## Manufacturer's Association Plans To Collaborate With Bennett In Conservative Protection Policy

Meeting to Be Held Next Week to Consider Tariff and Other Questions With View to Two Possible Courses of Action

MONTREAL, Aug. 9:-The Montreal Gazette this morning says: "Industrialists from all parts of the Dominion will meet next week in Toronto under the auspices of the Canadian Manufacturers' Association to consider tariff questions and collaborate with Hon. R. B. Bennett, the new premier, in regard to fiscal matters. This information reached the street yesterday.

"From what can be ascertained the Canadian manufacturers see before them two aspects of the tariff question. These are:

"Temporary action that may be taken at the forthcoming extraordinary session of Parliament in September, and

"'General revision of the entire Canadian tariff, which is expected at the next regular session of Parliament in the winter to enable the Conservative Government to put into effect its policy of true protection, which was one of the planks which elevated it to power."

Chief Supervisor of Fisheries Makes Public Statement Regarding Runs

Yielding the largest pack for a good many years, the run of salmon in British Columbian waters has more than held its own for the current season to date, according to Major J. A. Motherwell, chief supervisor of fisheries.

The pack of the sockeye, which is the most valuable variety, amounts to 308,000 cases, the largest since the brood year, 1925; which is, Major Motherwell states, the proper comparison. The total average catch of sockeye for the complete season exceeded by 4,000 cases and fishing will continue for a considerable period. Sockeye are still running heavily in the northern areas, although the Fraser River has not yet come into the picture. Four years ago, which is the brood year

# Percy Williams Beats Own Canadian Record Toronto Race Today

TORONTO, Aug. 9:-Flashing his best form against five of the best ranking Canadian sprinters, Percy Williams covered the 100 metres here this afternoon in ten and three tenths seconds, three tenths of a second better than his previous Canadian record and one tenth of a second better than the recognized world record of ten and two fifths by Eddie Tolan.

Officials here believe Williams has set a new world's record for outdoor competition.

## S. JOHNSTON OIL DOCK NONE WORSE Substantial Improvements Being

Made By the Imperial Company

In consequence of their increased business and to cope with the recent development of airplane and hydroplane activities the Imperial Oil Company are making extensive alterations and additions to their accomodation on the waterfront.

The building of a shed 20 feet by 120 feet will augment their space fleet. Another addition is a 30 feet by 50 feet loading platform for barrel filling and tank wagon filling. On the wharf a supply shed is bewill facilitate the quick loading of boats as supplies can be readily transferred from the steamer to the shed and thence to the boats.

A new office outside the present building is a further extension. The piling is being renewed, and new decking and silling put in.

A special and very modern touch Young Couple will be added by the erection of a Young Couple will be added by the erection of a large windcock on the front. This will be a guide to hydroplanes and flying boats, showing the direction of the wind and so enabling the planes to make the most satisfactory landing. The necessary parts for this have already been ordered. With the addition of floats at which a fully equipped hydroplane base
