REDISTRIBUTION OF SEATS

It has been intimated from time to time that there will be a redistribution of provincial constituencies and that a gerrymander is to be pulled off to eliminate a number of Liberal seats and thus strengthen the chances of the Tolmie government being returned at the coming election.

We can hardly believe that Dr. Tolmie would do that sort of thing. If he does he is a changed man from the Dr. Tolmie of private life of a few years ago. Then he was it was proposed to amalgamate all May I add my little quota to the such a fair man that he acted as judge at horses races and at horse and cattle shows throughout the country and no person ever doubted his integrity.

We suggest to the Premier that if he wishes to cut down the representation, he commence with the cities of Vancouver and Victoria. It is already admitted that representation should not be according to population. We have never had it in any province of Canada. Representation \$100, contributed to the Christmas type, who is unafraid of placing the should be arranged in such a manner as to give the mem- cheer fund, which is entirely wrong bare facts before us. ber an opportunity of looking after the interests of the whole of his electoral division. On this basis two members could very well look after the interests of Vancouver and one of Victoria. Even then the members would have an easier time than any other members in the House.

In some constituencies, particularly in those where the gerrymander is suggested, the member has to travel thousands of miles to visit his constituents. Unless he visits them their needs are never discovered for many of them are too poor to visit him. To double the size of the already large ridings would be an outrage. Cut down the cities and no hardship would accrue to any person and then Peace River could get its member without increasing the present Legislature membership.

I fail to see how this will help out the situation. What is necessary at the present time is to keep all public expenses down to a minimum, in order that the unemployed may be fed, and also that our citizens will be able to meet tax bills and keep their homes out of the tax sale. The "frills" viz: domestic science, commercial classes and manual training are all very good and useful and nice to have in prosperous times, but today's conditions make
