as a counterpart of the CCC 300 Club, organizers said today.

Tonight, a practice will be held at Algoma Park, on 11th Avenue, across from McClymont Park.

Miss Margaret Gagnon, manager of the ladies' team, said all prospective women players would be welcome to the practice. Players do not have to be employees of Columbia Cellulose Co. Ltd., the club is only acting as sponsors for the team.

Two teams are to be formed, to be selected from players who turn out tonight, Miss Gagnon said.

Initial planning is to have practices and games alternately each Thursday. It is also planned to arrange a game between a Terrace women's ball team, recently formed.

## Number One Softballers Down Smokies

The nameless team of softballers—No. 1—last night downed Firemen 18-11.

Firemen got off to an early lead, scoring six runs in the first inning and two more in the second, leading 8-1 at the end of the second. They could not hold it, however, as No. 1 slowly, but steadily, whittled down the top-heavy lead by scoring three runs in the third, fifth and sixth innings, tying up the score 10-10 at the end of the sixth.

Art Olsen, the losing hurler, pitched a steady game but lacked support in the field. Don (Continued on Page 8)

## Terrace Hi Wins Second Year at Hazelton Track

TERRACE.—Terrace High School won the senior cup for the second time in two years at the Hazel track meet held Monday. Huston Superior School took the intermediate and junior cups.

## Alaskan Cities Feel Pinch of Shipping Tieup

JUNEAU, Alaska (CP)—Growing shortages of food and supplies in several Alaska towns were reported yesterday as a result of the west coast shipping strike.

Some business men, awaiting supplies after a seven-month cut-off of ships during the ice pack season, wired an appeal to the Sailors Union Pacific (AFL). Officials of the island town of Sitka asked Gov. Ernest Gruening to try to get the Sailors Union to provide emergency service.

Shortages also are reported developing in Juneau and Ketchikan, two main cities of southeastern Alaska.

In a telephone call from Ketchikan, James G. Pinkerton, chairman of the Port of Ketchikan Committee, denied there was any shortage of supplies in that city.

Mr. Pinkerton said the city was "adequately provided" by chartered small boat service from Seattle.

Officials at Sitka report the

Individual trophies were won by Terrace pupils as follows:

### Senior

Girls high jump—Lea Cuthers.  
Boys high jump—Vance Johnstone.  
Girls broad jump—Gladys Gridland.  
Boys broad jump—Robin McColl.  
Girls 100-yard dash—Deanna Rolph.

### Intermediate

Girls broad jump—Gladys Gridland.  
Boys 75-yard dash—Alvin Peters.

### Junior

Girls broad jump—Lorraine LeFueo.  
Boys broad jump—Robert Melair.

town's supplies of eggs, potatoes and dairy feed are exhausted and there is meat for only four days.

The strike which has knocked out Alaska Steamship Co. service is against the Pacific Maritime Association, which represents Alaska Steamships in labor negotiations.

Alaska Steamships is the only major U.S. line that serves southeastern Alaska and Nome in the northwest.

**SMALL BEGINNINGS**  
Total railway mileage in Canada in 1880 was only 2.07 miles, mostly in separate divisions.

## Changes in Navigation Aids in Kemano Area

Pending issuance of Notice to Mariners covering the establishment of permanent Aids to Navigation to replace temporary aids established last December in above area, the following changes are announced by the Department of Transport.

1. **MONEY POINT** (Douglas Channel)—Height increased and light moved closer to High Water mark.

2. **GERTRUDE POINT** (Douglas Channel)—Light moved approximately one cable North of former position.

3. **EMILIA ISLAND** (Douglas Channel)—Height of light increased.

4. **KERSEY POINT** (Junction of Douglas and Devastation Channels)—Height increased

and beacon moved out to High water mark.

5. **ANDERSON POINT** (Devastation Channel)—Light transferred to Northern point of Dorothy Island for better visibility for shipping bound both ways.

6. **STANFORTH POINT** (Junction of Devastation and Verney Passage)—Height increased and light moved closer to High Water mark.

7. **CHANNEL ISLAND** (Gardner Canal)—Height increased.

8. **LOW POINT** (Gardner Canal)—Height increased.

9. **BOLD POINT SOUTH** (Gardner Canal)—Light unchanged.

10. **DOUGLAS POINT** (Gardner Canal)—Light moved out to half tide rock at end of point

NUMBER ONE  
(Continued from page 7)

Scherk, winning pitcher, struck out nine and had solid field support.

Buster Hill and Ralph Enridge were the big guns for Firemen as they collected three and two hits respectively.

Glen Carlson got the longest hit of the game, a screaming triple down the left field line.

Gordon Cameron and Bill Morrison were sluggers for the winners, each picking up three

for better visibility.

11. **MARY POINT** (Verney Passage)—Light moved approximately two cables in South-Westerly direction from former location.

12. **MOODY POINT** (Boxer Reach)—A new day beacon established.

13. **THOMKINSON POINT** (Ursula Channel)—Height of light increased.

Operation Work Calls For Experts

By BILL BOSS  
Canadian Press Staff Writer

SEA, ABOARD HMCS  
ATHABASKAN—(By Mail)—In  
compact community every-  
one counts.

Every man of the 270 aboard,  
matter how minor his rating,  
the satisfaction of seeing  
work reflected in the per-  
formance of the whole.

It doesn't seem so unimport-  
ant to the over-all task as you  
do in the Army.

Athabaskan represents a \$15-  
million investment, and keeping  
it functioning properly in all  
elements demands a highly-  
trained and specialized crew.

Electronic aids to gunnery  
navigation—which appar-  
ently have simplified seaman-  
ship beyond recognition—her  
power, which generate 44,000  
horsepower, her message centre  
through a variety of ra-  
dio links her with far-flung  
parts of the world simultane-  
ously call for special skills for  
operation and mainten-

ANCE  
almost any of the special-  
ized fields a Navy man gets  
more experience than his  
counterpart in civilian life.

Unlike his Army counter-  
part who is well behind the  
equipment going, and who  
is it when it isn't, is right  
with it. Wherever a ship  
is in an operational zone  
it is "front." And everyone  
connected with it is at the  
front.

Navy, then, watches its  
crew closely.

Every man is interviewed by  
divisional officer once every  
six months. Once every six  
months a report of assessment  
is put on him to both navy  
quarters and his home  
community. His aptitudes and service  
are noted. He is con-  
stantly reminded of the neces-  
sity to study and improve his  
performance if he is after promo-  
tion. He is made to feel that he

Nevertheless, as Commodore  
Hibberd, chief of naval per-  
sonnel, recently expressed it  
during his tour of destroyers in  
the Far East:  
"The men must be sailors first,  
officers afterward.  
The officers must be leaders,  
not interested in their quali-

ties first, then their qualifica-  
tions."

LEADERSHIP FACTOR

With good leadership Hibberd  
feels that he can keep the right  
men interested in Navy life and  
see that they get the courses for  
which they are best suited.

Theoretically, Navy men are  
professionals, ready to go where-  
ver the country sends them.  
But almost every Athabaskaner  
with two Far Eastern tours un-  
der his belt feels he has "done  
my bit for Korea," and trusts  
he'll not be on the third next  
autumn.

At heart, however, most of  
them love the life, every mo-  
ment of it, from "wakey-wakey"  
at 6:30 a.m. to turning-in time,  
whenever that comes.

Between work, meals, train-  
ing classes and other activities,  
some men get no more than  
four hours' sleep in a day. You  
see them, sometimes, sleeping  
standing up.

Most human moment of the  
day is just before noon when  
they muster on the quarterdeck  
for grog. Every sailor over 20  
is entitled to 2½ ounces of rum  
a day. It's the time for relaxa-  
tion and petty gossip.

Saddest moment comes half  
an hour later when the day's  
unconsumed rum ration is  
dumped overboard.

Gazette Discounts  
Beaverbrook Blues

BLACKPOOL, England (CP)—  
Lord Beaverbrook's recent claim  
that the future holds no place  
for him is taken with a grain  
of salt by the Blackpool Ga-  
zette.

In a broadcast, the 74-year-  
old Canadian-born publisher im-  
plied that after a long and busy  
life there is little left in store  
for him.

"Nothing helps me now," he  
said, "except the inheritance of  
much strength derived from the  
frugal lives of my Scottish for-  
bears, transplanted to the harsh  
and infertile soil of Eastern  
Canada."

The Blackpool Gazette re-  
gards this as something akin to  
crocodile tears. It comments:

"Phut! Likewise nonsense! If  
a brown-faced figure leaps on  
to the TV screen, eyes flashing,  
arms flailing, crackling with  
vitality, sizzling with impish  
humor and calculated indiscre-  
tion, it will be Beaverbrook on  
his 90th birthday," explaining  
why he no longer intends to  
career about the world . . ."

By W. R. WHEATLEY  
Canadian Press Staff Writer

Bugs, fire and disease take  
more out of Canada's forests  
than the pulp and paper indus-  
try uses in full-scale production.

Compilation by the News-  
print Association of Canada  
show that during the 10-year  
period 1940-49 pulp and paper  
production accounted for con-  
sumption of an annual average  
of 703,750,000 cubic feet of wood.  
But fire, insects and disease de-  
stroyed 739,000,000 cubic feet.

Depletion through require-  
ments of the pulp and paper  
industry is only one-fifth of to-  
tal depletion, which averaged  
3,500,000,000 cubic feet. Of this  
total, all commercial use  
amounted to 2,800,000,000 cubic  
feet.

The annual rate of regrowth,  
says the newsprint association,  
is not accurately known but is  
generally estimated to be at  
least equal to the average an-  
nual rate of depletion.

In total forest area, Canada  
ranks third of all countries in  
the world, exceeded only by  
Russia and Brazil. The Domini-  
on Forest Service estimates the  
Canadian forest area as 1,300,-  
000 square miles—about 37.1 per

cent of total land area—and  
classifies 712,000 square miles as  
being productive—that is, cap-  
able of yielding continuous wood  
crops.

Of this productive area, about  
484,000 square miles—slightly  
more than two thirds—is classi-  
fied at present as being eco-  
nomically accessible.

This classification is not a  
matter of geographical location  
alone. It depends on the es-  
timated financial return in re-  
lation to such costs as transpor-  
tation, fire protection and other  
items involved in opening forest  
areas.

Although Canada's newsprint  
capacity and production have  
expanded greatly, pulp and pa-  
per production has expanded  
more. Compared with pre-war  
figures, 1950 newsprint produc-  
tion is up 74 per cent. Produc-  
tion in other grades of paper  
and market pulps has increased  
147 per cent and 154 per cent,  
respectively.

In 1950, Canadian pulp and  
paper production was valued at  
more than \$954,000,000, with the  
newsprint production alone val-  
ued at \$507,000,000.

Need Social Workers

MONTREAL (CP)—Current  
shortage of trained social work-  
ers may become even more acute  
in the near future as enrol-  
ments in Canadian schools of  
social work are dropping. Dr. J.

J. O'Moore of the McGill School  
of Social Work said fewer than  
half of the first-year students  
at the McGill class would finish  
their two-year course because of  
lack of financial support for  
such students.

## The EXPERTS SAY...

By KAY REX

Young children in cities suffer most in hot weather, particularly if they must remain cooped up in stuffy housekeeping rooms and two-room flats.

One thing mothers can do is to arrange as many outings as possible to city parks, public gardens and nearby wooded areas.

None of these outdoor activities needs to be expensive. A ball will keep them occupied for hours—a football is best because it can never be kicked too far. Lunches for picnics can be made of the simplest foods—and they always taste better when eaten outside.

**Sandwich Spreads:** Peanut butter and banana; cold meat chopped with pickle and mixed with a prepared mayonnaise, lettuce and tomato; canned salmon mixed with mayonnaise.

Milk chilled from a thermos bottle is a refreshing cold drink.

Add chocolate sauce to provide a "party" touch for the little ones.

Fresh fruits (oranges are moderately priced) will be dessert top, d off either with cookies or a plain cake.

Here is a recipe for jam cake published by the Jubilee Guilds of Newfoundland and Labrador.

**Ingredients:** three-eighths cup butter or margarine; one-half cup raspberry or strawberry jam; one-half cup granulated sugar; one egg; one and three-eighths cup sifted flour; three-eighths teaspoon baking soda; three-quarters teaspoon baking powder; three-quarters teaspoon salt.

Cream butter and gradually add sugar. Beat until light and fluffy. Add jam and beat until mixture is well blended. Beat egg until it is foamy and add gradually to creamed mixture, beating thoroughly. Mix flour, baking powder, baking soda and salt. Sift together. Add dry ingredients alternately with milk, beginning and ending with dry ingredients.

Stir gently and quickly until mixture is well blended but do not over-mix. Spread in well-greased pan and bake in moderate oven.

The youngsters probably would also like these apricot balls: one and one-half cups dried apricots; one-half cup sweetened condensed milk; one cup fine shredded coconut.

Wash apricots and put through food chopper. Combine with rest of ingredients. Shape into balls one inch in diameter. Roll in fine sugar before serving.

And while we're remembering the young folks these hot summer days let us not forget the hundreds of old persons who must spend their time in tiny dim rooms. Any big city has hundreds of them.

Families fortunate enough to be living on farms, in small towns or in airy suburbs could do a lot to make the lives of the very young and the very old much happier. A week's vacation in the country or at a summer cottage would brighten the life of some youngster who now may share a third-floor flat with three or four brothers and sisters. It would also do much to gladden the days remaining to some old pensioner who hasn't much time left.

## Fisherman Reject Latest Price Offer

VANCOUVER (CP)—Union negotiators for 6000 B.C. fishermen have rejected a new price offer "as not worth passing along to the membership for consideration."

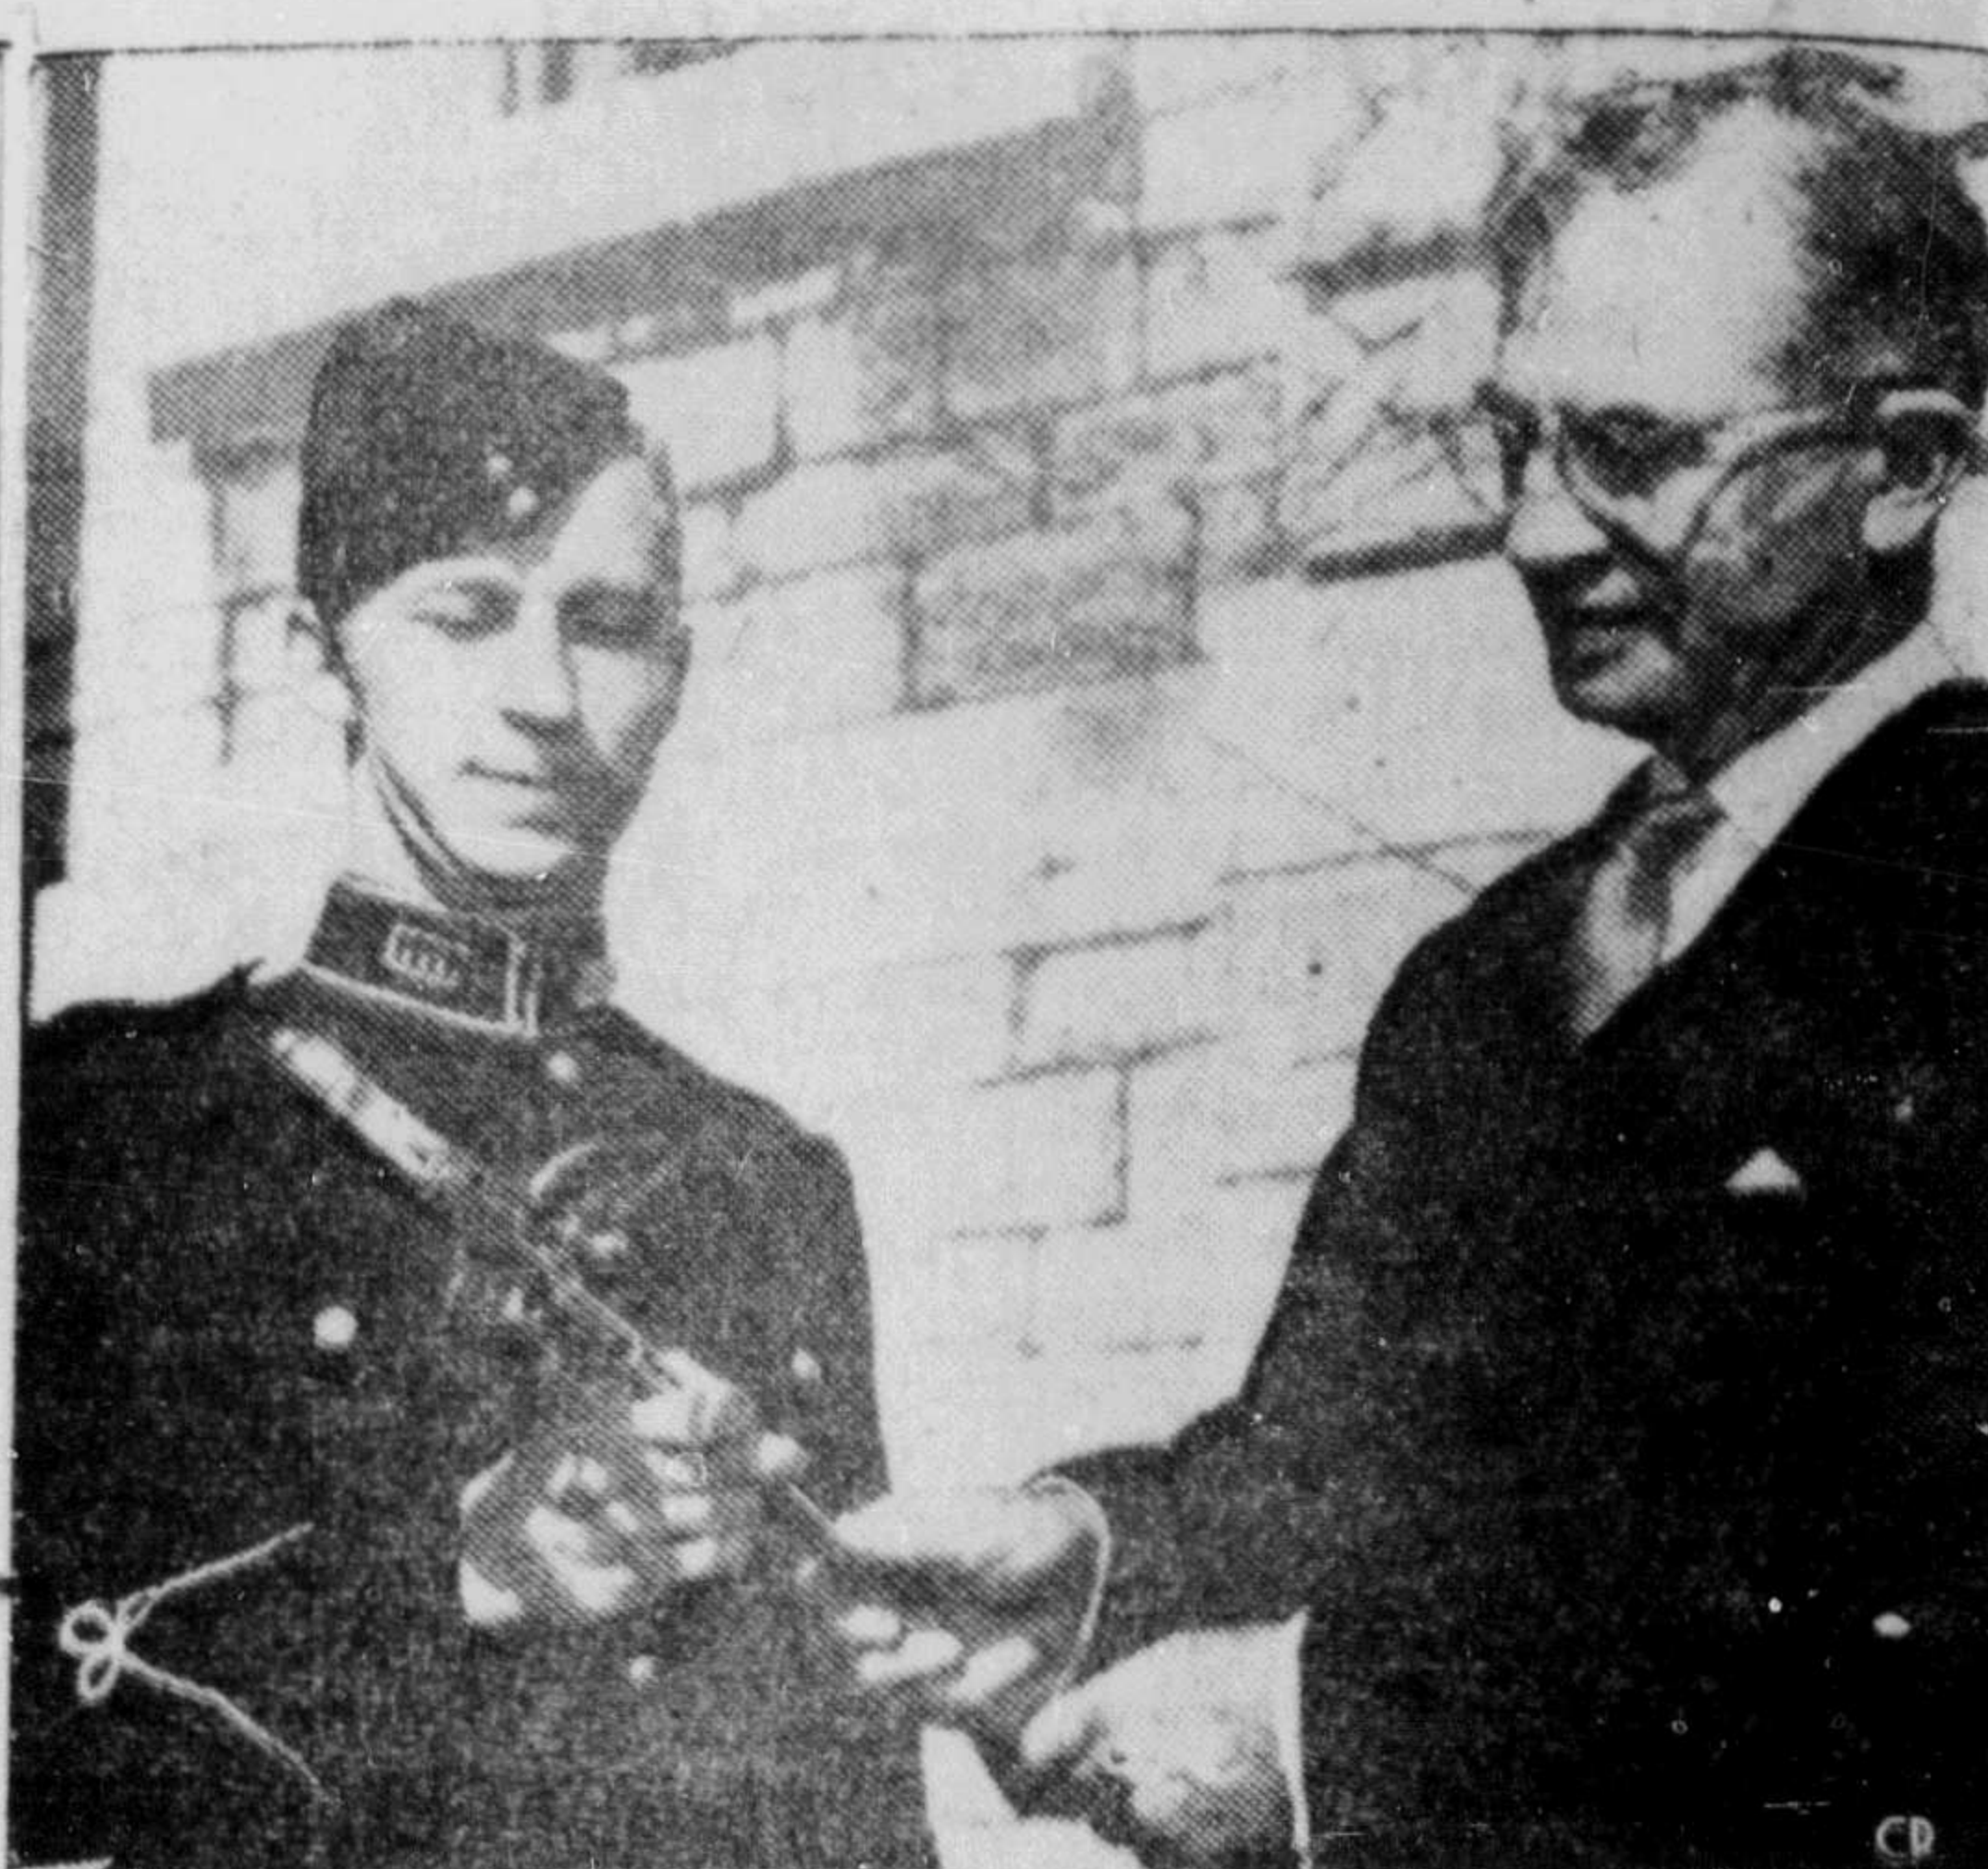

Members of the United Fishermen and Allied Workers Union (U.F.A.W.) have voted to strike June 22 unless a mutual agreement is reached on prices.

The new offer by the Fisheries Association of B.C., bargaining for the operators, was 25 cents a pound for sockeye—one cent more than the original offer.

Prices for other types of salmon are unchanged.

The association, in a statement Tuesday night, said "the fishing industry faces a most critical marketing situation because of the loss of the British market and closure of the export market as well as a drastic decline in competitive food prices in Canada."

It said there is still a large

**SWORD OF HONOR**—Science Minister Claxton presents the Sword of Honor to Cadet Wing Commander James T. B. Williamson of Montreal at the first post-war graduating class of the Royal Military College at Kingston, Ont. Cadet Williamson won the Sword for leadership, conduct and military deportment during his four years at R.M.C. Graduation diplomas also were presented to 63 cadets in a colorful ceremony by Mr. Claxton. (CP Photo)

## German Prisoners Always Busy In Ontario Wartime POW Camp

MONTEITH, Ont. (CP)—Inmates of the Monteith jail farm found many surprises as they tore down the barracks constructed here for a German prisoner-of-war camp during the Second World War.

So far they have found two home-made radios, numerous maps and a box filled with contraband materials hidden in the walls of the buildings.

The radios, about four inches square, were built from scrap including parts of combs, cigarette papers, nails, wire, flashlight bulbs for cells and small batteries. The tiny sets may have been capable of picking up the radio station at Timmins, 40 miles west of here. One prisoner of war used to repair civilian sets sent in to him and it is believed he converted parts of the sets for radios inside the camp.

The walls of one of the buildings demolished recently were found plugged with earth, obviously removed from a tunnel. Although the barracks buildings sat on posts and the ground under them was floodlighted, several escape tunnels were discovered by guards.

One tunnel under snow 3 1/2 feet deep was 150 yards long and reached the outside fence near a highway. It was discovered by a guard who strayed from a regular path and fell into it.

Several POWs were found in a tunnel pushed underground from one of the prisoner huts to a guard house containing the camp's supply of machine guns, Bren guns and ammunition.

In the later days of the camp a moat was dug around the compound to discourage the tunnelling.

stock of canned salmon unsold from last year.

Commenting on the company offer, union president Homer Stevens said: "It is so insignificant we are convinced it would not be satisfactory to the membership."

In reply, the Fisheries Association said the union stand "means the fishermen will not have an opportunity to vote on a vital issue which affects their livelihood."

Presently fishermen are voting on 26 cents for sockeye, 19 for coho, 17 1/2 for chum and 10 cents for pinks.

## Plan Schoolboy Tour of Canada

LONDON (CP)—Forty boys, selected by headmasters of secondary schools in Glasgow, Birmingham, Bradford and London, will leave Southampton July 21 for a two-week carefree tour of Eastern Canada.

The youths, ranging in age between 17 and 19, will make up the second past-war party to travel under the \$75,000 educational trust founded in 1933 by Walter H. Rhodes, wealthy Bradford textile manufacturer.

The party, sailing in the liner Samaria, is due to reach Quebec Aug. 8. After a trip through the historical citadel, brief visits will be made in Montreal, Ottawa and Toronto. The itinerary also calls for a night-seeing tour of Niagara Falls and a three-day stop at Camp Wanapiteon on Lake Temagami in northern Ontario. The visitors will return to Montreal and embark for home Aug. 20.

All the boys have been given a thorough briefing on Canada's background and provided with maps and illustrated booklets describing in detail the areas to be visited.

## Mrs. MacDonald Carey Puts On Blue Bonnet For F.N.E.

Mrs. MacDonald Carey puts on BLUE BONNET Margarine for F.N.E. Flavor, Nutrition, Economy! Like the famous screen star's wife, you will love the delicate, sun-soft taste BLUE BONNET adds to any food! You'll appreciate its nourishment, too. BLUE BONNET is Canada's fine quality, all-vegetable margarine. And you'll welcome the savings you make when you use BLUE BONNET for all your cooking and recipes as well as on bread. So buy BLUE BONNET, get F.N.E. Flavor! Nutrition! Economy! BLUE BONNET margarine is sold in two types—regular economy package with color water, and also in the famous YELLOW QUIK bag for fast easy use.

## Illegal Trade Aids Russians

LAUENBURG, Germany (AP)—A German anti-Communist group charged today that West Germans are helping Russian rearmament by huge illegal sales of goods to Soviet-occupied East Germany. Theo Lill, state chairman of the People's League for Peace and Freedom, estimated in speech here that \$83,300,000 worth of goods went from West to East Germany in illegal trade last year.

## CHANGE FROM COAL

Canadian factories in 1951 manufactured more than 86,000 oil burners for domestic heating purposes.

## Mounds Show Traces of Early Explorers

FLIN FLON, Man. (CP)—A rusted rifle barrel and five rounds of shot may help to shed more light on the early history of northern Manitoba and Saskatchewan.

The discoveries were made recently in the area southwest of Flin Flon and are believed to have been left by early explorers.

The mounds were found on the south shore of Beaver Lake. Square in shape, they are thought to be the remnants of cabins. Piles of rocks in the corners of the mounds indicate what used to be fireplaces.

Near the mounds are depressions in the ground that lead to

the theory canoes were buried there to protect them from winter frost.

The old rifle barrel was dug up from the shore of a nearby lake by a man who was leveling ground in front of his summer camp.

The barrel is 40 inches long, rusted and bent. It appeared to

be part of an old flintlock

use in the mid-19th century

made prior to 1850.

The exact location of the campsite is being withheld by authorities until the mounds have been fully investigated for their historical value.

They're Superb!

PICK THAT BRIGHT "SALADA" BOX

## Barbara Brent's BUYS AND WHYS

MONTREAL, June 12th—It's a rare day in Montreal when a tempting home-made cake doesn't bring whoops of glee from the family. And it's a rare cake indeed that isn't delicate, tender and moist if it's made with SWANS DOWN CAKE FLOUR.

M-m-m. Swans Down cakes make the good ones really sit up and take notice—and in a typical way, put himself on the look for his choice of wife. Because, you know, men love Swans Down cakes—and the girls who bake them. Swans Down Cake Flour is especially made for better cake baking. It's sifted and resifted 27 times as fine as ordinary flour.

**Want To Get Your Food Budget** out of the doldrums?... Wish you could spend less time in the kitchen?... Would you always like to be able to give unexpected guests something really good to eat? HEINZ OVEN-BAKED BEANS—economical, quick-to-prepare and delicious—are the answer. M-m-m! Mealy, mouthwatering, baked beans steeped to the heart in spicy tomato sauce made from sun-ripened "Aristocrat" tomatoes. Serve them often. And treat your family and friends to Heinz Cooked Spaghetti, too. It's another delicious money-saver—expertly cooked for you by Heinz.

**Lucky The Bride** who starts housekeeping with a new 52 GURNEY Gas Range. I've had so many veteran homemakers tell me how much they like the Gurney range that I'm recommending that every bride-to-be at least look them over. Ask your Gurney dealer to show you all their wonderful features. You'll love the glass oven-door panel that lets you look inside without opening the oven-door. And of course, there's the special Gurney "Even-Heat" oven that keeps the temperature exactly right—automatically on the sides, the top, the bottom—and even in the corners. Yes, now's the time for you to find out about all the exciting features that make Gurney Gas Ranges so popular with good cooks everywhere.

**One Thing I Never Forget** to take to the cottage with me... a summer's supply of SAL HEPATICA. Many's the bright summer day Sal Hepatica has "saved" for me! One glass of sparkling, pleasant-tasting Sal Hepatica before breakfast chases away that sluggish feeling—puts me in a real holiday mood. Have a head-ache?—feel "lower than a lizard"?—Sal Hepatica has been a faithful family laxative for over 60 years. You can use it safely merely as a refresher in the morning—or at night—when your system feels the need of a good cleansing. Be sure all your vacation days will be bright and shining—take Sal Hepatica to the cottage with you!

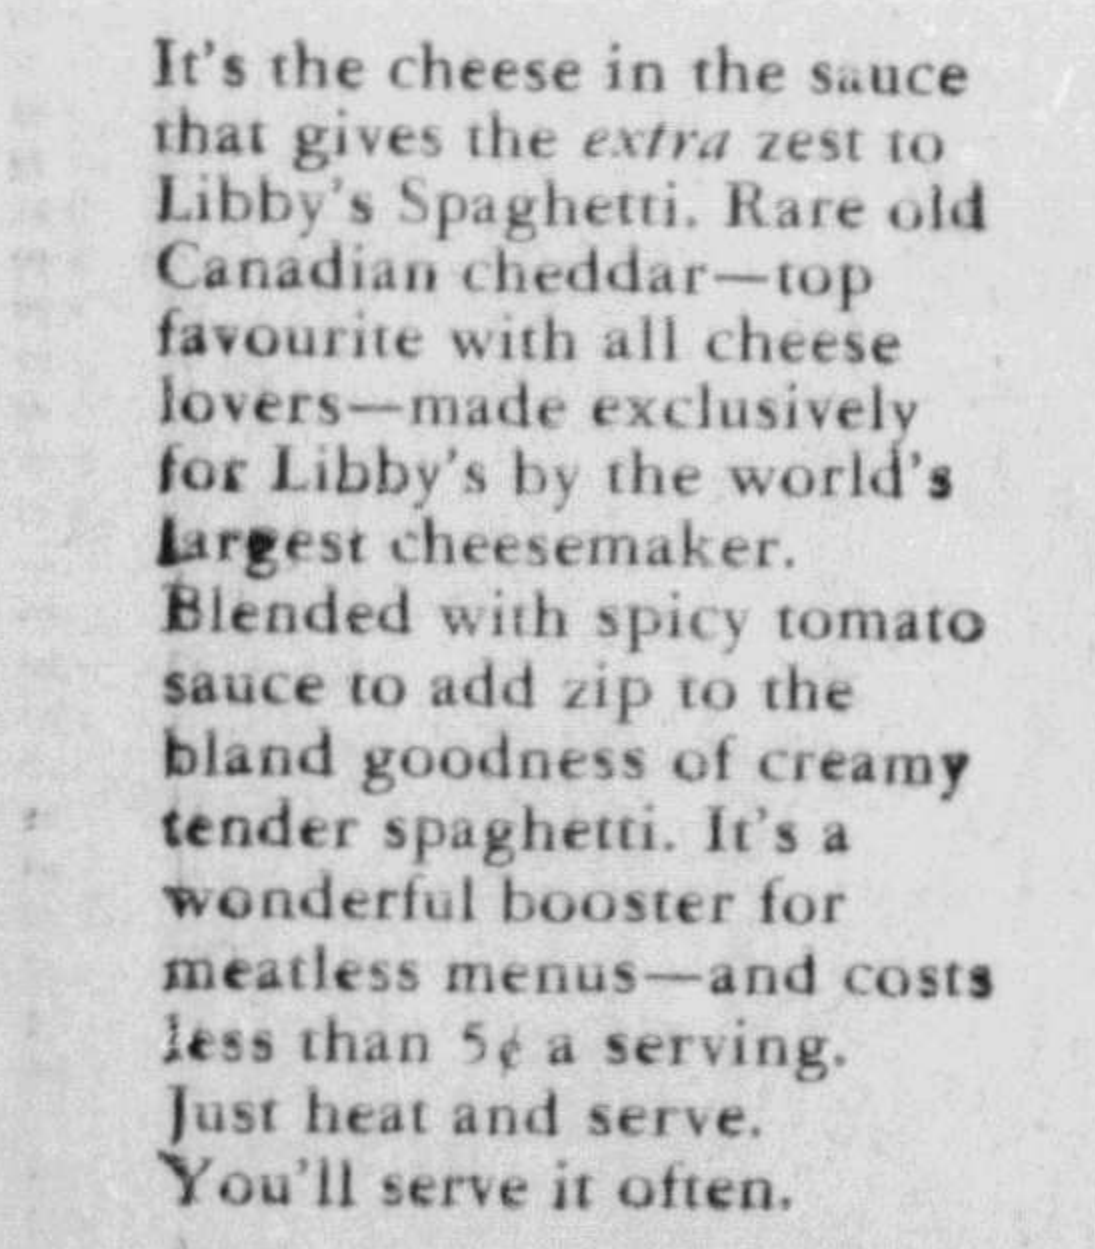

**What A Relief!** I feel like a new woman since I made my new "food friend"—BLUE-JAY Corn and Calumet Plasters with Phenylum. What's Phenylum? It's the most effective medication ever invented for corns and calluses... a real "lunch-blessing" to us folks with unhappy feet. It took ten years of scientific research by Blue-Jay to develop Phenylum... and now they've perfected it to the point where it works 33% faster and is effective in 95% of the cases tested. So if corns and calluses are making you grumpy—d blue... just buy Blue-Jay Corn Plasters with Phenylum and you'll feel "like new!"

**Fashion Is Fun** when you know all the "tricks". Like wearing a pale pink or pale blue slip under a black summer sheer. Makes you look cucumber-cool on the hottest of days. And another fashion-wise trick that's a "must" is to fit your clothes to perfection with LIGHTNING SLIP FASTENERS. Whether your pretty dresses are sheer or crisp or gaily-colored or lace—they'll look prettier on you when you give them the "perfectionist touch" of a Lightning Fastener. Lightning Fasteners fit with nary a wrinkle nor rumple—what's more—they stay put. That's because they're the zipper with the one and only automatic lock—tiny, neat, but oh, so reliable. They just won't slip. For summer sheers, choose Lightning Style No. 703 or seam-thin 222.

**It's The Best Food News In Many A Moon**... the new BLUE BONNET DE LUXE MARGARINE—pre-cut in individually wrapped, golden-yellow quarter pound tins—right on the dish—appetizing, golden-yellow margarine ready for your table. No scooping, no slicing—just unwrap what you need. There's real flavor to seal in the country-fresh Blue Bonnet flavor. And you can forget the measuring cup when you cook with De Luxe Blue Bonnet. The measuring guide on each package shows exactly where to cut. Just think—all these "De Luxe" advantages and Blue Bonnet "De Luxe" quality, too!

It's the cheese in the sauce that gives the extra zest to Libby's Spaghetti. Rare old Canadian cheddar—top favourite with all cheese lovers—made exclusively for Libby's by the world's largest cheesemaker. Blended with spicy tomato sauce to add zip to the bland goodness of creamy tender spaghetti. It's a wonderful booster for meatless menus—and costs less than 5¢ a serving. Just heat and serve. You'll serve it often.

**Comes Complete — Ready to Install**

Only one-tenth the weight of a brick chimney, the Selkirk Metal Insulated Chimney consists of three metal sleeves with 2 1/2 inches of fireproof insulation and a 3/4-inch sealed air space enclosing the inner flue. This combination keeps the flue hot preventing soot from forming. When your pipe is clean, the draft is increased—that's how you can save on fuel. The Selkirk Chimney is ready to install, requires no expensive foundation and under normal conditions never needs cleaning.

# New York Tradesmen Get Raise

## Headhunting Not as Bad As Sampling on Human Hearts

carpenters  
like would  
all work

ANCOOVER (CP)—A contractor's spokesman said Tuesday that a vote which would result in the payment of practically all work in the Greater area within the next few days.

The announcement was made following a special meeting of contractors, which was held in part: "It was unanimously decided to ask the Labor Department for a supervised authority to suspend earnings of contractors giving work."

NEW DELHI (Reuters)—Prime Minister Nehru today said headhunting is "deplorable" but perhaps a little better than the more evil practices that prevail in cities.

Speaking at a conference on tribal welfare, he said, "It is sometimes better to cut a hand or head off than to crush and trample on the heart of man or of a people."

The three-day conference is discussing how to spend two crores of rupees (\$4,200,000), earmarked by the central government this year for the development and welfare of India's 19,000,000 tribal people, who include head-hunting Nagas, tree-dwelling Assamites, and the pygmies of the Nighth Blue Hills.

Nehru said the tribal people have the spirit of song and dance and of enjoying life in a way lacking in the modern civilization in India.

He agreed that the situation whereby individual construction jobs are being struck one by one creates an impossible situation which can only be remedied by uniform action throughout the industry.

# Drunkenness Found To Be Increasing Threat

NEW YORK—A 15-cent-an-hour wage increase for 100,000 building trades workers in the New York City area was announced yesterday. The new wage scale will raise wages of the lowest-paid workers in the group, excavating laborers, to \$2.05 an hour. Highest scale will be \$3.40 for hoisting engineers and structural iron workers.

## New Paper Mill Begins Output

DUNCAN BAY, B.C.—British Columbia's newest paper mill began operating Tuesday turning out 2000 feet of paper a minute.

Official opening ceremony at the Elk Falls Co. plant here will not be held until Sept. 15, when some 500 industry leaders from across Canada will attend.

Completion of the \$21,000,000 plant brings to nine the number of pulp or paper mills now operating in B.C., exclusive of paper finishing and building materials plants using wood pulp.

WESTERN RIVER  
The Skeena River in British Columbia is navigable by steamer for about 100 miles from its mouth near Prince Rupert.

TORONTO (CP)—N. Rae Speirs, Toronto educationist, has written a book—"A Teacher's Manual for Alcohol Education"—for use in Ontario schools.

A director of physical education for the Toronto board of education, Mr. Speirs prepared the volume at the request of the Ontario Department of Education.

"Drunkness," he says, "is a greater threat to mankind today than ever before, due to the increased tempo of life."

Mr. Speirs says that if alcohol education is to be effective with young persons it must have a more positive approach than the fear technique.

Young people in particular cannot be frightened permanently into good habits or the abandonment of bad habits," he says. "For over half a century school children have received negative instruction in the physiological effects of alcohol on the human body, without noticeable effect upon the amount of drunkenness or alcoholism."

### DRINKING PATTERNS

The manual contains a section on the change in the pattern of drinking in Canada, comparing 1871 to 1949. Spirits made up 34 per cent of the total in 1871 as against five per cent in 1949, beer 61 per cent

as against 92 per cent in 1949. Wine decreased from five to three per cent.

The old idea that only strong men could "hold their liquor" is a myth, says the author. He claims there is no relation between virility and a capacity for alcohol beyond the fact that as a rule men have larger bodies which provides a greater tissue volume for the dilution of alcohol.

Because intoxication offers additional problems to their sex, girls are under special disadvantages, says the author. Being smaller, they become intoxicated more easily, and society tends to look with disfavor on intoxicated women.

"The alcoholic wants more than the taste of alcohol, he looks for relief from anxiety and responsibility," says Mr. Speirs. "Drugs, they say, may alleviate symptoms, they cannot be expected to bring about the permanent rehabilitation of the alcoholic."

### Big Tree Program

REGINA (CP)—More than two million tree seedlings are being planted in Saskatchewan this spring under the program sponsored by the provincial agriculture department.

## Tourist Boat Rams Into Dock

NEW YORK (CP)—A crowded excursion boat crashed into a

Sunrise Co. Ltd.

Here's why pulp mills put you "in the chips"

You may never see a pulp mill in operation. You may never watch the giant chipping machines as they render each log into millions of biscuit-sized flakes for subsequent cooking in acid digesters. Yet, if you live in British Columbia, these spruce and hemlock chips are putting extra dollars into your pocket every year.

You see, pulp mills use low grade logs unsuitable for sawmill or lumber yard. They use slabs, edgings and log ends which sawmills cannot use. They use lumber scrap and waste materials which were formerly destroyed in burners because no useful purpose could be found for them. Pulp mills waste nothing that can be converted into chips.

Because of this complete utilization of forest material, pulp mills enrich our economy at no one's expense. They do not compete with sawmills. They take what others do not want or cannot economically reach. They buy what was once thrown away.

It takes a lot of money to build a pulp mill—as much as \$50,000 for each man or woman employed in the operation. That's why surrounding forests must be made to furnish a continuous yield, generation after generation. Only by such methods can we hope to stay in the chips so necessary to our operation and to the continuing prosperity of the province—which includes you.

Columbia Cellulose Company is the first unit of a rapidly expanding Canadian industrial organization. Within a few months, this organization will be combining timber from British Columbia with natural gas derivatives from Alberta to produce a wide range of fibres and other acetate products for Canadians from coast to coast. Our program of continuous forest yield ensures lasting full-time employment for thousands of Canadian workers.

## Flood Cleanup Is Hard Labor For Townsfolk

EASTEND, Sask. (CP)—This town in southwestern Saskatchewan still bears the scars of flood.

The 700 inhabitants of East-end are busily cleaning away the flood's aftermath, more than a month after the entire population was evacuated when Frenchman Creek boiled over its banks and swept through the town.

Damage, estimated at 250,000, visited almost all of the 270 homes and buildings in the town. But dull and dreary though the work of rehabilitation may be, the people have set to with a will.

Power pumps tackle the job of draining basements. Biceps and buckets have teamed up to cart the dirty river silt from livingrooms and kitchens. Cement mixers and piles of gravel stand outside homes where men

are replastering walls that show a high-water mark of four feet. **DAMAGE EVERYWHERE**

The evidence of flood is everywhere. Piles of ruined wheat stand behind the town's four elevators, where they were dumped after floodwaters subsided. Hospital records are stacked at one end of the building with wrecked furniture.

Keenly felt by the whole community was the damage to East-end's museum. Its treasures included preserved bones of reptiles that roamed southwestern Saskatchewan in prehistoric times. The floodwaters ruined the leg bone of a centuries-old dinosaur. Another casualty was the three-horned triceratops, one of three in all Canada.

But there are compensations. Patients of town dentist Dr. H. Henderson get an occasional respite from the drill when the dentist's equipment short-circuits from water damage.

The weaver birds of South Africa weave nests from blades of grass and other vegetable fibres, often using an elaborate design.

## BLACKWOOD on Bridge

By EASLEY BLACKWOOD

Echo Play Calls for a Third Round

Mr. Dale had a horrible hand as far as high cards are concerned but he had a seven card suit, a void in the opponents' principal suit and his partner had overcalled. He also considered the fact that one of the defenders would be Mr. Muzzy. This last was the most important consideration of all.

Mr. Champion's opening lead was the king of clubs and Mr. Muzzy played the nine spot. That's the trouble with knowing a little about a subject—in this case, the subject of signaling. It's better to know nothing at all.

When Mr. Champion saw the nine of clubs, he figured it to be the start of a high-low signal which, of course, it was. He continued with the ace of clubs, on which Mr. Muzzy played the deuce. It now seemed clear that Mr. Muzzy wanted the suit continued because he had a small spade, higher than dummy's six spot, with which he wanted to ruff a third club lead.

Mr. Champion therefore continued with the seven of clubs, dummy ruffed with the six of spades and Mr. Muzzy triumph-

antly ruffed with the king of spades.

He returned the eight of diamonds to his partner's ace and a fourth club was led. Dummy ruffed with the deuce of spades and Mr. Muzzy, not to be denied, over-ruffed with the ace. Thus the defenders had to be satisfied with a meagre two trick set.

"Very clever, Muzzy," said Mr. Champion through clenched teeth. "You keep them from trapping your ace and king of trumps."

"What do you want me to do?" asked Mr. Muzzy plaintively. "You've been after me 'o high-low to show a doubleton in your suit."

"You don't echo just to show a doubleton," Mr. Champion screamed. "You echo to show the doubleton AND that you want a third round of the suit led. What good did it do you to ruff with the ace and king of trumps?"

If Mr. Muzzy had made the right play of the discouraging deuce of clubs at trick one, the defenders could have picked up dummy's two trumps and then won three more clubs and a diamond for a 700 point set.

## B.C. Mine Town Known as Model Of Cleanliness

NATAL, B.C. (CP)—Sparwood, two miles west of here in the picturesque Crow's Nest Pass area, doesn't look like a coal-mining town.

It is, in fact, the realization of a dream long held by planners of the Crow's Nest Pass Coal Company.

For years housewives whose husbands worked at the mines put up with the grime and soot from coke ovens and slag piles at nearby Natal and Michel.

But in Sparwood, housewives can forget the coal mines. They live in clean, comfortable bungalows in a well-planned residential town which the coal company hopes will soon replace grimy Natal and Michel entirely.

The project started in 1939 when the company built six houses with a limited expansion in mind. But after the war they decided to broaden the plan and today there are 50 houses in Sparwood with another 25 going up this year.

Lots in Sparwood are sold to company employees for \$1 each. Others must pay \$250 for a lot. Space has been set aside for a commercial district, well away from the residential area, which includes a large playground for children.

Work will start late this summer on a new \$425,000 high school. In addition to six classrooms, the school will contain a home economics room, industrial arts shop, drafting room, library and study hall, science room, lunch room and a combination gymnasium and auditorium.

The school will be finished in September, 1953. By that time the town of Sparwood will be well on the way to being one of the brightest mining towns in Western Canada.

**NORTHERN ISLAND**  
Southampton Island in the northern part of Hudson Bay covers an area of about 19,100 square miles.

THE INTERNATIONAL CINEMA GUILD OF CANADA PRESENTS
