## Differences Tie Up Number of Boats.

A number of fishing boats are tied up here because there is a difference of opinion as to the share the fishermen shall get during the coming year. Both sides are obdurate and there seems no hope of a settlement.

It is not for an outsider to say who is at fault or even if there is a fault. Doubtless each side thinks the other wrong. The result of the difficulty is that the harvest of the sea is not at present being gathered, the fishermen are running behind as they have no insurance against unemployment, and the Cold Storage Co. has a plant lying idle and is discharging men.

The flatfish industry is a new one and is being encouraged by the Dominion Government, which pays two-thirds of the freight to the prairie market. A demand for the fish has already been created, but it would scarcely be wise to raise the price yet or the industry would be nipped in the bud. It is to be hoped that a settlement will be reached in the near future and that the industry will continue and flourish in order that those connected with it and the city in general may benefit.

## Navy League's Demand Is Not Necessary.

The British Columbia Navy League asks for the construction of a big drydock on this coast that will take care of cruisers of H. M. Navy. It does this because of the need to dock a vessel of that class and says it should be located somewhere on the coast. Prince Rupert has a dock of that kind. It is large enough to dock cruisers, but it is not in use at the present time. There is no need of another dock of the same type at present because if the shops here are supplied and there is a proper gang of workmen here the repairs can be made just as easily as at Victoria or Vancouver.

## Col. J. A. Currie Hits Foul Blow.

The action of Lieut.-Col. J. A. Currie in slating free traders as disloyal is just the sort of action that the men of this country went to Germany to fight against. It is glaringly false and is certainly unworthy of a soldier.

Colonel Currie is working on behalf of those manufacturers who are enabled to make big profits through the protection that is afforded them by the tariff. Naturally they are jealous of any interference with their income. They will be wise, however, if they insist that their advocates keep to facts in the fight which they are putting up, for hitting below the belt always brings trouble to those who do it.

## Mining Revival Beginning to Show.

The opening up of the Ladysmith smelter which was prophesied in despatches from Victoria is an indication of increased interest in mining on the coast. There are but two smelters at present in the province to which coast mines can ship. Those are at Granby and Ladysmith. The former has been working regularly but the smelter at Ladysmith has been shut down for some time.

The owners of the smelter must see business ahead or they would not think of blowing in the smelter. Many mines will be shipping soon, and if the smelter is run on a business basis and prompt payments made for the product it will soon get ore enough. In the past the financial arrangements have not been good and shippers have found difficulty in collecting after the ore has been treated.
